Washington, DC 20590

RE: Advanced Digital Construction Management System (ADCMS) Grant Letter of Support for
Maine Department of Transportation

Dear Secretary Buttigieg:

I am writing to express our support of Maine Department of Transportation's (Maine DOT) for
the ADCMS Grant application.

Maine DOT's path to digital project delivery will benefit Maine's consulting engineering
community through development and use of 3D models and greatly reducing 2D paper plan
projects. Maine's engineering firms work with utilities, municipalities, state and federal agencies
throughout New England that create plans of various levels of digital maturity. Maine DOT's
digital delivery growth through technology advancements, the use of digital tools and GIS
applications will improve cross discipline plan development and Maine DOT's leadership in
digital delivery will be a conduit for digital advancement industry wide.

The American Council of Engineering Companies of Maine proudly supports Maine DOT's
grant application, and Maine DOT's development of their digital delivery process. We look
forward to assisting Maine DOT's development and continued success in producing successful
projects.

Sincerely,

A handwritten signature in black ink that reads "Tanya Griffeth". The signature is written in a cursive, flowing style.
