

Attachment D: Kids Quest Site #8 Scope & Sketches Schoodic NSB (ME) Discovery and Recreation Hub

Kids Quest installations engage children and parents with the environment while featuring local history and culture along the byway. The project stands out for its interactive elements, creative marketing materials, support for family-friendly travel, and unique presentation of Maine's history and ecology. Some existing site themes include low tide creatures, lobster fishing, and granite quarrying. A Kids Quest pocket guide is available for download on the byway website, and printed versions are available along the corridor at local businesses and attractions. The proposed project will add a Kids Quest site with a "Coastal Forests" theme. The program is included in Maine's [Teach Me Outside](#) curriculum, a collaborative project that supports and works in partnership with Maine communities to ensure that all Maine youth have access to powerful, hands-on environmental learning opportunities. In addition, the program was recognized with a *2023 Maine Tourism Innovation & Creativity Award*, and with a National Scenic Byway Foundation award for Visitor Experience.

Possible Types of Signage at Exhibits Along the Trail
