MAINE
COLLISIONS BETWEEN VEHICLES AND LARGE ANIMALS

Wildlife crashes happen anywhere, anytime - but be especially alert:
- From dusk till dawn. Slow down at night.
- Driving through 'crested' or rural areas.
- When you see one deer or moose... they tend to travel in a group so there are often more animals nearby.

If a crash is unavoidable...
- Apply the brakes.
- Let up on the brake just before impact.
- Aim to hit the tail end of the animal.
- If possible duck to minimize injury.

MOOSE
CRASHES PER 100 MILLION MILES TRAVELED

Watch for the reflection of headlights in the eyes of a deer. Because moose are taller, headlights don't reflect in their eyes. Instead, be on the lookout for a tall silhouette.

DEER
CRASHES PER 100 MILLION MILES TRAVELED
