OFFICIAL BUSINESS DIRECTIONAL SIGN (OBDS) CHECKLIST

Dear Sign Maker/OBDS Permit Holder:
The following checklist is intended to compliment the “Official Business Directional Sign Regulations” booklet. This list is compiled to emphasize some of the more commonly overlooked requirements that have resulted in signs being rejected. If you have questions or feel that any of these statements conflict with the “OBDS Regulations” booklet, please feel free to call us at (207)624-3332.

Susan Merriman, Right of Way Control Technician

General:

*Signs not made to standards will not be installed.*

**Sign Material:** Minimum ½ inch thick, medium density, overlaid plywood. Other materials may be considered if they don’t deform, warp or bend under normal weather conditions. All materials must have MDOT approval. Plain boards and plywood less than ½ inch thick will not be accepted.

**Location of the directional area** (the area of the sign that indicates distance and direction):

To indicate a left turn or straight ahead, the arrow will be on the left side of the sign— to indicate a right turn, the arrow will be located on the right side of the sign.

**Permit number:** Must be located on the back of the sign in white.

---

**Non-Reflectorized Signs:**

This option no longer available on new applications starting October 1, 2019.

Non-reflective signs that were approved, permitted and installed before January 1, 2020 will be allowed to remain in place until the sign is found to be lost, stolen, defaced, damaged, deteriorated or for any other reason the Department deems the sign needs replacement. If the sign is required to be replaced due to the aforementioned reasons, the business will be required to notify the Department to have the existing permits revised to meet the requirement that all signs be reflective.
Reflectorized Signs:

**Color:** White letters on a blue (MUTCD Color Specifications Blue-294) background only. Only high intensity, prismatic reflective material will be allowed. The back side and edges of the sign shall be sealed and painted a dark brown.

**Logos:** May be used within a logo area or may be omitted to provide a larger legend area. Logos may be multicolored. Text may added in place of a logo image.

**Legend:** AS APPROVED ON THE PERMIT. Modifications to the legend must be reapproved by MaineDOT. Lettering font shall be Helvetica Bold or Highway Series, Gothic E Modified font, lower-case, with the initial letter upper-case. All capital letters are prohibited. Only two lines (14 characters) of print are allowed.

**Dimensions:** (Sign size is determined by MDOT and defined on the permit)
