\*Special thanks to our partners at MEMA for assisting us with these courses!

# Incident Command System for Expanding Incidents, ICS 300

This course provides training for personnel who require advanced application of the Incident Command System (ICS). This course expands upon information covered in the introductory ICS courses.

Upon completion of this course, students will be able to:

Describe how the National Incident Management System Command and Management component supports the management of expanding incidents.

Describe the Incident/Event Management process for supervisors and expanding incidents as prescribed by the ICS.

Implement the Incident Management process on a simulated Type III incident.

Develop an Incident Action Plan for a simulated incident.

\*The target audience for this course includes individuals who may assume a supervisory role in incidents.

Course Prerequisites: ICS-100, ICS-200, IS-700, IS-800

# Advanced Incident Command System for Complex Incidents, ICS 400

The goal of ICS 400 is to prepare experienced responders and other senior emergency management personnel who may perform in a management capacity for major or complex incidents (Type I or Type II incidents). Large and complex incidents that require the application of area command don't happen often. Although this is an advanced ICS course, it is not intended to develop mastery of area command. The purpose of this course is to expose students to the concepts of utilizing area command in major and complex incidents.

Upon completion of this course, students will be able to:

- Apply key NIMS doctrine concepts (NIMS Management Characteristics, Unified Command, Incident Command System structure/ functional area responsibilities, IAP preparation, Operational Period Planning Cycle, and incident complexity) to the management of a complex incident or event.
- Apply the appropriate structural option to manage a complex incident.
- Develop an Area Command organization.
- Identify complex incident management issues that can result from a lack of multiagency coordination.

\*The target audience for this course includes experienced senior emergency management personnel who may perform in a management capacity for major or complex incidents.

Prerequisites: ICS-100, ICS-200, IS-700, IS-800, and ICS-300.
