

Truck Co. Manifesto / Casco Fire & Rescue Present

Li/EV and how they affect our industry.

Class Description

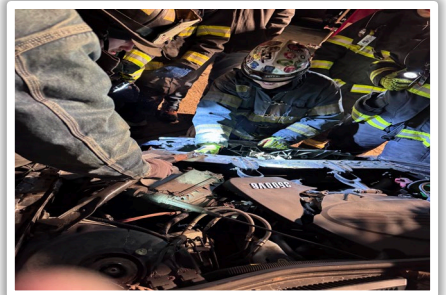

2-part program explaining the science and chemistry of lithium-ion batteries, their use, fire mitigation, case studies, and recommended SOPs/SOGs on removal

The second part consists of Hybrid/EV vehicle anatomy, how they work, different types, how to mitigate during an MVA, size-up, fire suppression, intro to extrication, and recommended SOPs/SOGs on dealing with them including the industry's best practices and case study.
