Oct-15-	Non-	Door Dash & Hello Alice:	\$200,000,000	competition. The selected team will develop their prototypes and conduct field tests on small- and medium-sized farms in Africa. Winning teams will increase net economic value to small- and medium-size farms by developing innovative food solutions for any stage of the food system, from seed to sale; designing a viable business model; and increasing farm productivity and/or decreasing post-harvest loss. The winning team will receive a \$1 million grand prize, with \$1 million in additional prizes (2nd place - \$300,000; 3rd place - \$150,000; People's Prize - \$100,000). Many entrepreneurs lack the information and tools they need to bring their inventions to life. In addition to the chance to win cash prizes, the Milken-Motsepe Innovation Prize program provides additional opportunities for entrepreneurs, including participation in an online community; a twelve-week experiential learning program powered by the Stanford Center for Professional Development Idea to Market curriculum; and membership in the Milken-Motsepe Innovation Prize program alumni network. Registration for the competition is free and open to anyone. Design round submissions are due in December. Up to twenty-five teams will be notified of their design round awards in February 2022, and finalist prizes will be announced in April 2023. Page 4 This information was exported from MAX-TRAX on Oct-22-2021 by Anne Fuchs(NONFED). Search Criteria: project = RR AND status = Available AND component in (Connecticut, Maine, Massachusetts, National, "New Hampshire", "Rhode Island", Vermont) AND (Deadline >= endOfWeek() OR Deadline is EMPTY) AND issuetype in ("Technical Support Resource", "Financial Resource", "Material Resource", "Information Resource", "Education Resource", AND (description ~ "Economic Support" OR description ~ "Economic Development" OR description ~ "Economic Zone") ORDER BY cf[18801] ASC

Foundation	
Foundation	Supported by the Cognizant U.S. Foundation,
	the <i>Workforce Innovation Network</i> (NGA WIN) is helping
	states build capacity for near-term innovation and longer-
	term strategy to prepare their workforces for a post-COVID-
	19 economy. NGA WIN serves as a non-partisan learning
	and action collaborative for state leaders who have
	demonstrated strong commitments to building a resilient
	workforce.
	The Network plans to devote particular attention to four
	areas:
	Expanding access to essential support
	services
	Rapidly connecting jobseekers to work
	Advancing digital access and skill     development
	Enhancing job quality for all workers  NGA and the Cognizant U.S. Foundation invite states and
	territories to join the Workforce Innovation Network to
	participate in select learning opportunities with NGA and its
	network of subject matter experts and to learn about future
	rounds of Workforce Innovation Fund grantmaking.
	The COVID-19 pandemic has dramatically reshaped large
	segments of the U.S. economy, resulting in the rapid loss of
	20 million jobs and the closure and bankruptcy of thousands
	of small businesses, while accelerating trends toward
	automation and remote work. Governors have worked to
	secure assistance for displaced workers and affected
	businesses, meanwhile building new frameworks and
	interventions to support a more equitable economic
	recovery. As Governors lead efforts to promote equitable
	and forward-looking economic recovery in their states and
	territories, the Workforce Innovation Network will help
	facilitate innovative state-level policy solutions that improve
	employment and workforce outcomes.
	States Participating In The Network Will Benefit From:
	Peer learning and collaboration with other
	member states to identify best practices and
	share lessons learned across the education and
	workforce development system
	Connections to NGA's partners, including
	corporate partners and national nonprofit
	organizations
	Access to technical assistance including
	webinars, facilitated peer-to-peer learning, virtual
	state site visits and more
	Additional parties are invited to receive periodic updates
	about NGA WIN and how states are improving workforce
	and employment outcomes for a stronger and more
	equitable post-pandemic future by joining the mailing list.

Apr-07- 2021	Non- Governmental Organizations	Pew Charitable Trusts - "How States Can Direct Economic Development to Places & People in Need: Strategies to strengthen place-based programs, better support distressed areas"	Funding not identified. Allocated: \$0	Faced with the financial reality of job loss, business interruption, credit issues, and debt, affected Americans need the support of HOPE Inside Disaster, formerly known as HOPE Coalition America (HCA), HOPE's division for disaster preparedness and recovery. On, March 13, 2020, Coronavirus was officially declared a U.S. national emergency. At some point, we believe every American will begin to experience some level of economic stress as a result of Coronavirus. HOPE Inside Disaster is a national financial emergency preparedness and recovery service created following the events of 9/11. In partnership with FEMA, Operation HOPE pioneered the new federal policy space of emergency disaster preparedness, response and recovery. Through partnerships with the American Red Cross, FEMA, and industry leaders, our teams deploy in response to federally-declared disasters to serve as a financial advocate for local residents and small business owners. Through the lens of Fiscal & Economic Policy, this site explores strategies to strengthen place-based programs and better support distressed areas. Pew's analysis found that the criteria that states use to geographically target their programs are often ill-conceived or out-of-date, with the result that initiatives end up serving wealthy locations instead of disadvantaged ones. And even	[Community Planning and Capacity Building, Economic]	Deadline not identified.
				<ul> <li>when programs do reach the intended communities, they often are not well-suited to help residents.</li> <li>Pew's research indicates that to begin solving these problems, states should: <ul> <li>Target programs using quantitative measures. To ensure that benefits accrue to communities in need, policymakers should use carefully selected objective measures of distress to determine eligible areas.</li> <li>Systematically assess geographic targeting. States should regularly examine where businesses using programs are located in order to identify and correct instances in which wealthier areas unintentionally benefit.</li> <li>Regularly update the set of eligible locations. Because local economic conditions change over time, policymakers should regularly review where programs are available to ensure that those places still need assistance.</li> <li>Tailor economic development strategies to local needs. Financial incentives alone may be insufficient to encourage private investment in areas that lack trained workers or necessary infrastructure, so policymakers should address these prerequisites to growth.</li> </ul> </li> </ul>

				<b></b>		
			Create job opportunities for low-income			
			residents. Even programs that successfully			
			encourage investment in distressed areas may			
			not provide benefits to the local population, so			
			states should embrace strategies—such as			
			prioritizing industries that offer good jobs to			
			people without college degrees—that can help			
			direct economic gains to community members.			
			Some states are demonstrating that progress is possible.			
			For instance, in response to assessments that revealed			
			flawed targeting, New Jersey and North Carolina changed			
			their approaches to more effectively direct the benefits to			
			the intended locations. Through similar reforms,			
			policymakers in other states could ensure that place-based			
			economic development programs help combat poverty,			
			joblessness, and disinvestment in some of America's			
			poorest communities.			
Sep-22- 2020	<u>GE Foundation</u>	Funding not identified.	Grant funding for employment, education, public health, and disaster relief.	[Health and Social Services]	Non- Supplement	Deadline not identified.
2020					al	luonanou.
			GE provides grants and invests in initiatives that work to			
			solve some of the world's most difficult problems. In			
			coordination with its partners; the foundation supports U.S.			
			and international education; developing health globally; the			
			environment; public policy; human rights; disaster relief; and			
			community success around the globe. U.S. priorities			
			include: (1) Developing Futures in Education: Through the			
			Developing Futures in Education program; GE Foundation			
			has committed nearly \$150 million to six U.S. school			
			districts to improve student achievement through a rigorous			
			math and science curriculum, professional development			
			opportunities for teachers; and management capacity			
			improvement. (2) Employee Programs: Through the GE			
			Foundation Matching Gifts Program, GE employees can			
			donate to an eligible nonprofit organization and GE			
			Foundation will provide a dollar-for-dollar match. Total gifts			
			in 2012 reached nearly \$38 million. (3) Disaster Relief:			
			When disasters strike; the GE family commits resources and			
			employee support to assist affected communities. GE			
			Foundation commits resources via grants to relief			
			organizations and through the GE Foundation Matching			
			Gifts Program. In addition; GE volunteers work through			
			networks at the disaster sites to organize local support and			
			align employees in the region. Key partners include GE			
			employees; International Red Cross; UNICEF; AmeriCares;			
			and Save the Children. Some recent examples of GE			
			Foundation disaster relief efforts in the United States			
			include: A) Oklahoma Tornado (2013) After a severe			
			tornado caused destruction in the suburbs of Oklahoma			
			City; GE and the GE Foundation committed equipment and			
			funding to support relief and recovery efforts. This included			
		1	I rending to support renor and recovery enorts. This included		1	ı – – – – – – – – – – – – – – – – – – –

				donating GE Healthcare medical equipment and			
				accessories to a regional hospital. The GE Foundation also			
				announced a \$250;000 donation to the American Red Cross			
				Disaster Giving Program in addition to its annual \$1 million			
				grant to the organization. B) Superstorm Sandy (2012) The			
				GE Foundation donated a total of \$5.8 million in support of			
				Superstorm Sandy relief-and-recovery efforts in New York;			
				New Jersey, and Connecticut including \$4 million to the			
				Robin Hood Foundation to support longer-term housing;			
				physical and mental health services; food banks; and local			
				economic recovery in hard-hit communities. C) Tornado in			
				Joplin; Missouri (2011) GE is a member of the American			
				Red Cross Annual Disaster Giving Program (ADGP).			
				Thanks to annual \$1 million contributions to the Disaster			
				Relief Fund (DRF) from ADGP members; the Red Cross			
				can respond immediately to the needs of individuals and			
				families affected by disasters anywhere in the United States.			
				In May 2011; a major tornado hit Joplin; killing at least 116			
				people and devastating the town. The American Red Cross			
				responded quickly by coordinating with emergency officials			
				and local community partners to help people impacted by			
				the tornado get back on their feet. Some immediate actions			
				included providing shelter; food; emotional support; and			
				other assistance to people in need. (4) Public Policy: GE			
				Foundation funds initiatives that enhance public policy			
				dialogue. Its support in this area encourages constructive			
				dialogue with key stakeholders. This involvement helps GE			
				Foundation identify and learn about the next generation of			
				policy issues in order to work toward effective solutions to			
				significant policy dilemmas. (5) Developing Health: Aims to			
				increase access to primary care for underserved			
				populations in targeted communities.

Page 14 This information was exported from MAX-TRAX on Oct-22-2021 by Anne Fuchs(NONFED). Search Criteria: project = RR AND status = Available AND component in (Connecticut, Maine, Massachusetts, National, "New Hampshire", "Rhode Island", Vermont) AND (Deadline >= endOfWeek() OR Deadline is EMPTY) AND issuetype in ("Technical Support Resource", "Financial Resource", "Material Resource", "Information Resource", "Education Resource") AND (description ~ "Economic Support" OR description ~ "Economic Development" OR description ~ "Economic Mobility" OR description ~ "Main Street" OR description ~ "Economic Zone") ORDER BY cf[18801] ASC

				agencies, industry associations, and relevant stakeholders. In the development of the Water Reuse Action Plan (WRAP), there was a clear need for federal funding programs for water infrastructure to ensure that practices and policies help facilitate the adoption of water reuse among communities across the country. This specific action was developed to identify successful state policies and practices and demonstrate the potential for the Clean Water State Revolving Fund (CWSRF) to support water reuse. As part of the WRAP, the Office of Wastewater Management developed this document to highlight current policies and practices used by state CWSRF programs that support water reuse projects. Since 1987, the 51 CWSRF programs have each developed unique policies and practices to suit the specific needs of the states and communities they serve. In terms of water reuse, some states have had great success in financing projects and have developed policies to encourage or incentivize sustainable water reuse practices. Water reuse is a rapidly evolving practice in regions of the country where it was not previously a common practice. This document will clarify eligibility for the full range of potential sources of water for reuse and different end use applications, and help learn from the experiences of others to develop successful policies and programs. According to Bluefield Research, capital expenditures for municipal wastewater reuse are expected to total \$21.5 billion between 2017 and 2027. Much of this growth is expected to come from states like California, Florida, and Texas, but other states and regions are expected to see increased adoption of water reuse as well. To facilitate this investment, it is important for CWSRF programs to understand the different types of water reuse projects; the social, environmental, and economic benefits water reuse can provide; and how projects should be properly evaluated for potential financial support. While this guide primarily focuses on the CWSRF, many of the practices and policie

			1	1	I	
			According to the Centers for Disease Control and Prevention, as of June 30, 2020, the United States has documented more than 2.5 million confirmed cases and more than 125,000 deaths due to COVID-19. To facilitate the U.S. response to the pandemic, numerous federal agencies have awarded contracts for critical goods and services to support federal, state, and local response efforts. GAO's prior work on federal emergency response efforts has found that contracts play a key role, and that contracting during an emergency can present unique challenges as officials can face pressure to provide goods and services as quickly as possible. The Coronavirus Aid, Relief, and Economic Security Act (CARES Act) included a provision for GAO to provide a comprehensive review of COVID-19 federal contracting. This is the first in a series of GAO reports on this issue. This report describes, among other objectives, key characteristics of federal contracting obligations awarded in response to the COVID-19 pandemic; and the flexibilities available to federal agencies through the CARES Act, or other means to help facilitate the federal government's contract response. Future GAO work will examine agencies' planning and management of contracts awarded in response to the pandemic, including agencies' use of contracting flexibilities provided by the CARES Act. GAO analyzed data from the Federal Procurement Data System-Next Generation on agencies' reported government- wide contract obligations for COVID-19 through June 11, 2020. GAO also analyzed contract obligations reported at the Departments of Health and Human Services, Defense, Homeland Security, and Veterans Affairs—the highest

Apr-07- 2021	World Business Council for Sustainable Development	PUBLICATION - World Business Council for Sustainable Development: "U.S. Agriculture's Opportunities to Contribute to the Sustainable Development Goals"	Funding not identified. Allocated: \$0	Serves a basis for members of the food and agriculture value chain to acknowledge their own positive contributions, align on challenges that remain and advance specific opportunities to reduce environmental impacts. As part of our partnership with U.S. Farmers and Ranchers in Action (USFRA), WBCSD's <u>Scaling Positive</u> <u>Agriculture</u> and <u>SDG Sector Roadmaps</u> Projects supported the development of an SDG Roadmap report to assess the opportunities from now to 2030 for U.S. agriculture to continue to drive a resilient and sustainable agricultural system while resiliently confronting new crises along the way This report establishes that U.S. agriculture is accelerating global progress toward all 17 SDGs, and can have an outsized positive impact on a core group of seven. It serves a basis for members of the food and agriculture value chain to acknowledge their own positive contributions, align on challenges that remain and advance specific opportunities to reduce environmental impacts – in the U.S. and in the developing world. In accordance with the framework set out in the <u>SDG Sector</u> <u>Roadmap Guidelines developed by WBCSD</u> , the findings were developed through a literature review and rigorous stakeholder engagement process comprising 41 interviews and a review workshop with stakeholders from across the value chain. USFRA's partners in the creation of the report were United Soybean Board, WBCSD and ERM. The COVID-19 pandemic continues to drive both a health disaster and economic disruption. Societies are confronting their own roles in the lack of social and racial equity among their citizens. While the current challenges have us all focused on the very near-term, U.S. Farmers & Ranchers in Action (USFRA) is also looking to the future, and how U.S. agriculture can continue to build greater resiliency and sustainability into the U.S. agricultural system. 			disasters, this Louisiana Watershed Resiliency Study helps provide a strategy for prioritizing millions of dollars in federal recovery funds that can be used to protect life and property, ensuring the quality of life in Louisiana for the future. The study identifies and examines flood impacts in 22 watersheds affected by the two flood events. It offers a wide range of data needed to develop paths to compliance that address the unique recovery needs of each watershed. In addition, this study provides supporting documentation to help local leaders understand the activities and processes— economic, environmental, sociological, and demographic factors in the watershed—that can impact their area. https://watershed.la.gov/assets/docs/2019-12-23-CDBG- MIT-AP-FINAL.PDF	Infrastructure Systems, Natural and Cultural Resources]		
Mar-17- 2021	PUBLICATION - USDA/RD: Rural Transportation Infrastructure - Information & Guidance	Funding not identified.	Community Facilities Programs can help bring needed resources and innovation to create a framework for rebuilding transportation infrastructure in rural America. USDA Rural Development's flexible Community Facilities Programs can help bring needed resources and innovation to create a framework for rebuilding transportation infrastructure in rural America. Gaining access to sufficient capital for transportation infrastructure is a threshold condition for spurring economic growth. While rural communities share some common challenges with distressed urban areas, they also face some unique challenges in accessing financing and attracting private-sector investment. Rural communities have smaller populations, lower population densities, a smaller tax base, and sometimes lack resources for loan repayments. In addition, rural projects often lack economies of scale, and rural communities frequently lack the capacity and expertise necessary to negotiate complex financing transactions. However, it is possible to overcome these challenges and deliver critically-needed investments for transportation infrastructure to rural areas. Community Facilities Programs, in partnership with capital credit markets, financial consultants, industry experts, and other stakeholders such as Federal, state and local entities, can contribute to building and strengthening rural transportation infrastructure. Community Facilities Programs provide long-term, fixed-rate, low-cost direct loans and loan guarantees for commercial banks to help rural communities finance the development and/or improvement of rural community infrastructure and essential community facilities for public use. Community Facilities Loan Programs can finance more than 100 different facility types, including rural transportation infrastructure such as roads, bridges, airports, inland waterways, port-and railroad-related infrastructure,	[Community Planning and Capacity Building, Economic, Infrastructure Systems]	Deadli identifi	ine not ied.

		00010			
			intermodal terminal facilities, and street improvements.		
			Funding may be used to finance both public and nonprofit		
			rural airports as well as bus and rail infrastructure. This		
			includes facilities and services such as terminals, hangars,		
			runways, parking areas, roadway, curbside, and		
			administrative facilities. Community Facilities Program funds		
			also may be used for infrastructure and space for		
			commercial businesses that are customarily located on or		
			near airport, rail, and bus infrastructure, such as facilities for		
			rental car businesses, mechanical services, and parking		
			operators. For these types of commercial businesses, the		
			facility space must be owned by an eligible applicant and		
			leased to the commercial entity. These types of commercial		
			enterprises are essential to the operation of the underlying		
			facility and not subject to leased space limitations.		
			Public bodies, nonprofit organizations and Federally-		
			recognized Indian Tribes can use program funds to		
			construct, expand or improve rural transportation		
			infrastructure in eligible rural communities with populations		
			of 20,000 or fewer. The project must be located within an		
			eligible rural area and primarily serve and benefit rural		
			residents and communities.		
			Through its Community Facilities Programs, USDA Rural		
			Development facilitates and strengthens Public Private		
			Partnerships (P3) with capital credit markets, financial		
			consultants and industry experts. Our goal is to improve		
			rural America's access to capital for rural community		
			infrastructure, and to leverage resources and expertise to		
			better manage credit risk while fostering development in		
			rural communities. By bringing together financial, project		
			development and technical expertise, resources and		
			innovation through the P3 approach, rural communities can		
			build or repair rural transportation infrastructure quicker and		
			at a lower cost.		
			These investments in critical rural transportation		
			infrastructure can help ensure America's rural communities		
			are repopulating, self-sustaining, and thriving economically.

				(EPA)—is coordinating with the U.S. Department of Agriculture (USDA) to ensure that the four agencies' spending, policies, and programs support rural communities' efforts to be vibrant, thriving places for current and future generations. This guide to HUD, DOT, EPA, and USDA programs highlights federal resources rural communities can use to promote economic competitiveness, protect healthy environments, and enhance quality of life. It provides key information on funding and technical assistance opportunities available from the four agencies, as well as examples of how rural communities across the country have put these programs into action. Each agency offers different ways of approaching infrastructure planning and construction, economic development, pollution cleanup, and other issues that are part of achieving sustainable communities. Coordinating and leveraging multiple funding and assistance sources can help communities advance their overall visions and goals. While this guide is not exhaustive and the programs listed may change, it provides a menu of options rural communities and small towns can consider when planning and implementing projects. The guide is organized by agency and then by broad topic areas that are similar across agencies. For current funding and technical assistance opportunities, as well as the companion <i>Supporting Sustainable Rural Communities</i> publication, visit the Partnership for

			Allocated: \$0	StatsAmerica compiles various economic data. The goal of StatsAmerica is to provide actionable data for economic developers to use in site requests, developing metrics, grant writing and strategic planning. StatsAmerica is a service of the <u>Indiana Business Research</u> <u>Center</u> (IBRC) at Indiana University's Kelley School of Business, which is ranked among the nation's <u>top business</u> <u>schools</u> . With support from the Economic Development Administration, the IBRC developed a unique and useful set of tools and reports, as well as providing access to other EDA-funded projects. The IBRC obtains thousands of data items from hundreds of data sets from dozens of federal and state sources, along with some commercial or private source data. While StatsAmerica adds value to these data through easy access and functionality, the IBRC acknowledges the direct agency source of the data on every table, profile or map. Data will provided in a form of calculations, graphs, comparisons of time or geography, time series and maps. To ensure total accuracy, all data are verified first by analyzing the source data are updated as they are released and arrive from the sources. Stats America Webpage: <u>www.statsamerica.org</u>

The FAST Act funds surface transportation programs—including, but not limited to, Federal-aid highways—at over \$305 billion for fiscal years (FY) 2016 through 2020. It is the first long-term surface transportation authorization enacted in a decade that provides long-term funding certainty for surface transportation. This summary reviews the policies and programs of the FAST Act administered by the Federal Highway Administration (FHWA).The Moving Ahead for Progress in the 21st Century Act (MAP-21), enacted in 2012, included provisions to make the Federal surface transportation more streamlined, performance-based, and multimodal, and to address challenges facing the U.S. transportation system - including improving safety, maintaining infrastructure condition, reducing traffic congestion, improving efficiency of the system and freight movement, protecting the environment, and reducing delays in project delivery. The FAST Act builds on the changes made by MAP-21.Setting the course for transportation investment in highways, the FAST Act:Improves mobility on America's highways; Greates jobs and supports economic growth; and Accelerates project delivery and promotes innovation.The act's five years of predictable formula funding enables transit agencies to better manage long-term assets and address the backlog of state of good repair needs. Mar-17- 2021	International Economic Development	IEDC - Opportunity For All: Strategies for Inclusive Economic Development	Funding not identified.	Explores the issue of how to expand economic opportunity for all.	[Economic]		Deadline not identified.
	Council (IEDC)			Though the U.S. economy has been growing since the Great Recession ended, many people have not experienced the fruits of that growth. In communities across the country, some residents are thriving while others experience declining household incomes, low labor force participation and increasingly concentrated poverty, trends that often have been in place for years. The issue of how to expand economic opportunity for all is one of increasing concern to economic developers. Not only does it impact their ability to grow their regional economics, but they also have an important role to play in potential solutions. This paper explores the issue of economic opportunity from an economic development perspective by presenting evidence of the problem, examining why it matters, and offering common themes and promising practices from nine case studies.

			-			 
				nature and society, when applied inventively and wisely, can		
				lead to a better world for all. The foundation makes grants to		
				support original research and broad-based education		
				related to science, technology, and economic performance;		
				and to improve the quality of American life.		
				Programs include: 1) Public Understanding of Science and		
				Technology: This program focuses on educating the public		
				about science and technology. It includes support for films,		
				television, radio, books, and plays. 2) Education and		
				Careers in Science and Technology: The foundation has		
				long supported students interested in careers in science,		
				technology, engineering, and mathematics (STEM). One		
				area of focus supports research on the factors that affect		
				STEM career choices. The foundation additionally provides		
				fellowship funds to encourage underrepresented minorities		
				to pursue STEM careers. 3) Basic Research: With its Basic		
				Research program area, the foundation expands funds for		
				original, high-quality research in science, technology,		
				engineering, and mathematics. Grants in the Basic		
				Research program area promise to substantively benefit		
				society or significantly add to the body of scientific		
				knowledge. 4) Economic Performance and the Quality of		
				Life: The Alfred P. Sloan Foundation believes that a theory-		
				based, empirically-tested understanding of the U.S.		
				economy is essential to improving the American quality of		
				life. The foundation funds grants for high-quality original		
				research that promise to broaden that understanding or use		
				it to improve American institutions. 5) Select National		
				Issues: The National Issues program area looks for unique		
				opportunities where foundation funds promise to advance a		
				significant national interest, in fields outside of science,		
				education, and economics. 6) Civic Initiatives: With its Civic		
				Initiatives program, the foundation responds to unique		
				opportunities to benefit the New York City metro area in		
				ways that advance the foundation's other interests in		
				science, technology, and economic performance.

				Public transportation provides millions of Americans with		
				daily access to jobs, schools, health care and other		
				essential services. U.S. DOT has found that an estimated		
				40 percent of buses and 23 percent of rail transit assets are		
				in marginal or poor condition, with a backlog of \$98 billion in		
				deferred maintenance and replacement.		
				The State of Good Repair Program is FTA's first stand-alone		
				initiative written into law that is dedicated to repairing and		
				upgrading the nation's rail transit systems along with high-		
	1			intensity motor bus systems that use high-occupancy		

Page 37 This information was exported from MAX-TRAX on Oct-22-2021 by Anne Fuchs(NONFED). Search Criteria: project = RR AND status = Available AND component in (Connecticut, Maine, Massachusetts, National, "New Hampshire", "Rhode Island", Vermont) AND (Deadline >= endOfWeek() OR Deadline is EMPTY) AND issuetype in ("Technical Support Resource", "Financial Resource", "Material Resource", "Information Resource", "Education Resource") AND (description ~ "Economic Support" OR description ~ "Economic Development" OR description ~ "Economic Mobility" OR description ~ "Main Street" OR description ~ "Economic Zone") ORDER BY cf[18801] ASC

vehicle lanes, including bus rapid transit (BRT). These funds
reflect a commitment to ensuring that public transit operates
safely, efficiently, reliably, and sustainably so that
communities can offer balanced transportation choices that
help to improve mobility, reduce congestion, and encourage
economic development. Funds may be used to assist state
and local governmental authorities in financing capital
projects to maintain public transportation systems in a state
of good repair. Eligible projects include the replacement and
rehabilitation of rolling stock, track, line equipment and
structures, signals and communications, power equipment
and substations, passenger stations and terminals, security
equipment and systems, maintenance facilities and
equipment, operational support equipment (including
computer hardware and software), and development and
implementation of a transit asset management plan.
Preventive maintenance is eligible for funding so long as it is
specifically for a fixed guideway system. Funds must be
used for the replacement and/or rehabilitation of existing
high intensity fixed guideway and high intensity motorbus
systems that have been in operation for at least seven
years.
Re-authorized under the 2015 FAST Act, the SGR
Competitive Grants provide funding through a
competitive allocation process to states and
transit agencies to replace, rehabilitate and
purchase buses and related equipment and to
construct bus-related facilities. The competitive
allocation provides funding for major
improvements to bus transit systems that would
not be achievable through formula allocations.
FTA's State of Good Repair Formula Program
grants are distributed to state and local
0
governments in urbanized areas for repairs and
upgrading of rail and bus rapid transit systems
that are at least seven years old.
Helping transit agencies maintain bus and rail
systems in a State of Good Repair (SGR) is one
of FTA's highest priorities. FTA recommends
Transit Asset Management (TAM) practices to
preserve and expand transit investments. Having
well maintained, reliable transit infrastructure –
track, signal systems, bridges, tunnels, vehicles
and stations – will help ensure safe, dependable
and accessible services. Asset Management Pilot
Projects demonstrate solutions to the challenges
faced in the phases of the asset management
cycle, as well as improve the overall asset
management flow and approach.
The TAM webpage is designed to support successful
agency implementation of Transit Asset Management. This

the local government on whose behalf they are
applying.
Cool & Connected – Helps rural communities
use broadband service to revitalize main streets
and promote economic development. Any
community representative can apply.
Governors' Institute on Comunity Design –
Helps governors help their states develop in an
environmentally and economically sound way.
States are eligible to apply.
Greening America's Communities – Helps cities
and towns envision and implement design
strategies for more sustainable communities. The
program currently serves communities in
program currently serves communities in partnership with the EPA Office of Water
Stormwater Management Program. Formerly
called Greening America's Capitals.
Healthy Places for Healthy People – Helps
communities create walkable, healthy,
economically vibrant places by engaging with their
health care facility partners such as community
health centers (including Federally Qualified
Health Centers), nonprofit hospitals, and other
health care facilities. Eligible applicants include
local government representatives, health care
facilities, local health departments, nonprofit
organizations, tribes, and others proposing to
work in a neighborhood, town, or city anywhere in
the United States.
Local Foods, Local Places – Helps communities
develop and implement action plans that promote
local foods and downtown revitalization.
Representatives of communities anywhere in the
United States are eligible to apply. This program
builds on the Livable Communities in Appalachia
Program, which offered technical assistance to
help small towns and rural communities in
Appalachia revitalize their traditional downtowns
to boost the local economy and improve quality of
life.
Recreation Economy for Rural Communities –
Helps communities develop strategies and an
action plan to revitalize their Main Street through
outdoor recreation. Eligible applicants include
local governments, Indian tribes, and nonprofit
institutions and organizations representing any
community in the United States.
Smart Growth Implementation Assistance –
Works with public-sector entities that want to
incorporate smart growth techniques into their
development. As of 2015, EPA's regional staff
