

FEMA

Flood Mitigation Assistance (FMA)

What is FMA?

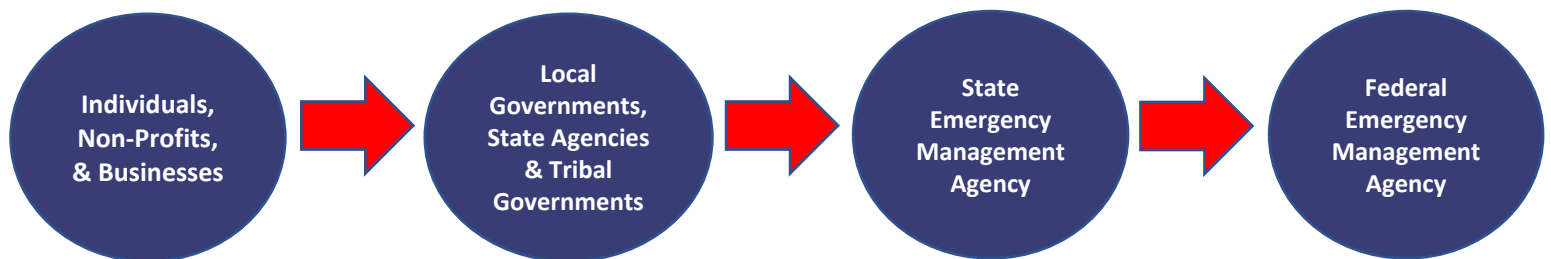

Flood Mitigation Assistance is a nationally competitive grant program that provides funding to states, local communities, federally recognized tribes and territories. Funds can be used for projects that reduce or eliminate the risk of repetitive flood damage to buildings insured by the National Flood Insurance Program (NFIP).

What Can FMA Help Fund?

Project Scoping
Technical Assistance
Community Flood Mitigation Projects
Individual Structure/Property-Level Flood Mitigation Projects
Management Costs
(Projects must have FEMA Benefit Cost Analysis of 1.0 or higher)

Who is Eligible to Apply?

Local Governments, Federally recognized Tribal Governments, and State Agencies who have a FEMA-approved Local Hazard Mitigation (LHMP).

Cost Share Requirements

FMA cost share is 75% federal cost share funding/25% non-federal cost share funding. Economically Disadvantaged Rural Communities (EDRCs) are eligible for 90% federal cost share/10% non-federal cost share. EDRCs are communities of 3,000 or fewer people, identified by the applicant, with residents having an average per capita annual income no more than 80% of the national per capita income, based on the best available data.

FEMA provides 100% federal cost share funding for management costs.

FEMA

Application Timeline

Sub-Application Types

Community Flood Mitigation Projects & Project Scoping

Local Level Drainage/Flood Control including:

Drainage Pipes

Pump Stations

Topographic Grading

Seawalls

Marsh Restoration

Other Nature-Based Solutions

Individual Structure/Property-Level Flood Mitigation Projects & Project Scoping

Individual flood mitigation projects are those that mitigate the risk of flooding to individual NFIP-insured structures. Projects include:

Acquisition

Acquisition Relocation

Relocation

Elevation

Mitigation Reconstruction

Dry Flood-Proofing of Historical
