MAINE CYBERSECURITY

The Office of Information Technology, in partnership with the Maine Emergency Management Agency, is leading an initiative to conduct a statewide cybersecurity assessment, develop a statewide cybersecurity plan, and create resources to educate stakeholders on the plan's implementation. This project is funded through the Department of Homeland Security's State and Local Cybersecurity Grant Program and supported by Tidal Basin Government Consulting.

Project Objectives

- 1. Develop and establish appropriate governance structures to improve capabilities to respond to cybersecurity incidents and ensure continuity of operations
- 2. Understand their current cybersecurity posture and areas for improvement
- 3. Implement security protections commensurate with risk
- 4.Ensure organization personnel are appropriately trained in cybersecurity

The goal of this project is to support Maine in its pursuit to become a ready and resilient state against current and future cybersecurity threats.

Plan of Action

Project success requires input from statewide partners, including state agencies, counties, municipalities and school districts. These partners will be contacted directly with specific information requests to inform the assessment and plan and to identify opportunities for future investments and resource development.

Project Team

The Project Team includes a cross-section of rural and suburban representatives from the following disciplines:

- State, county, and local governments
- Public education
- \cdot Public health
- Public safety

- Emergency communications
- \cdot Election infrastructure
- The judicial system
- Public critical infrastructure
- National Guard
