2025 High School Maine Integrated Youth Health Survey

This survey is about your health behavior and things that affect it. It will tell us what you and other students do that may affect your health. About 95,000 students in Maine are being asked to take this survey. The answers you give will be used to create better health education and programs for young people like yourself.

DO NOT write your name on this survey. The answers you give will be kept private. No one will know what you write. Answer the questions based on what you really do.

You may choose to take the survey or not take it. Your choice will not affect your grade in this class. There is some risk that some questions may make you feel uncomfortable. If you are not comfortable answering a question, just leave it blank. You can stop answering questions at any time you want. There is no penalty for not completing the survey. It should not take you longer than this class period.

The benefit to you in taking this survey is that your school and community may be better able to create programs that help you stay healthy.

Some questions ask about your background such as your race, age and gender. These will be used only to describe the types of students completing the survey. No answers will be used to find out your name. No names will ever be reported. The survey is research. This means that we will use your answers to help us learn about Maine students in general.

Be sure to read every question. Fill in the ovals completely. When you are finished, follow the instructions of your teacher.

If you have questions about the survey, your teacher will have contact names for someone to e-mail or call.

THANK YOU very much for your help.
