

2023 Maine Integrated Youth Health Survey (MIYHS)

Methodological Summary – All Surveys

~ Fifth and Sixth Grade ~

~ Middle School (7th and 8th Grades) ~

~ High School (9th through 12th Grades) ~

~ A survey of the health of Maine's youth ~

Reporting on the prevalence of various health behaviors
among Maine students in
Fifth and Sixth Grade; Seventh and Eighth Grade; and
Ninth through Twelfth Grade

Prepared for

The Maine Department of Education and the Maine Department of Health and Human Services

Acknowledgements

The MIYHS Team involved in this project would like to extend many thanks to the principals and superintendents who chose to participate in the 2023 MIYHS, and to the teachers and school staff who supported the effort. Most importantly, we would like to thank the students and parents who took the time and effort to share their experiences with us. This report, along with the results report that can be found at the MIYHS website (<https://www.maine.gov/miyhs/2023-results>), is our way of thanking all of you. We hope you find the information contained in this report insightful and useful.

The development and implementation of the 2023 Maine Integrated Youth Health Survey (MIYHS) was a collaborative effort between the Maine Department of Education and the Maine Department of Health and Human Services. Pan Atlantic Research of Portland, Maine administered the 2023 MIYHS and compiled the results. Technical services (including sampling, weighting, and automated report generation) were provided by ICF International's survey research group based in Burlington, Vermont.

2023 MIYHS METHODOLOGY

Methodology

A. Introduction

This report describes the methods used to conduct the 2023 Maine Integrated Youth Health Survey (MIYHS).

In 2009, the Maine Integrated Youth Health Survey (MIYHS) was constructed to improve data quality, better utilize resources, and reduce survey-related burdens on Maine schools. By collaborating and bringing together multiple youth-related surveys (Youth Risk Behavior Survey (YRBS), Maine Youth Drug and Alcohol Use Survey (MYDAUS), Youth Tobacco Survey (YTS), Search Institute’s Developmental Assets Profile, Maine Child Health Survey, Monitoring the Future Survey (MTF), other states’ student health surveys, and other national surveys) into one comprehensive survey, we are able to lessen the burden on schools posed by multiple survey requests while providing local and state-level data on a broad range of health topics concerning youth. The survey was administered for the eighth time in January, 2023.

B. Overall Survey Design

The MIYHS is composed of three surveys: a 5/6 survey of students in grades 5 and 6, a middle school (MS) survey of students in grades 7 and 8, and a high school (HS) survey of students in grades 9, 10, 11 and 12. The MS and HS surveys are further broken down into four versions each (Version A, Version B, Version C, and Version D). The 2023 MIYHS survey instruments were modified slightly from those used in 2021. The 2023 survey instruments can be found online at: <https://www.maine.gov/miyhs/2023-survey-information>; the survey questions can be found in the codebooks in Appendix A of this report.

For the purpose of the MIYHS project, the term “module” refers to the separate 5/6 student data collection, the entire grade 7-8 middle school student survey, and the entire grade 9-12 high school student survey. The term “version” distinguishes data coming from the A, B, C, and D questionnaires for the middle and high school modules.

A census (i.e., all schools were invited to participate) was taken at the middle and high school grades to support estimates at the county level and a sample of schools designed to support estimates at the Public Health District (PHD) level was drawn for grades five and six.

Following the 5/6 sampling, schools were contacted to initiate the data collection process. Occasionally during this process, it was determined that some schools were no longer eligible to take the survey – most often through a re-configuration of grades, but sometimes due to school closings (see next two sections for more information on the sampling methodology).

Methodology

Some schools with students in grades 5 and/or 6 were not selected as part of the 5/6 sample, but chose to participate in the survey to receive data for their school; these schools are referred to as “volunteer” schools. Table 1 lists the total number of schools in the sampling frame by survey level (“Frame Count”), the number of schools that were sampled (“Sampled”) and the number that opted to participate (“Responding”).

Survey	Frame Count	Sampled	Responding
5/6	326	157	63 (110*)
MS	196	196	120
HS	136	136	102
Total	658	489	285
*Responding including "volunteer" schools			

Both the middle school and high school surveys were organized into four versions each in order to collect data on a broad array of topics while keeping the number of questions on the survey reasonable for both the students and schools. Four data collection instruments (Version A, Version B, Version C, and Version D) were developed for both the MS and HS surveys, with questions appearing on one or more versions.

The 2023 MIYHS consisted of three modules and nine distinct survey versions:

- 5/6 survey module:
 - ✓ 47 questions on one survey version.
 - ✓ Sampling of schools provided public health district- and state-level data.
 - ✓ Schools could voluntarily participate if they were not selected as part of the sample.

Methodology

- Middle school survey module:
 - ✓ All middle schools were invited to participate.
 - ✓ Four versions of the survey (Version A, Version B, Version C, Version D) were used.
 - ✓ 44 core questions were included in all four versions of the survey and provided data at all geographic levels (state, public health district, and county, SAU/district, and school).
 - ✓ 54 questions were on two versions of the survey and provided county-, public health district-, and state-level data.
 - ✓ 36 questions were on only one version of the survey (version A, B, C, or D) and provided state-level data only.
 - ✓ Version C of the survey satisfied the requirements of the U.S. CDC to be included as part of 2023 Youth Risk Behavior Survey (YRBS).

- High school survey module:
 - ✓ All high schools were invited to participate.
 - ✓ Four versions of the survey (Version A, Version B, Version C, Version D) were used.
 - ✓ 56 core questions were included in all four versions of the survey and provided data at all geographic levels (state, public health district, and county, SAU/district, and school).
 - ✓ 77 questions were on two versions of the survey and provided county-, public health district-, and state-level data.
 - ✓ 52 questions were on only one version of the survey (version A, B, C, or D) and provided state-level data only.
 - ✓ Version C of the survey satisfied the requirements of the U.S. CDC to be included as part of the 2023 YRBS.

Methodology

C. Sampling Frame Construction

The sampling frames for the 2023 MIYHS consisted of all Maine’s public schools and quasi-public schools (private schools with at least 60% publicly funded students) with any of the following grades: (1) fifth/sixth grade (5/6); (2) seventh/eighth grade (MS); and (3) ninth through twelfth grade (HS). However, small schools – those with fewer than 10 students in the grades covered by the survey level(s) in question – were excluded from the frame. In addition, a small number of schools were flagged as “special” situation schools and were excluded from the sampling; “special” situation schools included alternative education schools and youth development centers.

The information for the sampling frame was obtained from the Maine Department of Education (DOE) using enrollment data as of April 1, 2022. The DOE data file included data on county, school district, and enrollment by grade. Table 2 summarizes the MIYHS sampling frame.

Survey Module	Eligible Grades	Schools On File	Small Schools	Eligible Schools
5/6	Fifth, Sixth	355	29	326
MS	Seventh, Eighth	209	13	200
HS	Ninth, Tenth, Eleventh, Twelfth	136	0	135
All Schools*		577*	30*	547*

** Note: Totals by survey don’t sum to the “All Schools” row because many schools span multiple surveys.*

Schools in the frame contained a total eligible enrollment of 107,006 students. Less than 1% of students in all eligible grades were excluded due to dropping small schools.

D. Sampling Process

Fifth and Sixth Grade Sample:

The fifth and sixth grade sample (5/6) consisted of a simple random sample of schools stratified by Public Health District. The sample was drawn to yield approximately the same precision -- a margin of error of ± 5 percentage points at the 95% confidence level -- within each PHD. The number of schools selected for the sample varied by PHD depending on total student enrollment and average number of students per school. The sample sizes were designed to support estimates by State and Public Health District, as well as school and school district level analyses. Table 4 lists the 5/6 sample information by Public Health District.

Methodology

Table 4 – 5/6 Sample by Public Health District			
Public Health District	Eligible Enrollment	Eligible Schools	Drawn Schools
Aroostook	1,220	20	20
Central	3,077	43	19
Cumberland	5,325	49	14
Downeast	1,501	43	38
Midcoast	2,550	53	26
Penquis	3,142	39	15
Western	4,140	48	14
York	3,800	31	11
Total	26,899	326	157

Schools with grades 5 and/or 6 not selected as part of the 5/6 sample were also invited to participate in the MIYHS as a “volunteer school.” There were 36 “volunteer schools” in the 5/6 module of the 2023 MIYHS. These schools are included in the full dataset; however, data from these schools were treated slightly differently in the weighting process, as described in Section L of this report.

Middle School Sample (Grades 7-8):

All eligible middle schools were asked to participate in the survey. The questionnaire was divided into four “versions” or different survey instruments, labeled A, B, C and D. Each question, or survey item, was placed on one, two, or all four versions (see Appendix A for more information on which questions were included in which version).

Each school was randomly assigned to either version pair AC or version pair BD. The assignment was made independently within county, so that roughly equal numbers of schools in each county would be assigned to each version pair. While version assignments were not done proportional to size, schools were sorted by school enrollment before the assignments were made (in an alternating fashion); this ensured an even distribution of versions across schools of differing sizes.

Alternate classes within each participating school were assigned one version or the other from the pair. If the class list provided by a school to Pan Atlantic contained classes with mixed grades (for example, 7th grade students and 8th grade students being together in the same classroom at the time of the survey administration), version assignment was conducted at random. If the class list supplied separated students by grade (for example, grade-based English classes meaning that 7th and 8th grade students would be in separate classrooms during survey administration), the assignments were done to ensure as much

Methodology

representation by grade within each version as possible. So, for example, in a middle school assigned to version BD, one-half of the classes in each of grade seven and grade eight would be assigned the version B questionnaire, and the other half would be assigned to the version D questionnaire.

Table 5 displays the MS sample information by county.

County	AC Version Assignment		BD Version Assignment	
	Eligible Enrollment	Schools	Eligible Enrollment	Schools
Androscoggin	1,218	4	1,149	3
Aroostook	497	8	810	8
Cumberland	2,684	10	2,998	11
Franklin	399	3	304	4
Hancock	495	11	450	11
Kennebec	1,161	7	1,154	7
Knox	294	3	264	3
Lincoln	202	4	523	5
Oxford	832	4	479	3
Penobscot	1,228	12	1,714	12
Piscataquis	242	2	122	2
Sagadahoc	448	2	295	2
Somerset	304	6	813	5
Waldo	479	4	224	4
Washington	214	11	417	10
York	1,961	8	2,238	7
Total	12,658	99	13,954	97

The distribution of questions on the versions of the survey was designed to support analysis at a variety of levels, depending on the number of versions on which a particular question appears. Questions appearing on just one version support analysis at the state level only; questions appearing on two versions support analysis on the state, PHD, and county levels; and questions appearing on all four versions support analysis on the state, PHD, county, school district, and school levels.

High School Sample (Grades 9-12):

All eligible high schools were asked to participate in the survey. As with the MS survey, the questionnaire was divided into four “versions”, with each school assigned to either version pair AC or version pair BD. The assignment was made independently within county, so that roughly equal numbers of schools in each county would be assigned to each version pair. Prior to assignment, schools were sorted by enrollment.

Methodology

The procedure of assigning versions within each school followed the same process as was used for the MS survey.

Table 6 lists the HS sample information by county.

Table 6 – HS Sample by County				
	AC Version Assignment		BD Version Assignment	
County	Eligible Enrollment	Schools	Eligible Enrollment	Schools
Androscoggin	1,744	3	2,675	3
Aroostook	1,342	8	1,305	7
Cumberland	8,012	12	5,083	8
Franklin	614	2	779	2
Hancock	493	3	1,595	4
Kennebec	2,090	6	2,954	6
Knox	712	2	560	2
Lincoln	328	2	1,108	2
Oxford	2,164	5	654	2
Penobscot	2,619	8	4,012	8
Piscataquis	503	2	245	2
Sagadahoc	621	1	868	2
Somerset	1,150	4	1,227	5
Waldo	858	3	198	3
Washington	319	4	919	4
York	4,819	6	2,863	5
Total	28,388	71	27,045	65

Following the same process as the MS survey, the distribution of questions on the versions of the HS survey was designed to support analysis at a variety of levels, depending on the number of versions a particular question appeared. Questions appearing on just one version support analysis at the state level only; questions appearing on two versions support analysis on the state, PHD, and county levels; and questions appearing on all four versions support analysis on the state, PHD, county, school district, and school levels.

E. Survey Questions

Stakeholders from both state agencies and partner agencies with a specific interest or expertise in various subject areas were consulted in the review of questions. Question revision was based on updated YRBS standard questions and includes program and funding priorities and proposed uses of the data. The survey

Methodology

questions included in the three modules (5/6, MS and HS) of the 2023 MIYHS are found in the codebooks in Appendix A.

F. School Recruitment Procedures

To maximize school participation, numerous communications were sent to the schools selected to participate in the 2023 MIYHS, including emails, postcards, announcements, and recruitment packets. See Appendix B for implementation documentation including administration handbooks.

In addition to these communications, the staff at Pan Atlantic Research had intensive contact with superintendents and principals (via phone and e-mail) to secure participation over a four-month period. In some areas, staff of local Maine Prevention Services vendors, local Drug Free Community Grantees, and/or staff of the Maine CDC (as appropriate) contacted principals and/or superintendents to encourage participation.

Principals who wanted their school to participate in the survey enrolled online with Pan Atlantic Research. The staff at Pan Atlantic Research then contacted each participating school to coordinate participation in the survey.

G. Consent

Passive consent was used for the 2023 MIYHS. To obtain passive consent, participating schools were required to send an informational letter to parents via e-mail or, for those parents without an email address on record with the school, via U.S. Mail. Principals were asked to complete and return a form confirming the distribution of the parent consent letters to the Maine CDC. Schools were reimbursed for any postage costs they incurred if they had to send the parent consent letters via U.S. Mail, instead of e-mail. There were three different versions of the parent consent letter, as follows:

1. Parent consent letter for schools - 5th grade and up,
2. Parent consent letter for schools - 6th grade and up, and
3. Parent consent letter for schools - 7th grade and up.

Principals were informed that the parent letters were translated into several languages (Acholi, Arabic, Chinese, French, Khmer, Kinyarwanda, Lingala, Portuguese, Russian, Somali, Spanish, Swahili, and Vietnamese) and would be made available upon request. The letter explained that the survey was

Methodology

anonymous, participation was voluntary, and results would only be presented in group-summary form. The letter informed parents that a copy of the survey instrument was on file at their child's schools if they wished to review it; the survey instruments for parental review were also available online. Parents who wished to decline their child's participation were asked to notify the school. Schools were told not to survey any student whose parent letter was returned undeliverable or if the student's parent declined their participation in the survey. Students whose parents did not give them permission to participate in the survey and/or did not themselves wish to participate in the survey completed an alternate activity during survey administration or sat quietly at their desk.

H. Data Collection

Participating schools in the 5/6, MS, and HS surveys were asked to administer the survey during a day and a class period that all students were required to attend (e.g., English). School staff members were provided with training handbooks containing information on how to administer the survey. Designated survey contact persons (one from each school) were asked to complete and pass a training review to ensure understanding of the survey protocol and to alert Pan Atlantic to any questions or concerns prior to administering the survey.

Survey administrators were given a script to read to the students and consent information was included on the front of the questionnaire. Students were told that they could opt out of the survey or skip any questions they did not want to answer. Schools participating in the 5/6, MS, and HS MIYHS were told to administer the survey during the survey period of January and February 2023. Schools were asked to hold make-up sessions for students absent at the time of the initial administration.

Pan Atlantic Research implemented an online survey administration option in 2023 for the first time to middle and high schools that were selected for the B/D version pair. Voxco (voxco.com) survey software provides robust functionality and data security that ensures the highest level of privacy and confidentiality for participants. The online option made survey administration easier for schools, reduced the impact on the environment, and reduced scanning and data cleansing time dramatically. Details of the online administration can be found in the Handbook Addendum for Online Administration found in the Appendix.

Methodology

I. Anonymity & Confidentiality

Precautions were taken to protect the confidentiality and anonymity of all students participating in the MIYHS. The MIYHS does not ask for or collect students' names, dates of birth, email address, IP addresses, or location. During the administration of the grades 5-12 surveys, teachers monitoring the survey were asked to remain seated at the front of the class. At the end of the survey period, students were asked to insert their completed questionnaires in a large envelope as it was passed around the room, and the last student sealed the envelope before handing it back to the teacher / moderator. Students who participated using online survey were shown one question at a time on the screen to enhance confidentiality and once completed they just had to select submit.

As is detailed further in Section M (Estimation and Reporting), additional measures were taken to safeguard students' anonymity during the data reporting aspect of the MIYHS project.

J. Data Preparation

After the completed questionnaires were returned to Pan Atlantic Research offices in Portland, Maine, the surveys were organized, tallied, scanned, and added to the online data collected through the Voxco online survey tool. The scanning process is a months-long, painstaking process of ensuring that thousands of surveys with marks on a page are properly translated into accurate data files. As surveys were processed and in addition to machine checks in later steps, PAR staff manually checked surveys and data files throughout the process for proper counts, marks, and anomalies to ensure accuracy. Raw data files were then provided to ICF International (PAR subcontractor) by PAR; at this point, ICF International completed the data preparation phase of the project by reformatting and checking the data and running logic checks.

Questionnaires were scanned into tables in Excel and each question was assigned a variable name that allows for the same question to be easily analyzed over time. While the online survey versions were able to control input selections by offering only valid responses, the paper scanning process coded items where the student filled in multiple responses on the answer form as a “*”. This was coded to a missing value during the reformatting process. Blank responses were also coded to a missing value. Responses that were outside of the range of valid choices (e.g., “E” was selected for a variable that only had “A” to “D” answer choices) were also set to missing.

A set of rules for ensuring consistency across responses was developed based on the editing protocol used by the U.S. CDC for the YRBS; the actual editing rules were adapted to the specific needs of the MIYHS project (see Appendix C for the data editing protocol employed in the 2023 MIYHS). These rules compared responses to more than one item. If an inconsistency was found, all of the items involved (with the exception of demographic variables) were set to missing. For example, if an adolescent reported that s/he did not smoke cigarettes in one question, but responses to other questions about smoking were not consistent with the first smoking question, responses to the inconsistent smoking-related questions were set to missing.

As a final step, entire data records were subverted – or excluded from the weighted public use file – if the number of valid responses was 20 or fewer for an entire questionnaire. This is consistent with U.S. CDC methodology for the YRBS. Table 8 below lists the subverted records by survey.

Table 8 - Subverted Records by Survey		
Survey Module	Subverted Data Records	Non-Subverted Data Records
5/6	34	7,778
MS	50	15,222
HS	145	29,770
Total	229	52,777

K. Response Rates

The response rates by public health district and county, as well as the response rates for each module and version combination for the middle school and high school survey, can be found in Appendix D.

L. Weighting

Weighting is used to make the resulting data more representative of the total population of interest (all students in those grades in that geographic area or school), not just a reflection of those who took the survey. Weights were calculated for the 5/6, MS, and HS surveys.

L1. Base Weights

Base weights were calculated for each school and version as the inverse of the selection probability for the school/version combination.

Schools that were not sampled but provided data (“volunteer” schools) were given a base weight of 1.0. In other words, they were weighted to be self-representing.

For the 5/6 survey, the selection probabilities were obtained directly from the output of the SAS sampling programs. Table 9 shows that the weight calculation was simply:

Table 9 – Base Weight Calculation
$base_wt = 1 / (selectionprob)$

For the MS and HS surveys, all eligible schools were selected to take the survey. Therefore, at the school level, these all received an initial base weight of 1.0. However, the base weights of schools that participated in the HS and MS surveys were also designed to reflect the probability of assignment to specific versions.

Methodology

Version assignment probabilities were computed from counts obtained by summarizing the response data. For school version probabilities, the ratio of schools assigned each version pair to the overall number of schools within counties was used. For class versions (that is, the version or survey actually assigned to a class) the ratio of class versions to all classes within the school was used. Version assignment probabilities are given in Table 10, where n represents the count of responding schools by version and county, and c represents the count of classes with a given school. Overall probability of each version assignment was found by multiplying the school probability for that version by the class probability for that version.

Table 10 – Version Assignment Probabilities
<p>S_mod_p= school version probability: n=number of schools</p> $s_mod_p_{AC} = n_{AC, county} / n_{county}$ $s_mod_p_{BD} = n_{BD, county} / n_{county}$ <p>c_mod_p=class version assignment probability c=number of classes per school</p> $c_mod_p_A = c_{a,ac\ school, county} / C_{ac\ school, county}$ $c_mod_p_C = c_{c,ac\ school, county} / C_{ac\ school, county}$ $c_mod_p_B = c_{b,bd\ school, county} / C_{bd\ school, county}$ $c_mod_p_D = c_{d,bd\ school, county} / C_{bd\ school, county}$ <p>mod_p=probability of version assignment</p> $mod_p_A = s_mod_p_{AC} * c_mod_p_A$ $mod_p_B = s_mod_p_{BD} * c_mod_p_B$ $mod_p_C = s_mod_p_{AC} * c_mod_p_C$ $mod_p_D = s_mod_p_{BD} * c_mod_p_D$

The assignment probabilities of each version were inverted to obtain a stage weight for the school and class within school version assignment process. The base weights for high schools and middle schools were then computed as the inverse of the product of these stage weights, as shown in Table 11:

Table 11 – Version Base Weight Calculations	
$base_wt_M = 1 / mod_p_M, M \in (A, B, C, D)$	

Finally, the base weights were merged onto the response data file. Table 12 presents summary statistics for the resulting base weights by survey and version.

Table 12 – Base Weight Summary by Survey and Version					
		Base Weight			
Survey	Class Version	Min.	Mean	Max.	C.V.
5/6	X	1.00	1.83	3.50	52.32
MS	A	1.67	3.54	6.00	23.81
	B	1.50	4.11	14.00	29.53
	C	2.00	3.71	12.75	30.21
	D	2.50	4.22	14.00	27.11
HS	A	2.45	3.67	14.00	25.77
	B	2.17	4.24	7.30	24.83
	C	2.67	3.79	14.00	28.66
	D	2.00	4.33	9.33	24.27

L2. Poststratification

Poststratification, or the adjustment of weights so that weighted counts match known reference figures, serves to ensure that the weighted student distribution matches that of the population in terms of demographic characteristics such as grade, gender and race. In doing so, the poststratification adjustment compensates for non-response at both the student and school levels.

The MIYHS uses a ratio adjustment for poststratification. Adjustment classes are created by the cross-tabulation of grade, gender, race/ethnicity and analysis level (e.g., state, county, public health district, school). For each adjustment class, the base weights are multiplied by the ratio of the actual population count in that class (e.g., number of girls in 7th grade) to the weighted estimate, or sum of the weights.

Methodology

Prior to assigning student data records to adjustment classes, the demographic variables used to define these classes were imputed. This procedure assigns a value for grade, gender or race/ethnicity for cases where the student did not provide this data. Imputation was performed using a “hot-deck” method, in which the value assigned to the missing variable was drawn randomly from the empirical distribution formed from the non-missing data. The imputed values were used in the post-stratification but were not kept on the data file, thus the analysis of these variables will reflect the missing values present in the original response data, and weighted totals may not necessarily match actual population counts exactly.

Table 13 shows the imputation counts for poststratification adjustments. Each row represents the variables that were imputed. For example, the first row for each module shows the number and percent of surveys that were not imputed. The second row shows the number of times race/ethnicity was imputed and the percentage of surveys that it represents. For the 5/6 survey, 1,264 surveys had only race and ethnicity imputed and 68 had both sex and race and ethnicity imputed.

Module	Grade	Sex	Race/Ethnicity	Case Count	Percentage of cases*
5/6	Not Imputed	Not Imputed	Not Imputed	6,316	81.20
	Not Imputed	Not Imputed	Imputed	1,264	16.25
	Not Imputed	Imputed	Not Imputed	98	1.26
	Not Imputed	Imputed	Imputed	68	0.87
	Imputed	Not Imputed	Not Imputed	17	0.22
	Imputed	Not Imputed	Imputed	6	0.08
	Imputed	Imputed	Not Imputed	4	0.05
	Imputed	Imputed	Imputed	5	0.06
MS	Not Imputed	Not Imputed	Not Imputed	14,008	92.02
	Not Imputed	Not Imputed	Imputed	895	5.88
	Not Imputed	Imputed	Not Imputed	162	1.06
	Not Imputed	Imputed	Imputed	37	0.24
	Imputed	Not Imputed	Not Imputed	89	0.59
	Imputed	Not Imputed	Imputed	13	0.09

* Within survey

Though the ratio adjustment itself is simple to calculate, the construction of the poststratification adjustments for the MIYHS is complicated in terms of the construction of the adjustment classes. The computation of the adjustment itself is given in Table 14, where enrollment is the student counts for Maine schools supplied by the State Department of Education and base_wt is the base weight computed above.

Table 14 – Ratio Adjustment for Poststratification
$\text{CLASS} = \frac{\text{Sum}(\text{enrollment} \in \text{adjustment class})}{\text{Sum}(\text{base_wt} \in \text{adjustment class})}$

For all surveys, adjustment classes were defined at the school and district (SAU) level in terms of grade, gender and race/ethnicity. Here, within each district and SAU, grade categories were formed from the grades considered by the survey. Race/ethnicity was collapsed to two categories, White and Non-white where there were sufficient non-white students to support a ratio adjustment, and one overall category where there were not.

In addition, for each survey, an additional set of adjustments was made to generate weights suitable for the other levels of analysis supported by the survey. These were:

- 5/6 – State, Public Health District (PHD), School
- MS – State, PHD, County, School
- HS – State, PHD, County, School

Layered into this framework for the middle school and high school surveys were the survey versions (A, B, C, and D). The fact that different sets of questions appeared on each version means that the number of responses, and therefore the weighted total input into the ratio adjustment vary depending on which version(s) the question appeared on. As a result, separate adjustments were computed for each valid combination of versions that could be analyzed at any given geographic level.

Appendix E presents a summary of the poststratification adjustments for the state, PHD, and county analysis levels. For each survey and grade the 5th, 50th, and 95th percentile of the ratio adjustments corresponding to the equation are given.

L3. Assignment to Response Data

As a final step, the weights were combined with the edited response data, producing one analytic file for each survey. Each data record contains multiple weight variables. The appropriate weight variable for any

Methodology

given analysis is chosen based on the versions (for HS and MS) on which the question appeared, and the analysis level. Table 15 shows the weight key, which is used to guide this selection.

Table 15 - Weight Selection Key						
Survey	Module	Analysis Level				
		School	District (SAU)	County	PHD (Public Health District)	State
HS – High School (9, 10, 11 & 12)						
	A					wstaa
	B					wstab
	C					wstac
	D					wstad
	AB			wctyab	wphdab	wstaab
	CD			wctycd	wphdcd	wstacd
	ABCD	wschabcd	wsauabcd	wctyabcd	wphdabcd	wstaabcd
MS – Middle School (7 & 8)						
	A					wstaa
	B					wstab
	C					wstac
	D					wstad
	AB			wctyab	wphdab	wstaab
	CD			wctycd	wphdcd	wstacd
	ABCD	wschabcd	wsauabcd	wctyabcd	wphdabcd	wstaabcd
5/6 – Elementary (5 & 6)						
	ALL	wsch			wphd	wsta

When conducting an ‘ad hoc’ analysis of two or more schools whereby the use of an SAU weight is unsuitable, one should use the school weight for the analysis; this should only be done, however, if the school response level for each individual school warrants this type of analysis.

M. Estimation & Reporting

M1. Design Variables

Sampling variances for complex sampling designs such as the one used in the 2023 MIYHS can be estimated using one of several methods, including linearized estimators and balanced repeated replication. These methods may be implemented with a variety of software packages, including SUDAAN and WesVar, and with Stata and SAS using special sample survey procedures¹. The 2023 MIYHS data were prepared for estimating variances using the method of linearized estimators.

In using these methods, it is necessary to inform the software about certain features of the sampling design, specifically, the stratification scheme, and how the sampled students were clustered at the first stage of sampling. The variables holding this information are often referred to as “design variables.”

For all analysis levels above the school –District, County, Public Health District and State – stratum codes were created to reflect the county or public health district used to either stratify the school sample (5/6 module) or the version assignment (MS and HS modules). At this level the school serves as primary sampling unit (PSU), and so the school code is used as the basis for the clustering variable. Stratum (Table 16) and cluster (Table 17) codes are shown below:

¹ More information can be found at: https://www.cdc.gov/yrbs/media/pdf/2023/2023_YRBS_analysis_software.pdf

5/6 – Elementary (5 & 6)						
	ALL	psu_school	psu_otschool	psu_otschool	psu_otschool	psu_otschool

An example of the use of these variables in SAS Proc Survey Freq is given in Table 18.

Table 18 – SAS Code Example Non-school Analysis Design Variables
<pre>** state level analysis at MS level ; Proc SurveyFreq data = gd.allmswt; Tables m147; Weight wstaabcd; * state level, question on all versions; Strata str_otschool; Cluster psu_otschool; Run;</pre>

The design variables for the SAU/District analyses for the HS and MS versions is adjusted somewhat – here, variable `psu_otschool` is used for the stratification variable, and `psu_school` is used for the cluster variable. This has the effect of treating the school as a stratification variable, nested within the county stratification. Also, the class, which had previously been considered a secondary sampling unit, becomes the primary sampling unit. While the nomenclature seems odd, this does reflect the sample design, and avoids strata containing only one PSU, which prevent the variance calculation.

At the school level, grade is treated as the sampling stratum, as classes were selected independently within grades in the school. Following this logic, the class is the primary sampling unit for the students and so the class code forms the basis of the clustering variable. An example of the use of these variables for producing estimates at the school level is given in Table 19.

Table 19 – SAS Code Example School Analysis Design Variables
<pre>* A high school ; Proc SurveyFreq data = gd.allhswt; Tables h84; Where (pacid = 293); Weight wschabcd; * school level, question all versions; Strata str_school; Cluster psu_school; Run</pre>

M2. Reporting Rules

Reporting rules were put in place to ensure that only entities with sufficient, representative (weighted) data were reported. The various reporting rules are listed below:

School Reports (Grades 5-12):

- School must have at least 20 participating students (unweighted) in the final data set (within a given survey module). Schools with less than 20 participants do not receive a school-level data report to protect the privacy and confidentiality of students.
- Student response rate within a school must be at least 50%, i.e., at least 50% of students within the school must have completed a survey.

School District Reports (Grades 5-12):

- School District must have at least 20 participating students (unweighted) in the final data set (within a given survey module). School Districts with less than 20 participants do not receive a School District report to protect the privacy and confidentiality of students.
- The overall response rate (equivalent to the school response rate in the School district multiplied by the average student response rate within the participating school) must be at least 50%.

County Reports:

- The overall response rate (equivalent to the school response rate in each county multiplied by the average student response rate within the participating schools) must be at least 50%; if the response rate is less than 50%, that county's data will be assessed by the MIYHS team for representativeness.

PHD Reports:

- The overall response rate (equivalent to the school response rate in each PHD multiplied by the average student response rate within the participating schools) must be at least 50%; if the response rate is less than 50%, the PHD data will be assessed by the MIYHS team for representativeness.

State Reports:

- The overall response rate (equivalent to the school response rate multiplied by the average student response rate within the participating schools) must be at least 50%.

Methodology

M3. Reports

Two different report types were generated for the 2023 MIYHS – “comparison and trend reports” and “detailed reports.” While many questions on the MIYHS offered a range of answers, all data in the two report types are based on a predetermined “answer of interest.” One or more of the possible answers were selected for the reporting. In some cases, certain answers (including missing answers) were eliminated from the calculation. For more detail, please see the combined codebooks in Appendix A for these calculations. Tables 20, 21, and 22 below list the content of each of the two report types for the 5/6 and MS & HS modules, respectively.

M4. Suppression Rules in Reports

Suppression rules were put in place to prevent the display of estimates that could inadvertently disclose the identity or characteristic of a student responding to the survey. These suppression rules are based on the Maine CDC’s privacy policy. For reporting purposes, two types of suppression rules were defined:

- “Straight Suppression”
 - All cells where the numerator (using weighted data values) was less than 5.5 were suppressed.
 - All cells where the numerator (using weighted data values) was greater than

Methodology

equivalent of the denominator minus 5.5 were suppressed.

- “Complementary Suppression”
 - When a cell is suppressed due to straight suppression, there must be at least one other cell – both vertically and horizontally – that is also suppressed so that the naturally suppressed information cannot be figured out with back-calculations.

Based on Maine CDC suppression guidelines, straight suppression and complementary suppression must be enforced when the underlying population of a demographic subgroup on the county level or smaller includes fewer than 5,000 individuals.

Specifically, suppression rules were applied to the 2023 MIYHS reports in the following manner:

Local Reports:

- Straight suppression was enforced.
- Estimates in the local reports are not broken down by demographic characteristics, so complementary suppression was not necessary to maintain participant confidentiality.

Detailed Reports:

- Straight suppression was enforced for all reports at the 5/6, MS, and HS survey levels. In addition, for PHD and County reports, cells for race/ethnicity within gender were automatically suppressed due to small cell sizes and the need for extensive suppression across cells. Complementary suppression was enforced for the remaining cells.

It is important to note that suppression within MIYHS tables and reports is for the purpose of protecting individual privacy; it does not take data reliability into consideration. Estimates based on small numbers can be unreliable; they may fluctuate over time or they may not accurately reflect the population being measured. It is important that users consider the size of the confidence interval as a reflection of an estimate’s reliability when presenting MIYHS data.

N. Data Files

The labels and values for each of the variables included in the four survey data files can be found in the combined codebooks in Appendix A.

O. Limitations

The MIYHS is limited due to its exclusive focus on youth *in public and quasi-public schools*. With such a focus, some subpopulations – such as school dropouts, students with high rates of absenteeism, home-schooled students, homeless youth, and runaway youth – will be missed or underrepresented. Also of note, some schools with very small enrollments (such as those found on Maine’s islands and/or in very rural areas) may be underrepresented due to enrollment-based sampling exclusions.

Because of the anonymous nature of the questionnaire and the difficulty in translating questions into multiple languages, students with very limited English language proficiency may be underrepresented. In addition, to maintain both confidentiality and consistency in the interpretation of questions, teachers were instructed to not provide additional explanation of questions, or assist with answering, so students with reading abilities below that of the survey, or with cognitive or physical disabilities may have not completed the survey and, therefore, may be underrepresented also.

Self-report data may be prone to bias due to forgetting, dishonesty, or misunderstanding of the questions, all of which can contribute to underreporting or over-reporting of some behaviors. However, several studies have shown that surveys of adolescents yield valid and reliable data².

P. Note on YRBS and MIYHS Results

The intent of the MIYHS was to follow the YRBS methodology so that results would be comparable to national data and to Maine YRBS data (presented by the U.S. CDC). However, the weighting procedures and sample size of the YRBS and MIYHS are not completely comparable, and thus not all MIYHS results are the same as the data for Version C (Maine’s YRBS), which was sent to the U.S. CDC for use in YRBS. MIYHS weighting uses county-level weights in addition to school-response, student response and post-stratification to calculate state-level weights. The YRBS, which samples at the state level only, does not use county weights when calculating the state-level weights. Like the 2023 MIYHS, the U.S. CDC post-stratifies by race and Hispanic ethnicity.

Recommendations on when to use MIYHS results and when to use YRBS results:

² <http://www.cdc.gov/mmwr/PDF/rr/rr5312.pdf>

Methodology

- When making comparisons with national rates or rates in other states, use YRBS (as reported on the U.S. CDC website: <http://www.cdc.gov/healthyyouth/data/yrbs/index.htm>).
- When making comparisons between the state rate and county rates, use MIYHS.
- When showing trends over time since 2009, we encourage using MIYHS, unless comparing trends to U.S. or other states where using YRBS data. (as reported on the U.S. CDC website: <http://www.cdc.gov/healthyyouth/data/yrbs/index.htm>) is more appropriate. When showing trends over time including data points prior to and after 2009, use YRBS.

APPENDIX A: 2023 MIYHS CODEBOOKS

2023 MIYHS CODEBOOK AND DATASET LABELS FOR 5/6 MODULE

2023 Variable	2023 Reports	2023 Question Wording	2023 Question Values	2023 Summary Variable	2023 Answer of Interest	2023 Aol Values	2023 Numerator	2023 Denominator	Question Change from 2019?	Notes

STATE OF MAINE
DEPARTMENT OF EDUCATION
23 STATE HOUSE STATION
AUGUSTA, ME 04333-0023

JANET T. MILLS
GOVERNOR

PENDER MAKIN
COMMISSIONER

September 19, 2022

Dear Principal:

The 2023 **Maine Integrated Youth Health Survey (MIYHS)** is conducted by the Maine Department of Health and Human Services in collaboration with the Maine Department of Education and will be administered in January 2023. The MIYHS is a survey of students in grades 5 through 12 that assesses priority health behaviors including tobacco and vaping use, alcohol and other substance use, sexual behaviors, dietary behaviors, physical activity, and nutrition. The survey also measures supportive factors that exist at school, home, and in the community.

The MIYHS was created in 2009 and is administered every other year, in the odd calendar year. This year, we are going back to a mid-year administration after moving the 2021 administration to last fall to accommodate for extraordinary demands on schools during the 2020-2021 school year. Survey administration will take place **January 17 through February 17, 2023**. We anticipate schools will be able to administer surveys electronically for the 2023 administration, but paper surveys will also be available. Surveys are intended to be administered during a typical 40-minute class period. Survey administration procedures are designed to protect student privacy and allow for anonymous participation. School administrative units (SAUs), schools, and students will not be identified in any public reports. Participating SAUs and schools will have access to their respective school data provided reporting requirements are met; however, individual student data will not be identifiable. A sample page of a high school data report is included for your reference. If your school participated in the 2021 MIYHS and you do not have access to your school reports, please email Korey.Pow@maine.gov.

The MIYHS is the primary source of information on the most important health risk behaviors of students in Maine and is increasingly used by educators, public health officials, and others to monitor new and emerging health trends. The survey helps schools and communities identify needs and evaluate the success of interventions and secure funds for programs to prevent substance use, violence, and other youth risk behaviors. To view data reports, fact sheets, and a data dashboard from previous years, visit www.maine.gov/miyhs.

For additional information and answers to frequently asked questions, please refer to the 2023 MIYHS Information sheet, which has been attached.

To complete your registration for the 2023 Maine Integrated Youth Health Survey, follow the link in the registration email included with this letter. Please register by October 7, 2022.

I encourage your school to participate in this worthwhile initiative to assess the risk behaviors of Maine's youth to inform state, community, and school-wide health policies.

Sincerely,

A handwritten signature in blue ink that reads "Pender Makin".

Pender Makin
Commissioner of Education

2023 Maine Integrated Youth Health Survey Information

2023 MIYHS School Registration is Now OPEN!

FAQ

- ✓ **Who should register to participate in the 2023 MIYHS?**
Public and quasi-public schools with any of the **grades five through twelve**. More than half of the students in these grades across Maine participate in each MIYHS administration.
- ✓ **What will my school be responsible for?**
 1. Select an individual to coordinate the survey preparation at your school (counselor, nurse, teacher, principal, etc.)
 2. Email or mail **parent consent letters** using the provided template, and track parent opt out.
 3. Provide classroom enrollment totals to ensure your school receives enough survey materials.
 4. Coordinate with the MIYHS team to receive survey materials and return materials if applicable.
 5. Administer the survey between **January 17, 2023 and February 17, 2023**.
 6. Conduct make up surveys for any absent students.
- ✓ **How are students protected?**
The survey is always **voluntary** and **anonymous**. The survey will never ask for names, birthdates, email addresses, or phone numbers. Strict data suppression rules are followed to prevent any student from being identified. School-level data are only shared with respective principals and superintendents unless written permission is given to share data with others.
- ✓ **What are some of the benefits of participating?**
 - Participating schools that meet reporting requirements receive access to their own **school data report**.
 - The survey gives your students an opportunity to have their voices heard.
 - Your contribution to **high-quality** and **representative** youth health data in Maine.
- ✓ **How are MIYHS data used?**
MIYHS data are used at the state and local levels for grant applications and reporting; program planning and evaluation; and policymaking.
- ✓ **Can anyone review the surveys ahead of time?**
Yes. Along with copies of all prep materials the MIYHS team shares, copies of the surveys will be available on the **MIYHS website** under 2023 Survey Information once finalized.
- ✓ **What is new for 2023?**
We anticipate that schools will be able to administer survey **electronically** in 2023, but paper surveys will still be available.

Paper Administration Handbook for 2023 MIYHS Coordinators (Grades 5 – 12)

For schools using a Paper-based Administration

2022 – 2023 School Year

I. Introduction	Page 1
II. Survey Administration Steps	Page 3
III. Importance of Consent, Confidentiality, and Anonymity	Page 17
IV. Importance of Data Validity and Response Rates	Page 18
Appendix	Page 20

I. INTRODUCTION

The purpose of this *Administration Handbook for MIYHS Coordinators (Grades 5 – 12)* is to inform the MIYHS Coordinators within each school of their roles and responsibilities in conducting the 2023 Maine Integrated Youth Health Survey (MIYHS) for the following modules: 5th/6th grade (5/6), Middle School (MS), and High School (HS). This document provides information on the administration procedures employed in the MIYHS, as well as some background and rationale for the way that the MIYHS is conducted. The following *Administration Handbook for MIYHS Coordinators* includes all the information that you will need to administer the 2023 MIYHS for grades 5 – 12.

This is the Paper Administration Handbook, but your school may wish to complete an online web-based MIYHS administration. If so, please use the Online Administration Handbook which can be found on the MIYHS 2023 website: www.maine.gov/miyhs/2023-survey-information.

Quick Facts:

- ✓ The MIYHS is sponsored by the Maine Department of Education, in collaboration with the Department of Health and Human Services, Maine Center for Disease Control and Prevention.
- ✓ The first administration of the MIYHS took place in February 2009, after many years of collaboration and planning to integrate several surveys that had previously been administered separately, including the Maine Youth Drug and Alcohol Use Survey (MYDAUS), the Youth Risk Behavior Survey (YRBS), and the Youth Tobacco Survey (YTS).
- ✓ The MIYHS has been administered every two years (2009-2021) during January and February (except during the pandemic).
- ✓ The 2023 MIYHS is composed of three modules:
 1. “5/6” – 5th and 6th grade student survey
 2. “MS” – 7th and 8th grade (middle school) student survey, composed of four sub-versions
 3. “HS” – 9th through 12th grade (high school) student survey, composed of four sub-versions

Benefits:

- ✓ The benefits of participating in the MIYHS include, but are not limited to:
 - School and SAU access to a school specific report with a wide range of data on youth behaviors, risk factors, and protective factors; including comparisons to past MIYHS results and state level data. (*Please note that restrictions apply to the availability of School and SAU reports, based on minimum participation rates and school size.*)
 - Availability of data to evaluate the impact of national, state, and local efforts to prevent certain risk behaviors and to improve school health education policies and programs.
 - Access to local, public health district, and state data that show how student health risk behaviors change over time, and how they affect the success of Maine youth in attaining the Maine Learning Results.

I. INTRODUCTION (continued)

Other Information:

- ✓ After managing the past seven MIYHS administrations, Pan Atlantic Research in Portland, Maine, is looking forward to working with schools on administering the 2023 MIYHS. Past MIYHS administrations have been successful, with approximately 65,000 completed student surveys in each survey year.
- ✓ While many MIYHS Coordinators and teachers have assisted with the MIYHS and/or other student surveys in the past, our experience with and feedback from past MIYHS administrations indicate that a small number of school personnel misunderstood the survey procedures and protocol, which may have impacted students' rights and/or the validity of schools' survey data, sometimes resulting in surveys that were not usable.

Therefore, as the designated MIYHS Coordinator for your school, it is extremely important that you:

- a) thoroughly review and complete the information contained within this document, and
- b) complete the online training review by December 15, 2022 (see STEP 3).

Both of these items are **mandatory** parts of your school's participation in the MIYHS and must be completed.

- ✓ **Please let us know if you change your MIYHS Coordinator or if you have any questions, comments, or concerns throughout the survey administration process. Contact Pan Atlantic Research (email: miyhs@panatlanticresearch.com or call (207) 221-8877 ext. 2) at any time.**

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES

OVERVIEW

The 8 steps below and the timeline represent an overview of the Administration of the MIYHS at your school. Your specific actions are detailed in the pages following this Overview section.

STEP 1 - Decide **how** (online or paper) and **when** your school will administer the MIYHS during the **survey period of January 17, 2023 – February 17, 2023**.

STEP 2 - Send Pan Atlantic Research a **spreadsheet containing enrollment figures for each classroom** participating in the MIYHS as soon as 2023 classes form and no later than December 9, 2022. The spreadsheet, also known as your “Class List,” should reflect the classroom information for the *selected date and method of the survey administration* and should include any vocational and/or alternative education students in your school.

STEP 3 - Complete the **online knowledge review** for MIYHS Coordinators by December 15, 2022; we will send you the link.

STEP 4 - Work with your principal/main office to make sure that the requisite parental consent letters have been e-mailed to parents/guardians **at least two weeks, but not more than six weeks, prior** to your school’s scheduled survey administration date.

STEP 5 - ASAP after receipt of your survey materials in December or January, **check every classroom survey packet** against your school’s MIYHS Classroom Enrollment Confirmation Form(s).

STEP 6 - **Train the teachers** in your school on how to administer the survey.

STEP 7 - **Administer the survey** during the survey period of January 17, 2023 - February 17, 2023.

STEP 8 - **Return completed paper surveys** to Pan Atlantic Research by the end of February 2023.

Timeline for Survey Administration Steps for the 5/6, MS & HS MIYHS Modules				
October	November	December	January	February
	STEP 1			
		STEP 2 (by Dec. 9)		
		STEP 3 (by Dec. 15)		
			STEP 4	
			STEP 5	
				STEP 6
			STEP 7 (Jan. 17, 2023 – Feb. 17, 2023)	
				STEP 8

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

DETAILED INFORMATION FOR EACH STEP

Please see below for specific information about each step in administering the 2023 5/6, MS, and HS MIYHS modules.

STEP 1 - Decide how and when your school will administer the MIYHS during the survey period of January 17 - February 17, 2023.

- ✓ **All** students in the grades participating in the MIYHS must be given the opportunity to take the survey including vocational and alternative education students, if applicable. Please pick a day within the January 17 - February 17 timeframe that will have **maximum attendance** to improve the accuracy of your school's data.
- ✓ Decide how best to administer the surveys in your school, keeping in mind that the paper survey administration period should be 45 minutes. Please note: students will not have enough time to complete the survey if they are not given a complete block of at least 45 minutes.
 - Please choose a time (e.g., homeroom, English classes, Period 2 classes) in which all students have an opportunity to take the survey; but please ensure that no students take the survey more than once. **As a reminder, be sure that vocational and/or alternative education students, as applicable, have an opportunity to take the survey.**
 - Please ensure that students in the different MIYHS grade segments (5/6, MS, and HS) are in separate classrooms during survey administration and are not interspersed with other grade segments. For example, 5th and 6th grade students may be in the same classroom with one another, but 6th and 7th grade students may not as they belong to different MIYHS grade segments (and therefore will be given different survey modules). This will help guarantee that each student will receive the appropriate module of the MIYHS to complete.
 - For the Middle School and High School modules, half of the schools participating in the MIYHS will receive "A" and "C" versions of the survey, while the other half of schools will receive "B" and "D" versions. Pan Atlantic Research will assign the survey version to your classes, with half of the classes at your school receiving one version and the other half receiving the other version. Each class envelope will be clearly marked with the survey version that class will complete. Specifically, the following MIYHS grade segments will be receiving **different modules** of the survey:
 - Grades 5 and 6 will complete the 5/6 version;
 - Grades 7 and 8 (2 of 4 versions – MS-A & MS-C ***OR*** MS-B & MS-D); and
 - Grades 9 through 12 (2 of 4 versions – HS-A & HS-C ***OR*** HS-B & HS-D).
- ✓ **NOTE:** If the January and February timeframe conflicts with other initiatives, an alternative date can be selected so long as it falls prior to March 17, 2023.

CHECK THIS BOX ONCE STEP 1 HAS BEEN COMPLETED.

STEP 2 - Send Pan Atlantic Research a spreadsheet containing enrollment figures for each classroom participating in the MIYHS as soon as classes form and no later than December 9, 2022. The spreadsheet, also known as your “Class List,” should reflect the classroom information for the *selected date and method of the survey administration* and should include any vocational and/or alternative education students in your school.

- ✓ Because survey materials need to be prepared in advance of the survey administration date, we ask that you email the classroom enrollment spreadsheet (see below for spreadsheet format) to Pan Atlantic Research (miyhs@panatlanticresearch.com) **as soon as possible** after classes have been formed and no later than **December 9, 2022**. Pan Atlantic will include additional surveys to account for small enrollment changes occurring in the time since the classroom enrollment spreadsheet was sent to Pan Atlantic Research. If these extra surveys will not be sufficient to cover the enrollment or add/drop changes your school may experience OR if your school changes the way in which the survey will be administered, **you must let Pan Atlantic Research know immediately so that arrangements can be made to get you the survey materials you need.**
- ✓ Ensure that the classroom enrollment spreadsheet (see below) includes the **anticipated survey administration date** and the following information for each classroom:
 - Survey Administration Date(s) (estimated date is fine if you haven’t scheduled the actual date yet)
 - Format: Enter “Online” for the web-based survey or “Paper” for the paper-based survey.
 - School Name
 - Name of teacher
 - Type of class (e.g., “English,” “Homeroom”); if you choose to administer the survey throughout the day (for example, in English classes), be sure to include the class period as well.
 - Grade(s) of the students in the classroom
 - **Number** of students in the classroom (leave out student names please)
 - Notes – add anything you think Pan Atlantic Research needs to know about the classes at your school
- ✓ Note: The classroom enrollment spreadsheet **should not** include a list of the individual student names. However, if the classroom enrollment spreadsheet you provide includes students’ names, **please ensure that they are grouped and labeled by teacher** so that the appropriate number of surveys per classroom can be readily packed for each teacher.
- ✓ Email the classroom enrollment spreadsheet in an electronic format that is compatible with Excel (Excel, Google Sheets) to Pan Atlantic Research (miyhs@panatlanticresearch.com); please contact Pan Atlantic Research if this is not possible. Do not send a PDF version. The preferred layout of the classroom enrollment spreadsheet is as follows:

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

Sample Class List (this template is available at <https://www.maine.gov/miyhs/2023-survey-information>):

	A	B	C	D	E	F	G	H
1	Survey Date	Format	School Name	Teacher Name	Type of Class	Grade(s)	Number of Students	Notes
2	19-Jan-23	Paper*	District Community School	Ms. Leia	English	5 & 6	32	
3	24-Jan-23	Online	District Community School	Mr. Solo	Homeroom	7	24	
4	24-Jan-23	Online	District Community School	Mr. Skywalker	Homeroom	8	16	
5	7-Feb-23	Online	District Community School	Ms. Rey	English, Period 1	9 & 10	22	
6	9-Feb-23	Online	District Community School	Mr. Kenobi	English, Period 2	11 & 12	25	
7								
8	*Paper is used here only as an example. The 5th and 6th grade module can also be administered online.							
9								

- ✓ **Be sure to include any vocational/alternative education students in your school, but do not include homeschooled students on the classroom enrollment spreadsheet as they are not included in the parameters of the MIYHS.**
- ✓ Small enrollment changes may occur between the time that the classroom enrollment spreadsheets are provided and the survey administration period. If these cannot be corrected with the extra surveys that are packed for each school or if your school changes the way in which the survey will be administered, it is **VITAL** that you call Pan Atlantic Research immediately to request additional surveys.

CHECK THIS BOX ONCE STEP 2 HAS BEEN COMPLETED.

STEP 3 - Complete the online knowledge review for MIYHS Coordinators by December 15, 2022.

✓ An online knowledge review is required of all MIYHS Coordinators; this step must be completed prior to administering the survey. We are asking Coordinators to complete the review by December 15th, 2022. The review is a short, 10-question review. The training for the 2023 MIYHS, which is similar to the training method employed in the 2021 MIYHS, can be completed in just TWO easy steps:

1. **Read the *Administration Handbook for MIYHS Coordinators* (this document) thoroughly.** Please keep this handbook readily available as it should answer most of the questions you may have about how to administer the 2023 MIYHS. *Remember, please do not hesitate to contact Pan Atlantic Research with any questions (miyhs@panatlanticresearch.com or (207) 221-8877 ext. 2).*
2. **Complete the online knowledge review.** You will be sent an email containing a link to the online training review. Please be on the lookout for an email with the subject: “2023 MIYHS Coordinator Knowledge Review.” Simply complete the brief training review at your convenience between receipt of the email and December 15, 2022.

NOTE: You will be contacted by Pan Atlantic Research if you answered more than one training review question incorrectly. The purpose of this follow-up is to answer any questions you may have and to ensure that the MIYHS is being administered according to the protocol in exactly the same way in each school.

CHECK THIS BOX ONCE STEP 3 HAS BEEN COMPLETED.

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

STEP 4 - Work with your principal/main office to make sure that the requisite parental consent letters have been sent at least two weeks (but not more than six weeks) prior to your school's scheduled survey administration date.

- ✓ **Be sure to use this year's (2023) version of the parental consent letter.** The parental consent letter (PCL) has been translated into select languages; these versions are available upon request. *It is very important to send the parental consent letters to parents/guardians at least two weeks– but not more than six weeks – prior to your school's scheduled survey administration date to provide sufficient time to decide consent.* **As an example,** the parent consent letters should be sent between December 30th and January 27th for students taking the survey on February 10th
- ✓ Informed parental consent is vital to the success of the MIYHS. The parental consent letters must be sent to the parents/guardians of all students in the grades participating in the MIYHS.
- ✓ As in 2021, the 2023 MIYHS will utilize email delivery for PCLs, aimed to make the consent process easier for schools. Email delivery is the recommended method to deliver the parent consent letters. For the step by step protocol of mailing out your consent letters, please refer to “Parent/Guardian Consent Letter Delivery Options” in the Appendix. For those schools that do not utilize email or have a need to send the letters via U.S. Mail, you may follow the steps in the Appendix for U.S. Marketing Mail bulk rate delivery.
- ✓ PDF versions of the actual MIYHS surveys and question banks for the middle and high school surveys are available on the MIYHS website, www.maine.gov/miyhs/2023-survey-information. Please refer parents to this website so that they may review the survey questions, if requested.
- ✓ It is **vital** that someone in your school (for example, you as the MIYHS Coordinator, or someone such as your attendance secretary in the main office) creates a list of students who **won't** be participating in the survey – either due to parental non-consent or parental consent letters being returned as undeliverable. **Since these students will not be able to participate in the survey, they should be given an alternate activity during the survey administration period.** Please note that Pan Atlantic Research does not need to receive this list – it is for you and your staff to be sure that non-eligible students are not surveyed.
- ✓ Email distribution of PCLs has become the norm for most schools and is recommended.
- ✓ U.S. Postal Service Marketing Mail bulk rate postage reimbursement is available to schools that utilize U.S. Mail to send the parent consent letters. It is important to note that postage reimbursements will be released to schools after Pan Atlantic Research has received the following:
 - “Request for Postage Reimbursement Form,” (see Appendix) completed in full;
 - A copy of the parental consent letter on your school letterhead;
 - Documentation of the MIYHS Coordinator's participation in the online training review (Pan Atlantic Research will automatically receive the documentation upon your completion of the online training review -- see STEP 3 for more information); and
 - Your school's completed survey materials: A) All classroom envelopes (each with a completed 'Classroom Summary Information Form'), B) Absentee surveys (unless there were no students absent on the survey administration day), and C) 'School Packing Form' completed in full.

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

- ✓ 'Volunteer' schools are welcome to participate in the 2023 MIYHS but are not eligible for postage reimbursement. Volunteer Schools are those that were not chosen as part of the 2023 5/6 sample of schools but have chosen to participate in the 5/6 module.

Step 4-1 - Forward a copy of the parent consent letter on your school letterhead to Korey Pow Haggerty.

Once your school has delivered the parental consent letters, please forward a copy of the letter on school letterhead to Korey Pow Haggerty via email to: korey.pow@maine.gov.

CHECK THIS BOX ONCE STEP 4-1 HAS BEEN COMPLETED.

CHECK THIS BOX ONCE STEP 4 HAS BEEN COMPLETED.

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

STEP 5 - ASAP after receipt of your survey materials, check every classroom survey packet against your school's MIYHS Classroom Enrollment Confirmation Form(s).

- ✓ Pan Atlantic Research will mail survey materials directly to your school.
- ✓ When you receive your survey box(es), inside you will find:
 - A folder containing the following documents:
 - MIYHS Classroom Enrollment Confirmation Form (customized for each school)
 - School Packing Form
 - Laminated poster to be displayed in a prominent area of the school for at least two weeks starting on the day before your school's survey administration date
 - Absentee Survey Envelope
 - Classroom survey packets (for each class) containing the following survey materials:
 - 5th and 6th grade – Survey booklets
 - MS & HS modules – Survey booklets with attached (perforated) answer sheets
- ✓ **As soon as possible after receiving the survey materials and at least one week prior to your school's survey administration date, make sure to check every classroom survey packet against your school's MIYHS Classroom Enrollment Confirmation Form(s). If your school has a large number of classes, you may find it helpful for each teacher to check his/her own survey materials.**
 - Please review your materials at least one week prior to your school's survey administration date and contact Pan Atlantic Research (207) 221-8877 ext 2) **RIGHT AWAY** if you find any problems with your survey materials. While Pan Atlantic Research does everything possible to double-check all the survey materials before they are packed and distributed, errors sometimes happen with 90,000 surveys being packaged. Unfortunately, solutions to any packing errors will be extremely limited if there isn't enough time for additional survey materials to be sent in the mail.
 - The survey material review check list should be as follows:

Step 5-1 – Are there enough surveys in each classroom packet given current enrollment figures?

Surveys are packed to match the exact enrollment figures documented in the classroom enrollment spreadsheet you provided in STEP 2. There will be one extra survey booklet in each classroom survey packet for the teacher to read through and refer to during the survey administration period. Additional surveys will be packed in a separate envelope for each school to account for small enrollment changes occurring in the time since the classroom enrollment spreadsheet was sent to Pan Atlantic Research.

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

If a classroom survey packet still doesn't have enough surveys due to more substantial enrollment changes, you can supplement them with survey booklets from another classroom survey packet if that packet has extras. **However, for the MS and HS modules, you MUST make sure that the two classrooms have the same SURVEY CODE** (e.g., if your class used MS-A, you must use MS-A surveys only; if it was HS-B, you can only use HS-B to supplement, and so on).

If not enough extra surveys are available, call Pan Atlantic Research **IMMEDIATELY** so that you can get the proper survey materials by your school's administration date.

CHECK THIS BOX ONCE STEP 5-1 HAS BEEN COMPLETED.

Step 5-2 – For MS and HS modules only: For each classroom packet, do all of the survey booklets have the same SURVEY CODE on them (e.g., MS-A, HS-B) and does this code match the one listed on the “Classroom Summary Information Form” printed on the front of each classroom survey packet?

If there is an obvious packing error that you are able to fix yourself, you may go ahead and do so. However, please contact Pan Atlantic Research ASAP if there is a larger problem and/or if you have any questions at all as to the best way of fixing something that seems to have been done in error.

CHECK THIS BOX ONCE STEP 5-2 HAS BEEN COMPLETED.

CHECK THIS BOX ONCE ALL OF STEP 5 HAS BEEN COMPLETED.

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

STEP 6 - Train the teachers in your school on how to administer the survey.

- ✓ Train classroom teachers on how to administer the MIYHS:
 - The MIYHS Coordinator should display a laminated poster (to be provided with your surveys) with various hotline numbers in a prominent location in their school for at least two weeks, beginning on the day prior to your school's survey administration date. In addition, the poster will be available on the MIYHS website for staff to download, print, and display in their respective offices. Alert teachers where in your school the posters will be displayed by adding the location to the **'Classroom Script' prior to the document being photocopied/e-mailed and distributed to teachers.**
 - Organize a training session – either done individually or in a larger group – to ensure that the teachers adhere to the Teacher MIYHS Protocol (listed below). This training can be done in-person or virtually. You will have access to a PowerPoint presentation and a video, created by the MIYHS Team, to use in the training session(s).
 - Email or photocopy and distribute (along with the classroom survey packets) the "Survey Administration Instructions for Teachers" and "Classroom Script" documents. You will be receiving these documents via email in November. Before photocopying the "Classroom Script," be sure to update this document with information regarding where the posters will be displayed. Teachers will also need the list of students who cannot take the survey due to parental refusal or undeliverable parental consent letters (see STEP 4 for more information). **Distribute these survey materials to teachers at least one day* prior to your school's survey administration date to ensure that teachers have enough time to familiarize themselves with the survey materials.**
**This could be done earlier if you want teachers to help check through their own classroom survey packets to be sure that they have enough survey booklets in their classrooms.*

MIYHS Teacher Protocol:

- ✓ In the days leading up to the survey administration period, teachers should:
 - Read the "Survey Administration Instructions for Teachers" and the "Classroom Script" documents.
 - Make sure that all the contents of their classroom survey packets are accounted for and accurate:
 - For MS and HS modules: Make sure that each survey booklet has the same SURVEY CODE and that the code matches the "Classroom Summary Information Form" printed on the front of each classroom survey packet. Middle schools and high schools are given one of two sets of survey versions (approximately half of your school's students – split by classroom – will receive each survey version):
 - MS-A and MS-C; or
 - MS-B and MS-D; or
 - HS-A and HS-C; or
 - HS-B and HS-D
 - **PRIOR** to the survey administration period, ensure that there are enough surveys in the classroom survey packet for the students in their classroom, including an extra survey booklet for the teacher. If

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

not, teachers should contact **you**, as your school’s MIYHS Coordinator. **you** should make sure that they are given additional surveys; for MS and HS modules, it is **VITAL** that the new surveys have the correct “SURVEY CODES” on them that match the rest of the classroom and the “Classroom Summary Information Form” printed on the front of the classroom survey packet. **Note: This should be done as far in advance as possible, so that Pan Atlantic Research has time to send you additional survey materials in the mail, if necessary.**

✓ During the actual survey administration period, teachers should:

- Ensure that students whose parents refused their participation, who decline to participate in the survey themselves, or those whose parental consent letters are returned undeliverable are: 1) **NOT** surveyed, and 2) given an alternative activity during survey administration.
- **For MS and HS modules:** Have students gently fold the answer sheet at the perforation line and carefully tear the answer sheet from the survey booklet, instructing them to mark their answers only on the detached answer sheet. *If a student rips his or her survey, provide the student with another survey booklet if there are extras in your classroom survey packet. If there are no extra survey booklets, have the student continue taking the survey with the ripped answer sheet.*
- Make sure that students only use pencil or blue or black ink to complete the survey. Do not have students use magic markers of any color or red, pink, orange, or yellow ink as those colors will not be read by the scanner.
- Display the following items on the board or screen at the front of the classroom:
 - 1) SCHOOL ID and CLASS ID codes -- These can be found on the “Classroom Summary Information Form” printed on the front of the classroom survey packet. It is essential that teachers have the students fill in these ID codes correctly or your school runs the risk of your surveys not being processed correctly.
 - 2) Contact information (name, office #, and/or phone number) of the school’s substance use prevention counselor and/or guidance counselor, county crisis resources, and the Maine Crisis Line (1-888-568-1112). Teachers should refer students to these resources to discuss additional questions or concerns regarding issues raised by the survey.
- Follow the “Survey Administration Instructions for Teachers” and the “Classroom Script,” which is a set of **verbatim** instructions to be read to the students before the survey is administered.
- Supply the following contact information to students who have questions about the survey or about their rights regarding the survey:
 - Korey Pow Haggerty, Maine Center for Disease Control and Prevention at korey.pow@maine.gov or (207) 287-5084,
 - Jean Zimmerman, Maine Department of Education, at Jean.Zimmerman@maine.gov or (207) 215-6841, or
 - USM Human Protections Administrator at (207) 228-8434 and/or email usmorio@maine.edu.

Note: The Institutional Review Board (IRB) at the University of Southern Maine has approved the use of this survey. The IRB is responsible for protecting the rights and welfare of survey participants.

✓ While the students are taking the survey, teachers should:

- Remain seated at the front of the room once the surveys are passed out, instructions are given, and students have filled in their SCHOOL ID and CLASS ID codes. This is an essential part of preserving students’

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

anonymity and **confidentiality**; if teachers are walking around the room, the students' answers and/or privacy may be impacted.

- Keep their own copy of the survey so that they do not have to look at a student's survey in order to answer specific questions about survey content. An extra copy of the survey booklet will be included in each classroom survey packet for this purpose.

Important - when a student asks a question about the survey:

- A. It is okay to clarify questions regarding grammar and vocabulary not related to the survey content. It is not okay, however, to clarify questions about specific survey content.

EXAMPLE: A student doesn't understand a question having to do with marijuana. It may be possible that the student doesn't recognize the word as it is spelled. It is acceptable for the teacher to read the question aloud for the student. However, it is not acceptable for the teacher to define the word or give an alternate word for it. Be aware that the survey contains alternate words that will help students understand what is being asked.

A good way to address students' questions related to survey content is to say, "If you don't know what it means, leave it blank."

- B. While the survey can be read aloud by a proctor, the survey should only be administered to students who are able to follow along by themselves. Please contact Pan Atlantic Research with any questions about administering the survey to students with language barriers and/or any other special need(s).
- Fill out the "Classroom Summary Information Form" printed on the front of the classroom survey packet in its entirety. Include the actual number of students who are absent on the day of the survey. This number will be changed later by Pan Atlantic Research should any of the absent students participate in your school's make-up session. Please do hold make-up sessions for absent students - improving the response rate with make-up sessions boosts the reliability of the results.
- Set aside blank survey booklets for students who are absent during survey administration:
 - Fill in the SCHOOL ID and CLASS ID codes for these students. Set the surveys aside so that the surveys can be taken during the make-up session.

✓ After the survey administration period, teachers should:

- Pass around the classroom survey packet for students to deposit their survey booklets (5/6 module) or detached answer sheets (MS and HS modules), having the last student seal the classroom survey packet envelope.
- **For MS and HS modules:** In order to keep the return mailing costs and processing time to a minimum, please recycle the survey booklets - MS and HS students should return **only** their completed and detached **answer sheets**.
- Deliver the completed survey packet envelopes to the designated safe, confidential collection area (as pre-determined by **YOU**, the MIYHS Coordinator).
- Follow the make-up session plan that **YOU** (your school's MIYHS Coordinator) have put into place to administer the survey to absent students.

CHECK THIS BOX ONCE STEP 6 HAS BEEN COMPLETED.

STEP 7 - Administer the survey.

- ✓ Prior to your school’s administration date, it is important that you:
 1. Determine the prominent location in your school where the laminated poster with various hotline numbers will be displayed. Check with the school nurse and guidance office to make sure that non-laminated copies of the poster are displayed in their respective offices as well. Add the locations of the posters to the ‘Classroom Script’ prior to the document being photocopied and distributed to teachers.
 - CHECK THIS BOX ONCE STEP 7-1 HAS BEEN COMPLETED.
 2. Distribute survey materials to teachers, **including the list of students who won’t be participating in the survey** – either due to parental non-consent or parental consent letters returned as undeliverable.
 - CHECK THIS BOX ONCE STEP 7-2 HAS BEEN COMPLETED.
 3. Designate a safe, confidential collection area where all teachers can deposit the sealed classroom survey packet envelopes containing the completed surveys.
 - CHECK THIS BOX ONCE STEP 7-3 HAS BEEN COMPLETED.
 4. Organize a make-up session for students who were absent on the day of survey administration. Communicate the plans of this make-up session with teachers **before** your school’s survey administration date so that they know what to do with the extra surveys they have set aside for absentee students.
 - CHECK THIS BOX ONCE STEP 7-4 HAS BEEN COMPLETED.
- ✓ **Administer the survey during the survey administration period of January 17 – February 17, 2023.**
- ✓ It is extremely important to follow up with students who are absent on the original survey administration date:
 - **Following up with absent students is vital to the success of the MIYHS as a whole, as well as to the integrity of your school’s individual data set.**
 - Each student who was absent on the survey administration date should be given the same survey instrument (with matching school, class, and survey codes [MS and HS only]) that the rest of **their class** used during the original survey administration. For 5/6, the school and class codes must match; for the MS and HS, the school, class, and survey codes must match, e.g., “MS-A,” or “HS-C” must match.
 - Provided that the school and class codes have been properly filled in for each survey, all surveys from the make-up session(s) can be bundled together and put into the ‘Absentee Survey Envelope’ (which will be provided), even if students weren’t in the same class originally.
 - Schools that provide a make-up session for their absent students (or that have no absent students during survey administration) will be entered into a raffle to receive \$250 for their school’s general fund.
- CHECK THIS BOX ONCE ALL OF STEP 7 HAS BEEN COMPLETED.

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

STEP 8 - Return completed surveys.

- ✓ Once you have finished administering the make-up session for students who were absent on the original survey administration date, you should put all the make-up surveys in the “Absentee Survey Envelope.” **DO NOT** alter the information on the “Classroom Summary Information Forms” to account for the fact that the make-up session took place (for example, moving students originally in the “Absentee” row to the “Participating” row) – **Pan Atlantic Research will change the “Classroom Summary Information Forms” accordingly.**
- ✓ Go through the collected survey materials to ensure that all classroom survey packets are accounted for and that the “Classroom Summary Information Forms” on the front of each classroom survey packet are completed in full. **DO NOT** open the sealed classroom survey packets to make sure that information on the “Classroom Summary Information Form” is correct; simply make sure that the information is completely filled out and that any obvious omissions and/or errors (which can be addressed by the teacher for that classroom) are addressed immediately.
- ✓ Fill out the “School Packing Form,” being sure to keep a copy for your records. Include a copy of this form in each package you return to Pan Atlantic Research.
- ✓ As soon as possible after the administration of the make-up survey session, mail completed surveys to Pan Atlantic Research:

Pan Atlantic Research
Attn: MIYHS Survey
P.O. Box 527
Portland, ME 04112

CHECK THIS BOX ONCE STEP 8 HAS BEEN COMPLETED.

III. IMPORTANCE OF CONSENT, CONFIDENTIALITY, AND ANONYMITY

- ✓ It is vital for everyone involved in the survey administration process to be aware that parents and/or students have the right to choose *not* to participate in the survey (informed consent). This right to consent will be *violated* if:
 - Parents
 - **Do not receive the parental consent letter.** Thus, it is vital that schools document any parental consent emails/letters that are returned as undeliverable (these students need to be given an alternate activity during survey administration).
 - **Do not receive the parental consent emails/letters in time to opt their child out of participating in the survey.** Thus, it is vital that the parental consent emails/letters are sent out **two to six weeks** prior to each school's chosen survey administration date(s).
 - Students
 - **Are not clearly informed that their participation in the MIYHS is voluntary.** Thus, teachers **MUST NOT** try to convince students to take the survey. (While student response rates are important, they can be bolstered in other ways, such as following up with absent students.)
- ✓ Please be aware that the surveys do not contain skip patterns (e.g., "If you answered ___ to this question, skip ahead to question ___"). This helps protect student confidentiality in that it should take each student approximately the same amount of time to complete the survey, regardless of how they answer the questions.
- ✓ Student anonymity is extremely important. If students feel that someone may see their answers, they are less likely to answer honestly. Please follow these steps to make sure that student anonymity is protected:
 - Be sure that each teacher administering the survey is properly trained and receives the proper survey administration materials ("Survey Administration Instructions for Teachers" and the "Classroom Script").
 - Ask teachers not to 'wander' around the classroom during the survey administration period.
 - Limit clarification and explanation of questions to pronunciation and to the standard answers given to frequently asked questions. Reassure students that they can leave any questions they don't understand blank.
 - Have students put their own surveys into the classroom survey packet envelope. Once the envelope is sealed by the last student to put his/her survey in, do not open the envelope.
 - While the survey can be read aloud by a proctor, only administer the survey to students who are able to follow along and understand the survey by themselves. Please contact Pan Atlantic Research with any questions about administering the survey to students with language barriers and/or any other special need(s).

IV. IMPORTANCE OF DATA VALIDITY AND RESPONSE RATES

- ✓ After protecting students' rights, the second most important goal is returning the highest number of valid surveys possible. This happens by following the procedures outlined below:
 - Make sure the survey is administered in the classes specified in the classroom enrollment spreadsheet that you send to Pan Atlantic Research by verifying the MIYHS Classroom Enrollment Confirmation Form(s). You are encouraged to keep to your plan for administering the surveys once you have sent in your classroom enrollment spreadsheet, but if for some reason you need to make a change, please contact Pan Atlantic Research (207-221-8877 ext. 2) as soon as possible.
 - **Check through all your survey materials as soon as you receive them.** While Pan Atlantic Research does everything possible to double-check all the survey materials before they are packed and distributed, mistakes sometimes happen with 90,000 surveys being packaged. Please contact Pan Atlantic Research **ASAP if you find any problems with your survey materials** so that there is time to address any issues and more survey materials can be sent in the mail if necessary. Unfortunately, solutions to any packing errors will be limited if there isn't enough time for additional survey materials to be sent in the mail.
 - Ensure that students who are absent on the day of the survey are given a later opportunity to participate in a make-up session to complete the survey. **For many schools, completing this step can make a vast difference in the quality of the data contained in their school report at the conclusion of the project.**
 - Be sure that all teachers have filled out their "Classroom Summary Information Forms" correctly and in full, and that **YOU** complete the "School Packing Form" in its entirety.
 - Deliver the completed surveys (survey booklets for Grade 5/6; detached answer sheets for MS and HS modules) to a designated drop-off point or deliver/mail them (using a traceable method) to Pan Atlantic Research in a timely manner.

FOR MS AND HS MODULES:

- **At least one week prior to your school's survey administration date**, make sure that the survey code (e.g., MS-A, HS-B) on each student's survey booklet matches the rest of the surveys for that classroom. This code should match the one listed for that classroom on your school's "MIYHS Classroom Enrollment Confirmation Form" and is printed on the "Classroom Summary Information Form" on the front of each classroom survey packet.
- Redistribute surveys, if needed, to account for small enrollment changes. Be sure to match the survey code from the survey booklet to the MIYHS Classroom Enrollment Confirmation Form(s) provided for the MS and HS modules. **It is vital not to mix survey codes if you need to redistribute surveys.** If, for example, one of your classrooms taking MS-B needs extra survey booklets, the additional surveys needed should be taken from the extra survey booklet supply and/or from other classrooms also taking the MS-B version. Please contact Pan Atlantic Research ASAP should you need any survey booklets in addition to the extras provided.

DURING THE SURVEY ADMINISTRATION PERIOD, TEACHERS SHOULD:

- Be sure, for the MS and HS modules, that the survey code (e.g., MS-A, HS-B) on each student's survey booklet matches the rest of the surveys for that classroom. This code should match the one listed for that classroom on your school's "MIYHS Classroom Enrollment Confirmation Form" and is printed on the "Classroom Summary Information Form" on the front of each classroom survey packet.

IV. IMPORTANCE OF DATA VALIDITY AND RESPONSE RATES (continued)

- Make sure that students fill in the correct SCHOOL ID and CLASS ID codes. The SCHOOL ID and CLASS ID codes will be listed on the “Classroom Summary Information Form” printed on the front of the classroom survey packets. It is vital that teachers post this information clearly and correctly on the board for students. It is also extremely important that teachers pre-fill the correct SCHOOL ID and CLASS ID codes on the surveys that are to be set aside for absentee students to fill out during the survey make-up session.
- Ensure that students use a pencil or blue or black ink to complete the survey. Magic markers of any color as well as red, pink, and orange ink cannot be read by the scanning machine and will result in unusable surveys.
- Fill out the “Classroom Summary Information Form” correctly.

NOTES ON 2023 MIYHS REPORTS:

- ✓ The 2023 MIYHS data reports (by school, SAU, county, geographic public health district, and state) will be found on the MIYHS website, www.maine.gov/MIYHS.
- ✓ Please note that the school and SAU reports will be available on the password protected portion of the website. Principals and superintendents who do not have access to school data currently should contact Korey Pow Haggerty at korey.pow@maine.gov to set up an account. Principals and superintendents are encouraged to share their login information with their respective school and SAU contacts.
- ✓ The MIYHS team will notify principals, superintendents, and MIYHS Coordinators upon the availability of the reports (projected to be by October 2023). Please contact Korey Pow Haggerty at the Maine Center for Disease Control and Prevention (korey.pow@maine.gov or (207) 287-5084) with any data, confidentiality policies, or website questions you may have.
- ✓ **School Reports (password protected):**
 - Schools must have at least 20 participating students (unweighted) in the final data set within a given survey module (e.g., 5/6, MS, or HS).
 - Student response rates within a school must be at least 50%.
- ✓ **SAU/District Reports (password protected):**
 - SAU/District must have at least 20 participating students (unweighted) in the final data set within a given survey module (e.g., 5/6, MS, or HS).
 - The overall response rate (equivalent to the school response rate in the SAU/district multiplied by the average student response rate within the participating school) must be at least 50%.

Everyone involved with the MIYHS project would like to thank you for your assistance in administering the 2023 MIYHS in your school. We are also very appreciative of your principal, teachers, and students in your school for supporting this very important project.

With approximately 300 schools, thousands of teachers, and 70,000+ students participating in the survey each year, the MIYHS is a large project. It is important to us that your experience with the MIYHS is as positive as possible.

We welcome your feedback and/or suggestions for improvements at any time

(miyhs@panatlanticresearch.com).

Thank you again for your participation!

A-2. Parent/Guardian Consent Letter Delivery Process

A-3. Postage Reimbursement Form

Maine Department of Health and Human Services
Maine Department of Education

2023 MIYHS Coordinator Checklist

Use this checklist to ensure that you have completed the following key tasks:

- STEP 1** - Decide how and when your school will administer the MIYHS during the survey period of January 17 – February 17, 2023.
- STEP 2** - Send Pan Atlantic Research a spreadsheet containing enrollment figures for each classroom participating in the MIYHS **as soon as classes form and no later than December 9, 2022**. The spreadsheet, also known as your “Class List,” should reflect the classroom information for the *selected date and time of the survey administration* and should include any vocational and/or alternative education students in your school.
- STEP 3** - Complete the online knowledge review for MIYHS Coordinators **by December 15, 2022**. The link will be sent to MIYHS Coordinators.
- STEP 4** - Work with your principal/main office to make sure that the requisite parental consent letters have been **emailed at least two weeks (but not more than six weeks) prior** to your scheduled survey administration date.
 - 4-1 - Forward a copy of the parent consent letter on your school letterhead to Korey Pow Haggerty.
- STEP 5** - ASAP after receipt of your survey materials, check every classroom survey packet against your school’s MIYHS Classroom Enrollment Confirmation Form(s).

This step must be done at least one week prior to your school’s survey administration date. (Note: If your school has a large number of classes, you may find it helpful for each teacher to check his/her own survey materials.)

 - 5-1 - Are there enough surveys in each classroom packet given current enrollment figures?
 - 5-2 - **For MS and HS modules:** For each classroom packet, do all the survey booklets have the same SURVEY CODE on them (MS-A, HS-B, etc.) and does this code match the one listed on the “Classroom Summary Information Form?”
- STEP 6** - Train the teachers in your school on how to administer the survey.
- STEP 7** - Administer the survey.
 - 7-1 - Determine the prominent location in your school where the laminated poster with various hotline numbers will be displayed. Check with the school nurse and guidance office to make sure that non-laminated copies of the poster are displayed in their respective offices as well. Add the locations of the posters to the ‘Classroom Script’ prior to the document being photocopied and distributed to teachers.
 - 7-2 - Distribute survey materials to teachers, **including the list of students who won’t be participating in the survey** – either due to parental non-consent or parental consent letters returned as undeliverable.
 - 7-3 - Designate a safe, confidential collection area where all teachers can deposit the sealed classroom survey packet envelopes containing the completed surveys.
 - 7-4 - **Organize a make-up session** for students who were absent on the day of survey administration.
 - Communicate the plans of this make-up session with teachers **before** your school’s survey administration date so that they know what to do with the extra surveys they have set aside for absentee students.
- STEP 8** - Return completed surveys by mail to Pan Atlantic Research.

Lastly, if applicable, send in the Request for Postage Reimbursement

THANK YOU!

Parent/Guardian Consent Letter Delivery Process

(Consent emails/letters to be sent to parents/guardians at least two weeks, but not more than six weeks, prior to your school's survey date)

Electronic Delivery (Email) + U.S. Mail Delivery as needed

U.S. Mail Delivery

Step 1: Compile home email addresses for all families of the students eligible to be surveyed.

1B: Start a list of all students unable to receive electronic letter (no contact listed, undeliverable, etc.)

Step 2: Insert school logo/letterhead into *the MIYHS Parental Consent Letter*

Step 3: Send parent consent letters via email to all parents/guardians

3B: Update list from **1B** to include undeliverable messages

Step 4: Using the list from **1B** & **3B**, send Consent Letters through U.S. Mail to families who did not receive the electronic version

Step 5: Forward a copy of your Parent Consent Letter on school letterhead to Korey Pow Haggerty (korey.pow@maine.gov)

5B: Complete "Request for Postage Reimbursement" and send to Pan Atlantic Research to receive a reimbursement for the PCL cost of bulk rate postage for your USPS mailings

Step 1: Compile home addresses for all families of the students eligible to be surveyed

Step 2: Insert school logo/letterhead into *MIYHS Parental Consent Letter*

Step 3: Send parent consent letters via U.S. Marketing Mail bulk rate to all parents/guardians

Step 4: Forward a copy of your Parent Consent Letter on school letterhead to Korey Pow Haggerty at korey.pow@maine.gov

Step 5: Complete "Request for Postage Reimbursement" to receive a reimbursement for the cost of PCL postage for your USPS Mailings

Request for Postage Reimbursement Form

Thank you for agreeing to participate in the 2023 Maine Integrated Youth Health Survey (MIYHS). This form is for schools who used hard copy USPS mailing (using USPS Marketing Mail postage rate) to deliver the informed consent letters to some/all students and their guardians. **If you used only electronic mail delivery for the consent letters, this form does not need to be included in the completed survey materials.**

Please Note the Following:

1. Schools will be offered a **postage reimbursement** (consisting of USPS Marketing Mail postage reimbursement for the number of hard copy PCL letters mailed by USPS) to help offset the expenses incurred with this mailing; return postage for completed surveys is not reimbursable. The funds will be released to schools once the following documents have been received by Pan Atlantic Research:
 - This form, completed in full
 - A copy of the parental consent letter on school letterhead
 - Proof of completion of the online training review (to be completed by your school's designated MIYHS Coordinator)
 - Your school's completed survey materials (all classroom envelopes, each with a completed 'Classroom Summary Information Form'; absentee surveys, unless there were no students absent on the survey administration day; and the 'School Packing Form' completed in full).

Please sign below and email this form to Pan Atlantic Research at MIYHS@panatlanticresearch.com.

PCL Postage Reimbursement Information:

Number of PCL Letters Mailed*: _____

(Reimbursement rate is \$0.26 per letter based on the USPS Marketing Mail rate, also known as the bulk rate.)

Check made payable to: _____

* Note: While we welcome 'volunteer' schools (those not chosen as part of the 2023 5/6 sample of schools) to participate in the 5/6 module, 'volunteer' 5/6 students cannot be counted toward the participation reimbursement.

Send check to:

Address

**Questions? Contact Pan Atlantic Research at miyhs@panatlanticresearch.com (207) 221-8877 ext. 2.
Thank you for your participation!**

Online Administration Handbook for 2023 MIYHS Coordinators (Grades 5 – 12)

For schools using the online web-based Administration

2022 – 2023 School Year

I. Introduction	Page 1
II. Survey Administration Steps	Page 3
III. Importance of Consent, Confidentiality, and Anonymity	Page 17
IV. Importance of Data Validity and Response Rates	Page 18
Appendix	Page 20

I. INTRODUCTION

The purpose of this *Administration Handbook for MIYHS Coordinators (Grades 5 – 12)* is to inform the MIYHS Coordinators within each school of their roles and responsibilities in conducting the 2023 Maine Integrated Youth Health Survey (MIYHS) for the following modules: 5th/6th grade (5/6), Middle School (MS), and High School (HS). This document provides information on the administration procedures employed in the MIYHS, as well as some background and rationale for the way that the MIYHS is conducted. The following *Administration Handbook for MIYHS Coordinators* includes all the information that you will need to administer the 2023 MIYHS for grades 5 – 12.

This is the Online Administration Handbook, but your school may wish to complete a paper-based MIYHS administration. If so, please use the Paper Administration Handbook which can be found on the MIYHS 2023 website:

www.maine.gov/miyhs/2023-survey-information.

Quick Facts:

- ✓ The MIYHS is sponsored by the Maine Department of Education, in collaboration with the Department of Health and Human Services, Maine Center for Disease Control and Prevention.
- ✓ The first administration of the MIYHS took place in February 2009, after many years of collaboration and planning to integrate several surveys that had previously been administered separately, including the Maine Youth Drug and Alcohol Use Survey (MYDAUS), the Youth Risk Behavior Survey (YRBS), and the Youth Tobacco Survey (YTS).
- ✓ The MIYHS has been administered every two years (2009-2021) during January and February (except during the pandemic).
- ✓ The 2023 MIYHS is composed of three modules:
 1. “5/6” – 5th and 6th grade student survey
 2. “MS” – 7th and 8th grade (middle school) student survey, composed of four sub-versions
 3. “HS” – 9th through 12th grade (high school) student survey, composed of four sub-versions

Benefits:

- ✓ The benefits of participating in the MIYHS include, but are not limited to:
 - School and SAU access to a school specific report with a wide range of data on youth behaviors, risk factors, and protective factors; including comparisons to past MIYHS results and state level data. (*Please note that restrictions apply to the availability of School and SAU reports, based on minimum participation rates and school size.*)
 - Availability of data to evaluate the impact of national, state, and local efforts to prevent certain risk behaviors and to improve school health education policies and programs.
 - Access to local, public health district, and state data that show how student health risk behaviors change over time, and how they affect the success of Maine youth in attaining the Maine Learning Results.

I. INTRODUCTION (continued)

Other Information:

- ✓ After managing the past seven MIYHS administrations, Pan Atlantic Research in Portland, Maine, is looking forward to working with schools on administering the 2023 MIYHS. Past MIYHS administrations have been successful, with approximately 65,000 completed student surveys in each survey year.
- ✓ While many MIYHS Coordinators and teachers have assisted with the MIYHS and/or other student surveys in the past, our experience with and feedback from past MIYHS administrations indicate that a small number of school personnel misunderstood the survey procedures and protocol, which may have impacted students' rights and/or the validity of schools' survey data, sometimes resulting in surveys that were not usable.

Therefore, as the designated MIYHS Coordinator for your school, it is extremely important that you:

- a) thoroughly review and complete the information contained within this document, and
- b) complete the online knowledge review by December 15, 2022 (see STEP 3).

Both of these items are **mandatory** parts of your school's participation in the MIYHS and must be completed.

- ✓ **Please let us know if you change your MIYHS Coordinator or if you have any questions, comments, or concerns throughout the survey administration process.**
- ✓ **Contact Pan Atlantic Research (email: miyhs@panatlanticresearch.com or call (207) 221-8877 ext. 2) at any time.**

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES

OVERVIEW

The 8 steps below and the timeline represent an overview of the Administration of the MIYHS at your school. Your specific actions are detailed in the pages following this Overview section.

STEP 1 - Decide **how** (online or paper) and **when** your school will administer the MIYHS during the **survey period of January 17, 2023 – February 17, 2023**.

STEP 2 - Send Pan Atlantic Research a **spreadsheet containing enrollment figures for each classroom** participating in the MIYHS as soon as 2023 classes form and no later than December 9, 2022. The spreadsheet, also known as your “Class List,” should reflect the classroom information for the *selected date and method of the survey administration* and should include any vocational and/or alternative education students in your school.

STEP 3 - Complete the **online knowledge review** for MIYHS Coordinators by December 15, 2022; we will send you the link.

STEP 4 - Work with your principal/main office to make sure that the requisite parental consent letters have been e-mailed to parents/guardians **at least two weeks, but not more than six weeks, prior** to your school’s scheduled survey administration date.

STEP 5 - ASAP after receipt of your survey materials in December or January, **check every classroom survey packet** containing your Access Code Cards against your school’s MIYHS Classroom Enrollment Confirmation Form(s).

STEP 6 - **Train the teachers** in your school on how to administer the survey.

STEP 7 - **Administer the survey** during the survey period of January 17, 2023 - February 17, 2023.

STEP 8 - **You’re done! Throw away/recycle the Classroom Envelopes.**

Timeline for Survey Administration Steps for the 5/6, MS & HS MIYHS Modules				
October	November	December	January	February
	STEP 1			
		STEP 2 (by Dec. 9)		
		STEP 3 (by Dec. 15)		
			STEP 4	
			STEP 5	
				STEP 6
			STEP 7 (Jan. 17, 2023 – Feb. 17, 2023)	
				STEP 8

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

DETAILED INFORMATION FOR EACH STEP

Please see below for specific information about each step in administering the 2023 5/6, MS, and HS MIYHS modules.

STEP 1 - Decide how (online or paper) and when your school will administer the MIYHS during the survey period of January 17 - February 17, 2023.

- ✓ **All** students in the grades participating in the MIYHS must be given the opportunity to take the survey including vocational and alternative education students, if applicable. Please pick a day within the January 17 - February 17 timeframe that will have **maximum attendance** to improve the reliability of your school's data.
- ✓ Decide how best to administer the surveys in your school, keeping in mind that the online survey administration period should be 30 minutes. Please note: students will not have enough time to complete the survey if they are not given a complete block of at least 30 minutes.
 - Note that the Appendix of this document provides **IT-related information** that may be helpful for district or school IT staff as the survey administration is planned at the district and school levels.
 - Please choose a time (e.g., homeroom, English classes, Period 2 classes) in which all students have an opportunity to take the survey; but please ensure that no students take the survey more than once. **As a reminder, be sure that vocational and/or alternative education students, as applicable, have an opportunity to take the survey.**
 - Please ensure that students in the different MIYHS grade segments (5/6, MS, and HS) are in separate classrooms during survey administration and are not interspersed with other grade segments. For example, 5th and 6th grade students may be in the same classroom with one another, but 6th and 7th grade students may not as they belong to different MIYHS grade segments (and therefore will be given different survey modules). This will help guarantee that each student will receive the appropriate Access Code Cards for the module of the MIYHS they should complete.
 - For the Middle School and High School modules, half of the schools participating in the MIYHS will receive "A" and "C" versions of the survey, while the other half of schools will receive "B" and "D" versions. Pan Atlantic Research will assign the survey version to your classes, with half of the classes at your school receiving one version and the other half receiving the other version. Each class envelope will be clearly marked with the survey version that class will complete. The first three letters of the Access Code that your class receives on the cards in the envelope correspond to the survey version that students will complete.
 - Specifically, the following MIYHS grade segments will be receiving **different modules** of the survey:
 - Grades 5 and 6 will complete the 5/6 version;
 - Grades 7 and 8 (2 of 4 versions – MS-A & MS-C *OR* MS-B & MS-D); and
 - Grades 9 through 12 (2 of 4 versions – HS-A & HS-C *OR* HS-B & HS-D).
- ✓ **NOTE:** If the January and February timeframe conflicts with other initiatives, an alternative date can be selected so long as it falls prior to March 17, 2023.

CHECK THIS BOX ONCE STEP 1 HAS BEEN COMPLETED.

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

STEP 2 - Send Pan Atlantic Research a spreadsheet containing enrollment figures for each classroom participating in the MIYHS as soon as classes form and no later than December 9, 2022. The spreadsheet, also known as your “Class List,” should reflect the classroom information for the *selected date and method of the survey administration* and should include any vocational and/or alternative education students in your school.

- ✓ Because survey materials and Access Code Cards need to be prepared in advance of the survey administration date, we ask that you email the classroom enrollment spreadsheet (see below for spreadsheet format) to Pan Atlantic Research (miyhs@panatlanticresearch.com) **as soon as possible** after classes have been formed and no later than **December 9, 2022**. Pan Atlantic will include additional Access Code Cards to account for small enrollment changes occurring in the time since the classroom enrollment spreadsheet was sent to Pan Atlantic Research. If these extra Access Code Cards will not be sufficient to cover the enrollment or add/drop changes your school may experience OR if your school changes the way in which the survey will be administered, **you must let Pan Atlantic Research know immediately so that arrangements can be made to get you the survey materials you need.**
- ✓ Ensure that the classroom enrollment spreadsheet (see below) includes the **anticipated survey administration date** and the following information for each classroom:
 - Survey Administration Date(s) (estimated date is fine if you haven’t scheduled the actual date yet)
 - Format: Enter “Online” for the online web-based survey or “Paper” for the paper-based survey.
 - School Name
 - Name of teacher
 - Type of class (e.g., “English,” “Homeroom”); if you choose to administer the survey throughout the day (for example, in English classes), be sure to include the class period as well.
 - Grade(s) of the students in the classroom
 - **Number** of students in the classroom (leave out student names please)
 - Notes – add anything you think Pan Atlantic Research needs to know about the classes at your school
- ✓ Note: The classroom enrollment spreadsheet **should not** include a list of the individual student names. However, if the classroom enrollment spreadsheet you provide includes students’ names, **please ensure that they are grouped and labeled by teacher** so that the appropriate number of Access Code Cards per classroom can be readily packed for each teacher.
- ✓ Email the classroom enrollment spreadsheet in an electronic format that is compatible with Excel (Excel or Google Sheets) to Pan Atlantic Research (miyhs@panatlanticresearch.com); please contact Pan Atlantic Research if this is not possible. Do not send a PDF version. The preferred layout of the classroom enrollment spreadsheet is as follows:

Sample Class List (this template is available at <https://www.maine.gov/miyhs/2023-survey-information>):

	A	B	C	D	E	F	G	H
1	Survey Date	Format	School Name	Teacher Name	Type of Class	Grade(s)	Number of Students	Notes
2	19-Jan-23	Paper*	District Community School	Ms. Leia	English	5 & 6	32	
3	24-Jan-23	Online	District Community School	Mr. Solo	Homeroom	7	24	
4	24-Jan-23	Online	District Community School	Mr. Skywalker	Homeroom	8	16	
5	7-Feb-23	Online	District Community School	Ms. Rey	English, Period 1	9 & 10	22	
6	9-Feb-23	Online	District Community School	Mr. Kenobi	English, Period 2	11 & 12	25	
7								
8	*Paper is used here only as an example. The 5th and 6th grade module can also be administered online.							
9								

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

- ✓ Be sure to **include** any vocational/alternative education students in your school, but **do not** include homeschooled students on the classroom enrollment spreadsheet as they are not included in the parameters of the MIYHS.
 - ✓ Small enrollment changes may occur between the time that the classroom enrollment spreadsheets are provided and the survey administration period. If these cannot be corrected with the extra Access Code Cards that are packed for each school or if your school changes the way in which the survey will be administered, it is **VITAL** that you call Pan Atlantic Research immediately to request additional Access Code Cards.
- CHECK THIS BOX ONCE STEP 2 HAS BEEN COMPLETED.

STEP 3 - Complete the online training review for MIYHS Coordinators by December 15, 2022.

- ✓ An online knowledge review is required of all MIYHS Coordinators; this step must be completed prior to administering the survey. We are asking Coordinators to complete the training by December 15th, 2022. The review is a short, 10-question review. The training for the 2023 MIYHS, which is similar to the training method employed in the 2021 MIYHS, can be completed in just TWO easy steps:
1. **Read the *Administration Handbook for MIYHS Coordinators (this document)* thoroughly.** Please keep this handbook readily available as it should answer most of the questions you may have about how to administer the 2023 MIYHS. *Remember, please do not hesitate to contact Pan Atlantic Research with any questions (miyhs@panatlanticresearch.com or (207) 221-8877 ext. 2).*
 2. **Complete the online knowledge review.** You will be sent an email containing a link to the online training review. Please be on the lookout for an email with the subject: “2023 MIYHS Coordinator Knowledge Review.” Simply complete the brief training review at your convenience between receipt of the email and December 15, 2022.

NOTE: You will be contacted by Pan Atlantic Research if you answered more than one training review question incorrectly. The purpose of this follow-up is to answer any questions you may have and to ensure that the MIYHS is being administered according to the protocol in exactly the same way in each school.

CHECK THIS BOX ONCE STEP 3 HAS BEEN COMPLETED.

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

STEP 4 - Work with your principal/main office to make sure that the requisite parental consent letters have been sent at least two weeks (but not more than six weeks) prior to your school's scheduled survey administration date.

- ✓ **Be sure to use this year's (2023) version of the parental consent letter.** The parental consent letter (PCL) has been translated into select languages; these versions are available upon request. *It is very important to send the parental consent letters to parents/guardians at least two weeks– but not more than six weeks – prior to your school's scheduled survey administration date to provide sufficient time to decide consent.* **As an example,** the parent consent letters should be sent between December 30th and January 27th for students taking the survey on February 10th
- ✓ Informed parental consent is vital to the success of the MIYHS. The parental consent letters must be sent to the parents/guardians of all students in the grades participating in the MIYHS.
- ✓ As in 2021, the 2023 MIYHS will utilize email delivery for PCLs, aimed to make the consent process easier for schools. Email delivery is the recommended method to deliver the parent consent letters. For the step by step protocol of mailing out your consent letters, please refer to “Parent/Guardian Consent Letter Delivery Options” in the Appendix. For those schools that do not utilize email or have a need to send the letters via U.S. Mail, you may follow the steps in the Appendix for U.S. Marketing Mail bulk rate delivery.
- ✓ PDF versions of the actual MIYHS surveys and question banks for the middle and high school surveys are available on the MIYHS website, www.maine.gov/miyhs/2023-survey-information. Please refer parents to this website so that they may review the survey questions, if requested.
- ✓ It is **vital** that someone in your school (for example, you as the MIYHS Coordinator, or someone such as your attendance secretary in the main office) creates a list of students who **won't** be participating in the survey – either due to parental non-consent or parental consent letters being returned as undeliverable. **Since these students will not be able to participate in the survey, they should be given an alternate activity during the survey administration period.** Please note that Pan Atlantic Research does not need to receive this list – it is for you and your staff to be sure that non-eligible students are not surveyed.
- ✓ Email distribution of PCLs has become the norm for most schools and is recommended.
- ✓ U.S. Postal Service Marketing Mail bulk rate postage reimbursement is available to schools that utilize U.S. Mail to send the parent consent letters. It is important to note that postage reimbursements will be released to schools after Pan Atlantic Research has received the following:
 1. “Request for Postage Reimbursement Form,” (see Appendix) completed in full;
 2. A copy of the parental consent letter on your school letterhead;
 3. Documentation of the MIYHS Coordinator's participation in the online training review (Pan Atlantic Research will automatically receive the documentation upon your completion of the online training review -- see STEP 3 for more information); and
 4. Pan Atlantic Research will confirm your school's participation in the data and then provide reimbursement.

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

- ✓ 'Volunteer' schools are welcome to participate in the 2023 MIYHS but are not eligible for PCL postage reimbursement. Volunteer Schools are those that were not chosen as part of the 2023 5/6 sample of schools but have chosen to participate in the 5/6 module.

Step 4-1 - Forward a copy of the parent consent letter on your school letterhead to Korey Pow Haggerty.

Once your school has delivered the parental consent letters, please forward a copy of the letter on school letterhead to Korey Pow Haggerty via email to: korey.pow@maine.gov.

CHECK THIS BOX ONCE STEP 4-1 HAS BEEN COMPLETED.

CHECK THIS BOX ONCE STEP 4 HAS BEEN COMPLETED.

STEP 5 - ASAP after receipt of your survey materials, check every classroom survey packet against your school’s MIYHS Classroom Enrollment Confirmation Form(s).

- ✓ Pan Atlantic Research will mail your survey materials directly to your school.
- ✓ When you receive your survey box(es), inside you will find:
 - A folder containing the following documents:
 - MIYHS Classroom Enrollment Confirmation Form (customized for each school)
 - Laminated poster to be displayed in a prominent area of the school for at least two weeks starting on the day before your school’s survey administration date
 - Classroom packets (one per class) containing the Access Code Cards and a Teacher code so that teachers can complete the online Classroom Summary Information Form to confirm classroom enrollment, participation, and the number of absent students on the day of the survey administration.
- ✓ **As soon as possible after receiving the survey materials and at least one week prior to your school’s survey administration date, make sure to check every classroom survey packet against your school’s MIYHS Classroom Enrollment Confirmation Form(s). If your school has a large number of classes, you may find it helpful for each teacher to check his/her own survey materials.**
 - Please review your materials at least one week prior to your school’s survey administration date and contact Pan Atlantic Research (207) 221-8877 ext 2) RIGHT AWAY if you find any problems with your survey materials. While Pan Atlantic Research does everything possible to double-check all the survey materials before they are packed and distributed, errors sometimes happen with 90,000 surveys being packaged. Unfortunately, solutions to any packing errors will be extremely limited if there isn’t enough time for additional survey materials to be sent in the mail.
 - Now is a good time to check the network. Contact your IT staff to “whitelist” the survey URL [<https://us1se.voxco.com/SE/1422/MIYHS2023/>] or [<http://bit.ly/3F9hPaD>] or QR Code and check to ensure they are accessible from the network at the school prior to the survey administration window. All surveys will be accessible from this one URL (the Bitly link and the QR Code both point to [<https://us1se.voxco.com/SE/1422/MIYHS2023/>]).
 - The survey material review check list should be as follows:

Step 5-1 – Are there enough Access Code Cards in each classroom packet given current enrollment figures?

We will provide enough Access Code Cards to cover the enrollment figures documented in the classroom enrollment spreadsheet you provided in STEP 2 and include extras to account for small enrollment changes or in case a code isn’t working for some reason. There will also be one paper survey booklet in each classroom survey packet for the teacher to read through and refer to during the survey administration period.

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

However, if a classroom packet still doesn't have enough Access Code Cards due to more substantial enrollment changes, call Pan Atlantic Research **IMMEDIATELY** so that we can get the proper survey materials to you prior to your school's administration date.

CHECK THIS BOX ONCE STEP 5-1 HAS BEEN COMPLETED.

Step 5-2 – For MS and HS modules only: For each classroom packet, do all of the Access Code Cards have the same SURVEY CODE on them (e.g., MS-A, HS-B) and does this code match the one listed on the “Classroom Summary Information Form” printed on the front of each classroom survey packet?

If there is an obvious packing error, please contact Pan Atlantic Research **ASAP** if you have any questions at all as to the best way of fixing something that seems to have been done in error.

CHECK THIS BOX ONCE STEP 5-2 HAS BEEN COMPLETED.

CHECK THIS BOX ONCE ALL OF STEP 5 HAS BEEN COMPLETED.

STEP 6 - Train the teachers in your school on how to administer the survey.

- ✓ Train classroom teachers on how to administer the MIYHS:
 - The MIYHS Coordinator should display a laminated poster (to be provided with your materials) with various hotline numbers in a prominent location in their school for at least two weeks, beginning on the day prior to your school’s survey administration date. In addition, the poster will be available on the MIYHS website for staff to download, print, and display in their respective offices. Alert teachers where in your school the posters will be displayed by adding the location to the **‘Classroom Script’ prior to the document being photocopied/e-mailed and distributed to teachers.**
 - Organize a training session – either done individually or in a larger group – to ensure that the teachers adhere to the Teacher MIYHS Protocol (listed below). This training can be done in-person or virtually. You will have access to a PowerPoint presentation and a video, created by the MIYHS Team, to use in the training session(s).
 - Email or photocopy and distribute (along with the classroom survey packets) the “Survey Administration Instructions for Teachers” and “Classroom Script” documents. You will be receiving these documents via email in November. Before emailing or photocopying the “Classroom Script,” be sure to update this document with information regarding where the posters will be displayed. Teachers will also need the list of students who cannot take the survey due to parental refusal or undeliverable parental consent letters (see STEP 4 for more information). **Distribute these survey materials including Access Code Cards to teachers at least one day* prior to your school’s survey administration date to ensure that teachers have enough time to familiarize themselves with the survey materials.** **This could be done earlier if you want teachers to help check through their own classroom materials to be sure that they have enough Access Code Cards in their classrooms.*

MIYHS Teacher Protocol:

- ✓ In the days leading up to the survey administration period, teachers should:
 - Read the “Survey Administration Instructions for Teachers” and the “Classroom Script” documents.
 - Make sure that all the contents of their classroom packets including the Access Code Cards are accounted for and accurate:
 - Make sure that each Access Code Card has the same SURVEY CODE (first three digits of the access codes) and that the survey code matches the “Classroom Summary Information Form” printed on the front of each classroom survey packet. Middle schools and high schools are given one of two sets of survey versions (approximately half of your school’s students – split by classroom – will receive each survey version):
 - MS-A and MS-C; or
 - MS-B and MS-D; or
 - HS-A and HS-C; or
 - HS-B and HS-D

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

- **PRIOR** to the survey administration period, ensure that there are enough Access Code Cards in the classroom survey packet for the students in their classroom, including an extra paper survey booklet for the teacher. If not, teachers should contact **you**, as your school’s MIYHS Coordinator. **You** should make sure that they are given additional access code cards; for MS and HS modules, it is **VITAL** that the new access codes have the correct “SURVEY CODES” on them that match the rest of the classroom and the “Classroom Summary Information Form” printed on the front of the classroom survey packet. **Note: This should be done as far in advance as possible, so that Pan Atlantic Research has time to send you additional Access Code Cards in the mail, if necessary.**

- ✓ During the actual survey administration period, teachers should:
 - Ensure that students whose parents refused their participation, who decline to participate in the survey themselves, or those whose parental consent letters are returned undeliverable are: 1) **NOT** surveyed, and 2) given an alternative activity during survey administration.
 - Separate the Access Code Cards that come in sheets of perforated cards. There should be plenty of Access Code Cards in the classroom packet to account for enrollment changes or replacement for codes that might not work or were entered improperly. In addition, the random distribution of the cards also reinforces confidentiality and privacy, i.e., that the codes are random and cannot be linked back to the student.
 - Display the contact information (name, office #, and/or phone number) of the school’s substance use prevention counselor and/or guidance counselor, county crisis resources, and the Maine Crisis Line (1-888-568-1112). Teachers should refer students to these resources to discuss additional questions or concerns regarding issues raised by the survey.
 - Follow the “Survey Administration Instructions for Teachers” and the “Classroom Script,” which is a set of **verbatim** instructions to be read to the students before they begin the survey.
 - Supply the following contact information to students who have questions about the survey or about their rights regarding the survey:
 - Korey Pow Haggerty, Maine Center for Disease Control and Prevention at korey.pow@maine.gov or (207) 287-5084,
 - Jean Zimmerman, Maine Department of Education, at Jean.Zimmerman@maine.gov or (207) 215-6841, or
 - USM Human Protections Administrator at (207) 228-8434 and/or email usmorio@maine.edu.

Note: The Institutional Review Board (IRB) at the University of Southern Maine has approved the use of this survey. The IRB is responsible for protecting the rights and welfare of survey participants.

- ✓ While the students are taking the survey, teachers should:
 - Insert any extra Access Code Cards back into the Classroom Envelope. Teachers should then write the list of absent students on the outside of the envelope and return the envelope to the MIYHS Coordinator in preparation for the makeup session(s). As MIYHS Coordinator, you will hold makeup session(s) for students that were absent on the day of administration, which will help improve the reliability of your school’s data.
 - Remain seated at the front of the room once the Access Code Cards are distributed, instructions are given, and students have successfully entered their Access Codes. This is an essential part of preserving students’ **anonymity** and **confidentiality**; if teachers are walking around the room, the students’ answers and/or privacy may be impacted.

II. SURVEY ADMINISTRATION STEPS – 5/6, MS & HS MODULES (continued)

- Keep their paper copy of the survey handy so that they do not have to look at a student’s computer or iPad in order to answer specific questions about survey content.

Important - when a student asks a question about the survey:

- A. It is okay to clarify questions regarding grammar and vocabulary not related to the survey content. It is not okay, however, to clarify questions about specific survey content.

EXAMPLE: A student doesn’t understand a question having to do with marijuana. It may be possible that the student doesn’t recognize the word as it is spelled. It is acceptable for the teacher to read the question aloud for the student. However, it is not acceptable for the teacher to define the word or give an alternate word for it. Be aware that the survey contains alternate words that will help students understand what is being asked.

A good way to address students’ questions related to survey content is to say, “If you don’t know what it means, leave it blank.”

- B. While the survey can be read aloud by a proctor, the survey should only be administered to students who are able to follow along by themselves. Please contact Pan Atlantic Research with any questions about administering the survey to students with language barriers and/or any other special need(s).

- **Completes the “Day of” Enrollment Form:** On the day of survey administration, teachers will **use the same 2023 MIYHS survey URL** <https://us1se.voxco.com/SE/1422/MIYHS2023/> and use their **unique Teacher Code** to login and fill out the “Classroom Summary Information Form” in its entirety. The unique Teacher Code will be provided on the classroom packet) and contains the School ID and Class ID teachers need to access the short form to provide the actual count of students in the class **on the day of administration**. The survey will also ask you to include the actual number of students who are absent on the day of the survey. These numbers will be updated later by Pan Atlantic Research after the absent students participate in your school’s make-up session. **Please do hold make-up sessions for absent students** - improving the response rate with make-up sessions boosts the reliability of the results.

✓ After the survey administration period, teachers should:

- Be sure that all used Access Code Cards are thrown away or recycled. Note that the Access Codes are single-use, and once used to complete the survey, cannot be used again.
- Deliver the Classroom envelopes containing the extra Access Codes Cards and list of absent students to the designated safe, confidential collection area (as pre-determined by **you**, the MIYHS Coordinator).
- Follow the make-up session plan that **you** (your school’s MIYHS Coordinator) have put into place to administer the survey to absent students.

CHECK THIS BOX ONCE STEP 6 HAS BEEN COMPLETED.

STEP 7 - Administer the survey.

- ✓ Prior to your school's administration date, it is important that you:
 1. Determine the prominent location in your school where the laminated poster with various hotline numbers will be displayed. Check with the school nurse and guidance office to make sure that non-laminated copies of the poster are displayed in their respective offices as well. Add the locations of the posters to the 'Classroom Script' prior to the document being photocopied and distributed to teachers.
 - CHECK THIS BOX ONCE STEP 7-1 HAS BEEN COMPLETED.
 2. Distribute Classroom Envelopes to teachers, **including the list of students who won't be participating in the survey** – either due to parental non-consent or parental consent letters returned as undeliverable.
 - CHECK THIS BOX ONCE STEP 7-2 HAS BEEN COMPLETED.
 3. Designate a safe, confidential collection area where all teachers can deposit the classroom envelopes containing the extra Access Code Cards for the make-up session.
 - CHECK THIS BOX ONCE STEP 7-3 HAS BEEN COMPLETED.
 4. Organize a make-up session for students who were absent on the day of survey administration. Communicate the plans of this make-up session with teachers **before** your school's survey administration date so that they know what to do with the extra Access Codes in the envelopes that they have set aside for the list of absent students.
 - CHECK THIS BOX ONCE STEP 7-4 HAS BEEN COMPLETED.
- ✓ **Administer the survey during the survey administration period of January 17 – February 17, 2023.**
- ✓ It is extremely important to follow up with students who are absent on the original survey administration date:
 - **Following up with absent students is vital to the success of the MIYHS as a whole, as well as to the integrity of your school's individual data set.**
 - Each student who was absent on the survey administration date should be given the same survey instrument (with matching school, class, and survey codes [MS and HS only]) that the rest of **their class** used during the original survey administration. Use the extra Access Codes from the class that they were absent from so that their data can be added into their class.
 - Schools that provide a make-up session for their absent students (or that have no absent students during survey administration) will be entered into a raffle to receive \$250 for their school's general fund.
- CHECK THIS BOX ONCE **ALL OF STEP 7** HAS BEEN COMPLETED.

STEP 8 - Throw away/recycle the Classroom Envelopes.

- ✓ Once you have finished administering the make-up session for students who were absent on the original survey administration date, you should go through the collected survey materials to ensure that all classroom survey packets are accounted for. Throw away or recycle all the Classroom Envelopes containing the extra Access Code Cards and blank paper copies of the survey.
- ✓ If you used U.S. Mail to send your Parent Consent Letters, please complete **the Request for Postage Reimbursement Form** to request reimbursement.

CHECK THIS BOX ONCE STEP 8 HAS BEEN COMPLETED.

III. IMPORTANCE OF CONSENT, CONFIDENTIALITY, AND ANONYMITY

- ✓ It is vital for everyone involved in the survey administration process to be aware that parents and/or students have the right to choose *not* to participate in the survey (informed consent).

This right to consent will be *violated* if:

- Parents
 - **Do not receive the parental consent letter.** Thus, it is vital that schools document any parental consent emails/letters that are returned as undeliverable (these students need to be given an alternate activity during survey administration).
 - **Do not receive the parental consent emails/letters in time to opt their child out of participating in the survey.** Thus, it is vital that the parental consent emails/letters are sent out **two to six weeks** prior to each school's chosen survey administration date(s).
 - Students
 - **Are not clearly informed that their participation in the MIYHS is voluntary.** Thus, teachers **MUST NOT** try to convince students to take the survey. (While student response rates are important, they can be bolstered in other ways, such as following up with absent students.)
- ✓ Please be aware that the surveys do not contain skip patterns (e.g., "If you answered ___ to this question, skip ahead to question ___"). This helps protect student confidentiality in that it should take each student approximately the same amount of time to complete the survey, regardless of how they answer the questions.

Student anonymity is extremely important. If students feel that someone may see their answers, they are less likely to answer honestly. The online survey will not collect IP addresses nor email addresses. Access codes are randomly generated independent of student identity and cannot be traced back to individual students. The same level of anonymity ensured in the paper survey applies to the online version as well.

- ✓ Please follow these steps to make sure that student anonymity is protected:
 - Be sure that each teacher administering the survey is properly trained and receives the proper survey administration materials ("Survey Administration Instructions for Teachers" and the "Classroom Script").
 - Seat students so there is enough space between them to minimize opportunities to review each other's work.
 - Ask teachers not to 'wander' around the classroom during the survey administration period.
 - Limit clarification and explanation of questions to pronunciation and to the standard answers given to frequently asked questions. Reassure students that they can leave any questions they don't understand blank.
 - While the survey can be read aloud by a proctor, only administer the survey to students who are able to follow along and understand the survey by themselves. Please contact Pan Atlantic Research with any questions about administering the survey to students with language barriers and/or any other special need(s).

IV. IMPORTANCE OF DATA VALIDITY AND RESPONSE RATES

- ✓ After protecting students' rights, the second most important goal is returning the highest number of valid surveys possible. This happens by following the procedures outlined below:
 - Make sure the survey is administered in the classes specified in the classroom enrollment spreadsheet that you send to Pan Atlantic Research by verifying the MIYHS Classroom Enrollment Confirmation Form(s). You are encouraged to keep to your plan for administering the survey once you have sent in your classroom enrollment spreadsheet, but if for some reason you need to make a change, please contact Pan Atlantic Research (207-221-8877 ext. 2) as soon as possible.
 - **Check through all your survey materials as soon as you receive them.** While Pan Atlantic Research does everything possible to double-check all the survey materials and Access Code Cards before they are packed and distributed, mistakes sometimes happen with 90,000 surveys and Access Code Cards being packaged. Please contact Pan Atlantic Research **ASAP if you find any problems with your survey materials** so that there is time to address any issues and more Access Code Cards can be sent to you. Unfortunately, solutions to any packing errors will be limited if there isn't enough time for additional survey materials to be sent.
 - Ensure that students who are absent on the day of the survey are given a later opportunity to participate in a make-up session to complete the survey. **For many schools, completing this step can make a vast difference in the quality of the data contained in their school report at the conclusion of the project.**
 - **At least one week prior to your school's survey administration date,** make sure that the School Code and Class Code match the classroom on your school's "MIYHS Classroom Enrollment Confirmation Form" and is printed on the "Classroom Summary Information Form" on the front of each classroom envelope. There should be plenty of extra Access Code Cards in the Classroom Envelopes but please contact Pan Atlantic Research ASAP should you need any more Access Code Cards in addition to the extras provided.

DURING THE SURVEY ADMINISTRATION PERIOD, TEACHERS SHOULD:

- Be sure that the School ID and Class ID matches the information on the Classroom Envelope. These codes should match the ones listed for that classroom on your school's "MIYHS Classroom Enrollment Confirmation Form" and printed on the "Classroom Summary Information Form" on the front of each classroom survey packet.
- Access and complete the "Online Classroom Summary Information Form" correctly. Follow the link and enter the Teacher's Access Code Card supplied in the Classroom Envelope.

IV. IMPORTANCE OF DATA VALIDITY AND RESPONSE RATES (continued)

NOTES ON 2023 MIYHS REPORTS:

- ✓ The 2023 MIYHS data reports (by school, SAU, county, geographic public health district, and state) will be found on the MIYHS website, www.maine.gov/MIYHS.
- ✓ Please note that the school and SAU reports will be available on the password protected portion of the website. Principals and superintendents who do not have access to school data currently should contact Korey Pow Haggerty at korey.pow@maine.gov to set up an account. Principals and superintendents are encouraged to share their login information with their respective school and SAU contacts.
- ✓ The MIYHS team will notify principals, superintendents, and MIYHS Coordinators upon the availability of the reports (projected to be by October 2023). Please contact Korey Pow Haggerty at the Maine Center for Disease Control and Prevention (korey.pow@maine.gov or (207) 287-5084) with any data, confidentiality policies, or website questions you may have.

- ✓ **School Reports (password protected):**
 - Schools must have at least 20 participating students (unweighted) in the final data set within a given survey module (e.g., 5/6, MS, or HS).
 - Student response rates within a school must be at least 50%.

- ✓ **SAU/District Reports (password protected):**
 - SAU/District must have at least 20 participating students (unweighted) in the final data set within a given survey module (e.g., 5/6, MS, or HS).
 - The overall response rate (equivalent to the school response rate in the SAU/district multiplied by the average student response rate within the participating school) must be at least 50%.

Everyone involved with the MIYHS project would like to thank you for your assistance in administering the 2023 MIYHS in your school. We are also very appreciative of your principal, teachers, and students in your school for supporting this very important project.

With approximately 300 schools, thousands of teachers, and 70,000+ students participating in the survey each year, the MIYHS is a large project. It is important to us that your experience with the MIYHS is as positive as possible.

We welcome your feedback and/or suggestions for improvements at any time
(miyhs@panatlanticresearch.com).

Thank you again for your participation!

Maine Department of Education

2023 MIYHS Coordinator Checklist

Use this checklist to ensure that you have completed the following key tasks:

- STEP 1** - Decide how and when your school will administer the MIYHS during the survey period of January 17 – February 17, 2023.
- STEP 2** - Send Pan Atlantic Research a spreadsheet containing enrollment figures for each classroom participating in the MIYHS **as soon as classes form and no later than December 9, 2022**. The spreadsheet, also known as your “Class List,” should reflect the classroom information for the *selected date and time of the survey administration* and should include any vocational and/or alternative education students in your school.
- STEP 3** - Complete the online knowledge review for MIYHS Coordinators **by December 15, 2022**. The link will be sent to MIYHS Coordinators.
- STEP 4** - Work with your principal/main office to make sure that the requisite parental consent letters have been **emailed at least two weeks (but not more than six weeks) prior** to your scheduled survey administration date.
 - 4-1 - Forward a copy of the parent consent letter on your school letterhead to Korey Pow Haggerty.
- STEP 5** - ASAP after receipt of your survey materials, check every classroom envelope against your school’s MIYHS Classroom Enrollment Confirmation Form(s).

This step must be done at least one week prior to your school’s survey administration date. (Note: If your school has a large number of classes, you may find it helpful for each teacher to check his/her own survey materials.)

 - 5-1 - Are there enough Access Code Cards in each classroom packet given current enrollment figures?
- STEP 6** - Train the teachers in your school on how to administer the survey.
- STEP 7** - Administer the survey.
 - 7-1 - Determine the prominent location in your school where the laminated poster with various hotline numbers will be displayed. Check with the school nurse and guidance office to make sure that non-laminated copies of the poster are displayed in their respective offices as well. Add the locations of the posters to the ‘Classroom Script’ prior to the document being photocopied and distributed to teachers.
 - 7-2 - Distribute survey materials to teachers, **including the list of students who won’t be participating in the survey** – either due to parental non-consent or parental consent letters returned as undeliverable.
 - 7-3 - Designate a safe, confidential collection area where all teachers can deposit the classroom envelopes containing the extra Access Code Cards.
 - 7-4 - **Organize a make-up session** for students who were absent on the day of survey administration.
 - Communicate the plans of this make-up session with teachers **before** your school’s survey administration date so that they know what to do with the extra Access Code Cards set aside for absentee students.
- STEP 8** - **Throw away/recycle the Classroom Envelopes**. Lastly, if applicable, send in the Request for Postage Reimbursement

THANK YOU!

Parent/Guardian Consent Letter Delivery Process

(Consent emails/letters to be sent to parents/guardians at least two weeks, but not more than six weeks, prior to your school's survey date)

Electronic Delivery (Email) + U.S. Mail Delivery as needed

U.S. Mail Delivery

Step 1: Compile home email addresses for all families of the students eligible to be surveyed.

1B: Start a list of all students unable to receive electronic letter (no contact listed, undeliverable, etc.)

Step 2: Insert school logo/letterhead into *the MIYHS Parental Consent Letter*

Step 3: Send parent consent letters via email to all parents/guardians

3B: Update list from **1B** to include undeliverable messages

Step 4: Using the list from **1B** & **3B**, send Consent Letters through U.S. Mail to families who did not receive the electronic version

Step 5: Forward a copy of your Parent Consent Letter on school letterhead to Korey Pow Haggerty (korey.pow@maine.gov)

Step 5: Complete "Request for Participation Reimbursement" and send to Pan Atlantic Research to receive a full reimbursement for the cost of bulk rate postage for your USPS mailings

Step 1: Compile home addresses for all families of the students eligible to be surveyed

Step 2: Insert school logo/letterhead into *MIYHS Parental Consent Letter*

Step 3: Send parent consent letters via U.S. Marketing Mail bulk rate to all parents/guardians

Step 4: Forward a copy of your Parent Consent Letter on school letterhead to Korey Pow Haggerty (korey.pow@maine.gov)

Step 5: Complete "Request for Postage Reimbursement" to receive a reimbursement for the cost of PCL postage for your USPS Mailings and email to Pan Atlantic Research

Request for Postage Reimbursement Form

Thank you for agreeing to participate in the 2023 Maine Integrated Youth Health Survey (MIYHS). This form is for schools who used hard copy USPS mailing (using USPS Marketing Mail postage rate) to deliver the informed consent letters to some/all students and their guardians. **If you used only electronic mail delivery for the consent letters, this form does not need to be included in the completed survey materials.**

Please Note the Following:

1. Schools will be offered a **postage reimbursement** (consisting of USPS Marketing Mail postage reimbursement for the number of hard copy PCL letters mailed by USPS) to help offset the expenses incurred with this mailing. The funds will be released to schools once the following documents have been received by Pan Atlantic Research:
 - This form, completed in full
 - A copy of the parental consent letter on school letterhead
 - Proof of completion of the online training review (to be completed by your school's designated MIYHS Coordinator)

Pan Atlantic Research will confirm your school's participation in the data and then provide reimbursement.

Please sign below and email this form to Pan Atlantic Research at MIYHS@panatlanticresearch.com.

Participation Reimbursement Information:

Number of PCL Letters Mailed*: _____

(Reimbursement rate is \$0.26 per letter based on the USPS Marketing Mail rate, also known as the bulk rate.)

Check made payable to: _____

* Note: While we welcome 'volunteer' schools (those not chosen as part of the 2023 5/6 sample of schools) to participate in the 5/6 module, 'volunteer' 5/6 students cannot be counted toward the participation reimbursement.

Send check to:

Address

**Questions? Contact Pan Atlantic Research at miyhs@panatlanticresearch.com (207) 221-8877 ext. 2.
Thank you for your participation!**

Maine Test Security Handbook

For state assessments, Maine Department of Education (DOE) has established policies, defined procedures, and must enforce rules to ensure the integrity of the state assessment system. While the MIYHS is not required by Maine Statute 20-A §6202 to a specific set of requirements, we will adhere to Maine's test security expectations to ensure that the MIYHS will yield high-quality data that can be trusted to support valid conclusions.

Maine DOE Guidance

To help ensure appropriate administration of state assessments, the Maine DOE seeks to develop a common understanding of what practices are appropriate and to establish procedures to reinforce their consistent implementation.

The Maine Test Security Handbook found at <https://www.maine.gov/doe/sites/maine.gov.doe/files/inline-files/Test%20Security%20Handbook%202019-2020%20Updated%20January%202020.pdf> presents the general expectations of the Maine DOE for the administration of statewide assessments, and the MIYHS team will follow these guidelines as appropriate. Maine's policies and procedures around test security are presented in four sections in the document as described in the list below:

1. Prevention of Testing Irregularities – Best practices for avoiding test irregularities including training to prepare for testing, handling of test materials, expectations for students, appropriate testing environments, etc.
2. Detection of Irregularities – Steps to be taken at both the state level and the local level to monitor the test administration and detect/report any irregularities that may threaten the validity of the test results.
3. Investigation of Irregularities – Outline of the steps to be taken by the local education leaders in collaboration with the Maine DOE to best understand the incident and its implications should an irregularity require investigation.
4. Resolution of Irregularities – Guidelines for working with the Maine DOE to optimally resolve irregularities and to ensure valid results for all students.

IT Tip Sheet for schools administering the Maine Integrated Youth Health Survey

This document provides IT-related information that may be helpful for district or school IT staff as the survey administration is planned at the district and school levels. The MIYHS is conducted using a high quality, cloud-based, online survey software program (Voxco). While it is designed to work smoothly, these tips may be helpful as you prepare for your survey.

Preparing Your School and Network

1) If you or your IT Staff have concerns about your network, consider staggering your survey over several class periods or a few days to minimize the load on your network.

2) Make sure you have a recent version of your internet browser. The system works on any browser but may not work on the oldest versions.

a) You or your IT staff can make sure that your school's browser versions are TLS1.2 compatible. A short list is provided in the table below.

Browser Version Needed (TLS 1.2)

- Google Chrome Version 30 or higher (most recent is 107)
- Mozilla Firefox Version 27 or higher (most recent is 107)
- Safari Version 7 or higher (most recent is 16)
- Internet Explorer Version 11/ Microsoft Edge (most recent is 107)

b) Your IT staff can update browsers if needed.

4) Contact your IT staff to "whitelist" the survey URL [<https://us1se.voxco.com/SE/1422/MIYHS2023/>] or  and check to ensure they are accessible from the network at the school prior to the survey administration window.

5) Ask IT staff to actively monitor your Internet bandwidth to ensure it is not overreaching capacity.

6) Ask IT staff to actively monitor your Internet provider for reported or scheduled outages that may impact availability.

7) Be prepared to use your "make-up" date if you encounter issues during administration

Troubleshooting during the survey

With most students having been successful with the recent move to an online environment, students should have little problem accessing and completing the survey. Please let Pan Atlantic Research know if you would like assistance with any troubleshooting prior to your scheduled survey date.

If you encounter issues during the survey administration, please consider the following troubleshooting steps:

1) If students encounter slow page loads:

a) First try a different browser

b) If that doesn't work, check other websites.

i) If those websites are also slow, there may be a strain on the school's network. It may be best to reduce the number of students concurrently taking the survey or to reschedule the administration to the use of a staggered approach.

2) If the survey URL is unavailable:

a) Try again to make sure it was typed in correctly

b) Try a different browser

c) Check other websites. If other websites are inaccessible, the internet service provider may be unavailable. If this happens you may want to contact your ISP status updates.

3) If students can't log on, make sure they are correctly entering the URL and their access code.

4) If a student gets bumped off, encourage them to try logging in again.

5) If a major technical error prevents students from finishing the survey, or you encounter the worst case scenario, such as a school-wide internet outage, please notify miyhs@panatlanticresearch.com as soon as possible to ascertain whether we received the data that was entered for your school. Please note that you will need to re-administer the survey if we have not received your school's data.

<<DATE>>

Dear Parent/Guardian:

Our school is taking part in the 2023 Maine Integrated Youth Health Survey. This survey is sponsored by Maine Department of Health and Human Services and Maine Department of Education. The survey will ask about the health behaviors of <<INSERT GRADE(S) OF PARTICIPATING STUDENTS>> grade students. The survey will ask about nutrition, physical activity, injuries, tobacco, alcohol, and other drug use. For students in grades 7-12, the survey will also ask about sexual behaviors that could lead to pregnancy and sexually transmitted infections; depression and suicide; and gambling.

Students will be asked to fill out a survey that takes about 30-45 minutes to complete.

Participating in this survey will cause little or no risk to your child. The only potential risk is that some students might find certain questions to be sensitive. The survey has been designed to protect your child's privacy. Students will not put their name on the survey. Also, no student will ever be mentioned by name in a report of the results. For the survey results to be accurate, it is important that all students, regardless of whether they have engaged in health-risk behavior, are given an opportunity to participate in the survey, but the survey is voluntary. No action will be taken against the school, you, or your child if your child does not take the survey. Students may skip any questions they do not wish to answer. In addition, students may stop taking the survey at any point without penalty. If you would like to see the types of questions on the survey, the question banks are available at www.maine.gov/miyhs/2023-survey-information.

Please read the other side of this form for more facts about the survey. Complete the section below and return it to the school within 2 weeks **only if you do not** want your child to take part in the survey.

If you have additional questions about the survey your child's teacher or principal cannot answer, please email: miyhs.dhhs@maine.gov.

Please contact the school OR complete this section of the form only if you **do not** want your child to participate in the survey.

Student name: _____ Grade: _____

I have read this form and know what the survey is about.

NO, my child may **not** take part in this survey.

Parent signature: _____ Date: _____

Maine Integrated Youth Health Survey Fact Sheet

Q. Why is the survey being done?

A. The Maine Department of Education and the Maine Department of Health and Human Services will use the survey results to help measure the percentage of youth who practice healthy and risky behaviors. The information will be used to create school health programs to help reduce risky behaviors and increase healthy behaviors.

Q. Are sensitive questions asked?

A. Yes. Tobacco use, alcohol and other drug use, and bullying may be considered sensitive topics. Questions are written in a direct but sensitive way. Students in grades 7-12 are also asked about depression, suicide, and sexual behaviors that may lead to HIV infection and other sexually transmitted infections (STIs) and unintended pregnancy. Sexual intercourse and injected drug use are behaviors that increase the risk of HIV infection. The only way to learn if youth are at risk of becoming infected with HIV or other STIs is to ask questions about these behaviors.

Q. Will students' names be used or linked to the surveys?

A. No. The survey has been designed to protect your child's privacy. Students do not put their name nor any other identifying information (such as a student ID number) on the survey.

Q. Do students take the survey more than once to see how their behaviors change?

A. No. Students who take part one year cannot be tracked because their names are not on the survey.

Q. How was my child picked to be in the survey?

A. Your child's school was selected to participate, and all students in their grade are being asked to participate.

Q. How long does it take to fill out the survey? Does the survey include a physical test?

A. One class period is needed to fill out the survey. The survey does not include a physical test or exam.

Q. Can I see the questions my student will be asked?

A. Yes, you can view the questions at www.maine.gov/miyhs/2023-survey-information.

Q. What happens if I opt my child out of the survey?

A. Your child's teacher will give them an alternative activity, such as homework or reading, to work on quietly at their desk while their classmates complete the survey.

Q. Who supports this survey?

A. This survey is supported by many organizations in Maine interested in the health of youth. It is also supported by many national organizations. People from more than 100 state and district health and education agencies and 19 federal agencies helped develop the survey.

Niba ufite ibibazo birenzeho kuri ubu bushakashatsi, mwalimu w'umunyeshuri wawe cyangwa umuyobozintagisubizo babona ahubwo hamagara: miyhs.dhhs@maine.gov

Nyamuneka uzuza iki gice cy'ifishi niba gusa udashaka ko umwana wawe agira uruhare muri ubu bushakashatsi.

Izina ry'umunyeshuri: _____ icyiciro: : _____

Nasomye ino fishi maze mbona iby'ubu bushakashatsi.

OYA, umwana wanjye **ntafite** uruhare muri ubu bushakashatsi.

Umukono w'ababyeyi: _____ Itariki: _____

Ifishi y'ubushakashatsi bwa Maine ku bufatanye mu bushakashatsi ku buzima bw'urubyiruko.

Q. Kuki ubushakashatsi buri gukorwa?

A. Ikigo cyo muri Maine gishinzwe Uburezi n'ikigo cyo muri Maine gishinzwe ubuzima na serivisi z'abaturage bizakoresha ibizava mu bushakashatsi bifashe gupima ijanisha ku rubyiruko mu bikorwa by'ubuzima ndetse n'ibibazo mu by'imyitwarire. Amakuru azakoreshwa mu kurema gahunda z'ishuri mu buzima kugira ngo bifashe kugabanya ibibazo by'imyitwarire ndetse no kongera imyitwarire y'ubuzima.

Q. Ese ibibazo by'ingenzi byabajijwe?

A. Yego. Gukoresha itabi, inzoga n'ibindi biyobyabwenge, ndetse n'ibyurumogi byafatwa nk'ingingo ishishikaje. Ibibazo byanditswe mu buryo butomoye ariko butekerejweho. Abanyeshuri bafite imitsindire ku rwego rwa 7-12 babajijwe kubijyanye n'agahinda gakabije, kwiyahura n'iby'imibonano mpuzabitsina byatera kwandura HIV n'izindi ndwara zandurira mu mibonano mpuzabitsina (STIs) ndetse n'inda zitateganyijwe. Imibonano mpuzabitsina ndetse no kwitwera inshinge ni imyitwarire yongera ibyago byo kwandura agakoko ka HIV. Inzira yo kwiga rukumbi niba urubyiruko ruri mubyago byo kwandura HIV cyangwa STIs ni ukubaza iby'iyomyitwarire.

Q. Ese amazina y'abanyeshuri yaba azakoreshwa cyangwa ngo ahuzwe n'ubushakashatsi?

A. Oya. ubushakashatsi bukoze kuburyo burinda ubuzima bwite bw'umwana. Abanyeshuri ntabwo bashyira amazina cyangwa andi makuru (nka ID y'umunyeshuri) ku bushakashatsi.

Q. Ese umunyeshuri yakora ubushakashatsi kenshi kugirango arebe uko imyitwarire ihindagurika?

A. Oya, abanyeshuri bafata igice cy'umwaka, ntabwo babasha kubonwa kuko amazina yabo ataba ari mu bushakashatsi.

Q. Ni gute umwana wanjye yatoranyirijwe kuba mu bushakashatsi?

A. Ishuri ry'umwana wawe ryahishwemo kugira uruhare mubushakashatsi, kandi abanyeshuri bose munzego zabo babazwa kugira uruhare.

Q. Bifata igihe kingana gute kuzuza ubushakashatsi? Ese ubu bushakashatsi bwaba bufitemo uburyo bw'ibigaragara mu gupima?

A. Igihe kimwe cy'ishuri kirakenerwa kuzuza ubu bushakashatsi. Ubushakashatsi ntabwo bufite uburyo bwo gupima bw'ibigaragara.

Q. Ese nareba ibibazo umunyeshuri wanjye azabazwa?

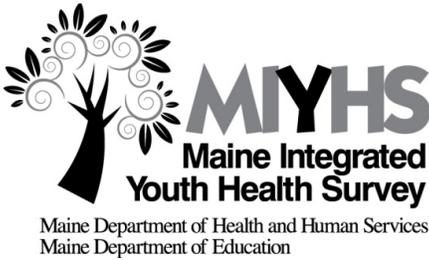

A. Yego, ushobora kureba ibibazo kuri www.maine.gov/miyhs/2023-survey-information.

Q. Ese haba iki iyo umunyeshuri aretse ubushakashatsi?

A. Umwalimu w'umwana wawe amuha ikindi gikorwa nsimbura, nk'umukoro wo murugo cyangwa gusoma, no gukora acecetse ari kuntebe mugihe abandi bari kuzuza iby'ubushakashatsi.

Q. Ninde ufasha ubu bushakashatsi?

A. Ubu bushakashatsi bufashwa n'imiryango myinshi muri maine bashishikajwe n'ubuzima ku rubyiruko. Ndetse bakanafashwa n'indi miryango ya leta. Abantu baturuka mu ntara 100 n'uturere tw'ubuzima ndetse n'ibigo by'uburezi, n'ibindi bigo bijyanye 19 bifasha gukuzubushakashatsi.

2023 MIYHS – Survey Administration Instructions for Teachers (for online web-based survey administrations)

Prior to Survey Administration:

1. Look through the survey materials to make sure that you have the following:
 - '2023 MIYHS — Classroom Script' document
 - An envelope that contains all the Access Code cards for your classroom with an important label on the front showing the teacher's name and other classroom information. This envelope is also used to collect the unused Access Code cards for the students that were absent. The label provides an important Teacher Access Code to access the online Classroom Summary Information Form. Teachers will logon to this short form to enter the actual classroom attendance on the day of administration.
 - Perforated sheets of Access Code cards provide each student a random single-use code used to access the 2023 MIYHS at <https://us1se.voxco.com/SE/1422/MIYHS2023/>.
 - **Are there enough Access Code cards for the students in your class, including a paper survey booklet for you to read through and refer to during the survey administration period?** If not, please contact your school's designated MIYHS Coordinator IMMEDIATELY.
 - **Does the survey code on the Access Code card match the code that is on the Classroom Envelope label?** If not, please contact your school's designated MIYHS Coordinator IMMEDIATELY.
 - A list of students who cannot participate in the survey due to parental/guardian refusal
2. Please familiarize yourself with the '2023 MIYHS — Classroom Script' prior to survey administration.
3. Plan an alternative activity for non-participating students. This activity should be something that students can perform at their desk while the other students are taking the survey, such as reading or working quietly. High participation in the student survey is important to the overall success of the study, so it is important that you select a neutral alternative activity so students are not discouraged from participating in the survey.
4. Verify that your class seating is arranged to maximize student privacy.
5. Reserve the whole class period (at least 30 minutes) on the selected survey date so that your students have time to finish the survey without feeling rushed.

During Survey Administration:

1. The '2023 MIYHS — Classroom Script' document must be carefully and clearly read **word-for-word** to your students at the beginning of the class period.
2. Make sure that each Access Code Card has the same SURVEY CODE (first three digits of the access codes) and that the survey code matches the information printed on the front of each classroom survey packet.
3. If students have questions about the survey, please give them the following contact information:

- ✓ Korey Pow Haggerty, Maine Center for Disease Control & Prevention, at Korey.Pow@maine.gov or 207-287-5084;
- ✓ Jean Zimmerman, Maine Department of Education, at Jean.Zimmerman@maine.gov or 207-215-6841; or
- ✓ The USM Human Protections Administrator,* at usmorio@maine.edu or 207-228-8434.

** Please note that the USM Institutional Review Board has reviewed and approved this study to make sure that students' and parents'/guardians' rights are protected.*

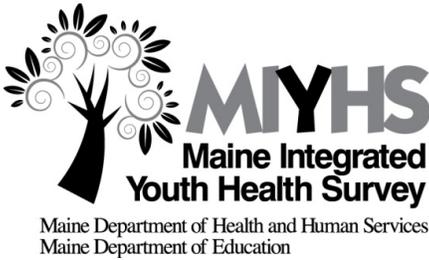

4. Provide students with contact information (name, office #, and/or phone number) of the school's substance use counselor and/or guidance counselor and the Maine Crisis Line (1-888-568-1112). You should refer students to these resources to discuss additional questions or concerns regarding issues raised by the survey.
5. Separate the Access Code Cards that come in sheets of perforated cards. There should be plenty of Access Code Cards in the classroom packet to account for enrollment changes or replacement for codes that might not work or were entered improperly. In addition, the random distribution of the cards also reinforces confidentiality and privacy, i.e., that the codes are random and cannot be linked back to the student.
6. Please remain at the front of the classroom while students are completing the survey. It is important that the students feel comfortable and that no one will see their answers to survey questions.
7. Please refer to the '2023 MIYHS — Classroom Script' document as to how to answer students' questions. Keep the blank paper survey booklet on hand so that you will not have to look at a student's survey to answer specific questions.
8. Complete the online "Day of" Enrollment Form: On the day of survey administration, teachers will use the same 2023 MIYHS survey URL <https://us1se.voxco.com/SE/1422/MIYHS2023/> and use their unique Teacher Code to login and fill out the short "Classroom Summary Information Form" in its entirety. The unique Teacher Code will be provided (on the classroom packet label) and contains the School ID and Class ID teachers need to access the short form to provide the actual count of students in the class on the day of administration. The survey will also ask you to include the actual number of students who are absent on the day of the survey – be sure to list the absent students on the outside of the Classroom envelope label to ensure they can take the survey during the makeup session. These numbers will be updated later by Pan Atlantic Research after the absent students participate in your school's make-up session. Please do hold make-up sessions for absent students - improving the response rate with make-up sessions boosts the reliability of the results.
9. Students should work quietly at their desks when they are finished with the survey. It is okay if a student does not finish in the allotted time. If students have not finished the survey, please ask them to click the "NEXT" button to skip the questions they have not answered and then click the "SUBMIT" button. It is very important that students click the "SUBMIT" button before exiting the survey or closing the webpage.
10. At the end of class, read the last part of the classroom script and insert the unused Access Code cards into the Classroom envelope and be sure to list the absent students on the envelope label to prepare for the makeup session.

After Survey Administration:

At the end of the class period, please return the envelope to the safe, confidential collection area that was designated by your school's MIYHS Coordinator.

Thank you very much for your participation in the 2023 MIYHS!

PLEASE CONTACT YOUR SCHOOL'S DESIGNATED MIYHS COORDINATOR WITH ANY QUESTIONS.

2023 MIYHS – Survey Administration Instructions for Teachers (for paper-based survey administrations)

Prior to Survey Administration:

1. Look through the survey materials to make sure that you have the following:
 - '2023 MIYHS — Classroom Script' document
 - An envelope with a 'Classroom Summary Information Form' label on the front showing the teacher's name that contains all the surveys for your classroom, also used to collect the completed surveys
 - Survey booklets (5th/6th grade) or questionnaire booklets with perforated answer sheets (7th-12th grade)
 - **Are there enough survey materials for the students in your class, including an extra survey booklet for you to read through and refer to during the survey administration period?** If not, please contact your school's designated MIYHS Coordinator IMMEDIATELY. We have provided your Coordinator with extra surveys.
 - **For grades 7 through 12: For each classroom, do the survey booklets have the same SURVEY CODE on them (for example, MS-A, HS-B, etc.) and does this code match the one listed on the front of the 'Classroom Summary Information Form' Envelope?** If not, please contact your school's designated MIYHS Coordinator IMMEDIATELY.
 - A list of students who cannot participate in the survey due to parental/guardian refusal
2. Please familiarize yourself with the '2023 MIYHS — Classroom Script' prior to survey administration.
3. Plan an alternative activity for non-participating students. This activity should be something that students can perform at their desk while the other students are taking the survey, such as reading or working quietly. High participation in the student survey is important to the overall success of the study, so it is important that you select a neutral alternative activity so students are not discouraged from participating in the survey.
4. Verify that your class seating is arranged so that students cannot see each other's answer sheets.
5. Reserve the whole class period (about 45 minutes) on the selected survey date so that your students have time to finish the survey without feeling rushed.

During Survey Administration:

1. The '2023 MIYHS — Classroom Script' document must be carefully and clearly read **word-for-word** to your students at the beginning of the class period.
2. Visibly display the SCHOOL ID and CLASS ID codes (**these are written on the 'Classroom Summary Information Form' on your class envelope**) so that students can fill in the correct codes on their surveys. This is essential: otherwise,

your school runs the risk of its surveys not being processed correctly.

3. If students have questions about the survey, please give them the following contact information:
 - ✓ Korey Pow Haggerty, Maine Center for Disease Control & Prevention, at Korey.Pow@maine.gov or 207-287-5084;
 - ✓ Jean Zimmerman, Maine Department of Education, at Jean.Zimmerman@maine.gov or 207-215-6841; or
 - ✓ The USM Human Protections Administrator,* at usmorio@maine.edu or 207-228-8434.

** Please note that the USM Institutional Review Board has reviewed and approved this study to make sure that students' and parents'/guardians' rights are protected.*

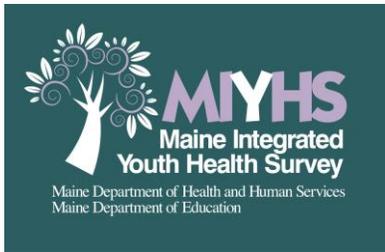

4. Provide students with contact information (name, office #, and/or phone number) of the school's substance use counselor and/or guidance counselor and the Maine Crisis Line (1-888-568-1112). You should refer students to these resources to discuss additional questions or concerns regarding issues raised by the survey.
5. Encourage students to use **pencils** so that they can change their answers if needed. Please note, however, that **blue or black** ink is also acceptable. Do not have students use magic markers or felt-tip pens of any color OR red, pink, orange, or yellow ink of any kind as these colors will not be read by the scanner.
6. Please remain at the front of the classroom while students are completing the survey. It is important that the students feel comfortable and that no one will see their answers to survey questions.
7. Please refer to the '2023 MIYHS — Classroom Script' document as to how to answer students' questions. Keep a blank survey booklet on hand so that you will not have to look at a student's survey to answer specific questions.
8. Complete the 'Classroom Summary Information Form', which is on the front of your class envelope. ***This information is very important to ensure the validity of the data.***
9. Students should work quietly at their desks when they are finished with the survey. It is okay if a student does not finish in the allotted time. Their survey should be collected with the rest of the completed surveys.
10. At the end of class, pass around the classroom survey packet envelope provided and ask students to place their completed survey booklets (5th/6th grade) or detached answer sheets (7th-12th grade) inside. **(Note: For 7th-12th grade classes, only send back the completed answer sheets, do not send back the survey booklets.** This will help keep return mailing costs and processing time to a minimum.) Please monitor this process to ensure that students do not take any answer sheets/surveys out of the envelope as it goes around the room. **Instruct the last person in class to seal the envelope before returning it to you.**

After Survey Administration:

At the end of the class period, please return the classroom survey packet envelope containing all the students' survey booklets (5th/6th grade) or answer sheets (7th-12th grade) to the safe and confidential location that your school's MIYHS Coordinator has designated. **(Note: For 7th-12th grade, recycle the survey booklets that have had their answer sheets torn out.)** Make sure that blank survey booklets are set aside and labeled with the School ID Code and Class ID Code for the absent students. You should either give those surveys to your school's MIYHS Coordinator or hold on to them for the absent students (this will depend on how your school has decided to follow up with absentee students).

Thank you very much for your participation in the 2023 MIYHS!

PLEASE CONTACT YOUR SCHOOL'S DESIGNATED MIYHS COORDINATOR WITH ANY QUESTIONS.

2023 MIYHS – Classroom Script

(For online web-based survey administration)

[PLEASE PASS OUT THE ACCESS CODE CARDS AND READ THE FOLLOWING ALOUD TO THE CLASS:]

Read: “Today, you will have an opportunity to complete the Maine Integrated Youth Health Survey. This survey is part of a study being done by the Maine Department of Health and Human Services and the Maine Department of Education to help us gather the information needed to plan important health-based programs to deal with problems such as drug use or violence in our school and community. This information will also help us to learn how well current programs are working.”

For teachers: Students will now login to the survey at the web address on their Access Code card. The web address (also known as a URL) for the survey is <https://us1se.voxco.com/SE/1422/MIYHS2023/> and is also located on their Access Code cards and listed on the front of this envelope. They may also use the QR Code listed on their cards.

Read: “Please go ahead and login to the survey at the web address on your Access Code card or scan the QR Code. I will read out the web address to type into your browser: h-t-t-p-s, colon, forward slash, forward slash, the letter u, the letter s, the number one, the letter s, the letter e, dot, v-o-x-c-o, dot, c-o-m, forward slash, capital S, capital E, forward slash, 1-4-2-2, forward slash, M-I-Y-H-S-2-0-2-3, all one word, forward slash. Now press Enter. Once you see the landing page, go ahead and enter your Access Code located on your Access Code card. These cards have been distributed randomly and the code is for administrative purposes only. Your answers are confidential and cannot be linked to you in any way.”

Read: “I’m going to read some instructions to you about completing the survey. Please listen carefully and once you log in, you can read the information along with me.”

[READ THE SURVEY INSTRUCTIONS ON THE FRONT PAGE OF A BLANK SURVEY ALOUD TO THE CLASS. Students will see this text after successfully logging in to the survey.]

Read: “If you do not wish to do the survey, please leave it on your desk, and read or work quietly instead. If you choose to participate, please answer the questions as honestly as you can, so that the information from these surveys is correct and useful.”

[AFTER ALL STUDENTS HAVE SUCCESSFULLY ACCESSED THE SURVEY WEBSITE AND LOGGED IN WITH THEIR ACCESS CODES:]

Read “You may begin.”

[INSTRUCTIONS CONTINUE ON SECOND PAGE]

****GENERAL INSTRUCTION FOR ANSWERING STUDENTS' QUESTIONS****

The general responses listed below should be used when a student has a question about a particular item or set of items on the survey. Choose the most appropriate general response from the set of responses listed below:

Student does not understand the question or a particular word in the question:

- "If you are not sure what a particular word or question means, try to answer it to the best of your ability or leave it blank."

Student is not sure if they know the right answer:

- "I want to stress that there are no right or wrong answers. Answer the best that you can."

Student cannot find a response option that fits exactly:

- "If you can't find an answer that fits exactly, choose the one that comes closest."

Student says the question doesn't apply:

- "If the question does not apply to you, try to answer it to the best of your ability or leave it blank."

Student asks why there are no skip patterns:

- "There are no skip patterns in the survey to make sure that student confidentiality is protected."

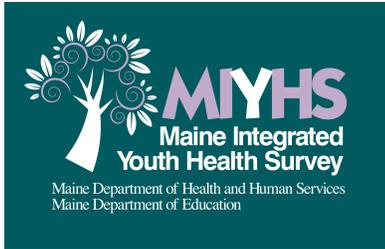

[AT THE END OF THE SURVEY CLASS PERIOD:]

Read: "The survey time is over now. If you have not finished the survey, please click the "NEXT" button to skip the questions you have not answered and then click the "SUBMIT" button. It is very important that you click "SUBMIT" before exiting the survey or closing the webpage. Has everyone clicked "SUBMIT" so that your answers can be recorded? Thank you."

Read: "If this survey has raised concerns about alcohol or drug use or any other issue, please speak to a school counselor or other trusted adult. You can also call the Maine Crisis Line at 888-568-1112. There is also a poster in the School Nurse or Guidance Offices with a variety of crisis hotline numbers. If you have questions about your rights related to the survey, I can give you information on whom to call. On behalf of our school, the Maine Department of Health and Human Services, and the Maine Department of Education, I would like to thank you for your participation in this important study."

Read: "Please go ahead and throw away or recycle your used Access Code cards as you exit the classroom."

[IMMEDIATELY RETURN UNUSED ACCESS CODE CARDS TO THE CLASSROOM ENVELOPE AND WRITE A LIST OF ABSENT STUDENTS ON THE FRONT. THEN DELIVER THIS ENVELOPE TO THE SAFE, CONFIDENTIAL COLLECTION AREA THAT WAS DESIGNATED BY YOUR SCHOOL'S MIYHS COORDINATOR.]

2023 MIYHS – Classroom Script

(For paper-based survey administration)

[PLEASE PASS OUT SURVEYS AND READ THE FOLLOWING ALOUD TO THE CLASS:]

“Today, you will have an opportunity to complete the Maine Integrated Youth Health Survey. This survey is part of a study being done by the Maine Department of Health and Human Services and the Maine Department of Education to help us gather the information needed to plan important health-based programs to deal with problems such as drug use or violence in our school and community. This information will also help us to learn how well current programs are working.”

“I’m going to read some instructions to you about completing the survey. Please listen carefully and read the information along with me.”

[READ THE SURVEY INSTRUCTIONS ON THE FRONT PAGE OF A BLANK SURVEY ALOUD TO THE CLASS.]

“If you do not wish to do the survey, please leave it on your desk, and read or work quietly instead. If you choose to participate, please answer the questions as honestly as you can, so that the information from these surveys is correct and useful.”

“The first thing that we are going to do is to fill out the SCHOOL ID and CLASS ID codes.” **[THE SCHOOL ID AND CLASS ID FROM THE FRONT OF THE CLASSROOM ENVELOPE SHOULD BE WRITTEN ON THE BOARD. THE STUDENTS WILL FILL THESE NUMBERS IN ON THE FRONT PAGE OF THE SURVEY BOOKLETS.]**

[FOR GRADES 7 THROUGH 12 ONLY] *“Gently fold your answer sheet at the perforation line and carefully tear the answer sheet from the survey booklet. Be sure to mark your answers only on the detached answer sheet.”* **[NOTE: If a student rips his or her survey, provide the student with another survey booklet if there are extras in your classroom survey packet. If there are no extra survey booklets, have the student continue taking the survey with the ripped answer sheet.]**

[AFTER STUDENTS HAVE FILLED IN THE IDs AND SEPARATED THEIR ANSWER SHEETS (GRADES 7-12):]

“You may begin.”

[INSTRUCTIONS CONTINUE ON SECOND PAGE]

****GENERAL INSTRUCTION FOR ANSWERING STUDENTS' QUESTIONS****

The general responses listed below should be used when a student has a question about a particular item or set of items on the survey. Choose the most appropriate general response from the set of responses listed below:

Student does not understand the question or a particular word in the question:

- "If you are not sure what a particular word or question means, try to answer it to the best of your ability or leave it blank."

Student is not sure if they know the right answer:

- "I want to stress that there are no right or wrong answers. Answer the best that you can."

Student cannot find a response option that fits exactly:

- "If you can't find an answer that fits exactly, choose the one that comes closest."

Student says the question doesn't apply:

- "If the question does not apply to you, try to answer it to the best of your ability or leave it blank."

Student asks why there are no skip patterns:

- "There are no skip patterns in the survey to make sure that student confidentiality is protected."

[READ TO CLASS AT THE END OF THE SURVEY CLASS PERIOD:]

"The survey time is over now. If you have not finished the survey, please stop where you are and close the survey booklet. I'm passing around an envelope. Please put your survey inside the envelope and pass it to the next person. Will the last person seal the envelope and return it to me?"

"If this survey has raised concerns about alcohol or drug use or any other issue, please speak to a school counselor or other trusted adult. You can also call the Maine Crisis Line at 888-568-1112. There is also a poster in the School Nurse or Guidance Offices with a variety of crisis hotline numbers. If you have questions about your rights related to the survey, I can give you information on whom to call. On behalf of our school, the Maine Department of Health and Human Services, and the Maine Department of Education, I would like to thank you for your participation in this important study."

[IMMEDIATELY RETURN SURVEYS IN THE SEALED ENVELOPE TO THE SAFE, CONFIDENTIAL COLLECTION AREA THAT WAS DESIGNATED BY YOUR SCHOOL'S MIYHS COORDINATOR.]

2023 MIYHS Teacher Training

Core MIYHS Administration Teacher Training based on an **online web-based** implementation at your school.

Course Content

- MIYHS Background
- Importance of consent and confidentiality
- Your responsibilities in administering the survey

Background

- The Maine Integrated Youth Health Survey (MIYHS) has been administered every two years since 2009.
- The MIYHS is sponsored by:
 - Maine Department of Education
 - Maine Department of Health and Human Services, Maine Center for Disease Control and Prevention

Background

- The MIYHS covers a wide range of topics -- from nutrition, physical activity, and performance in school to substance use and other risky behaviors.
- Data obtained from the MIYHS are used for a variety of purposes in evaluating student health and risk behaviors.
- Based on participation rates, schools have access to their own reports, as well as county, public health district and state-level data.
- The results often help point out the areas where improvements have been made. The results can also identify where students may still be at risk, and school administrators can take action in the form of health programs, campaigns and increased awareness.

Importance of Consent

- **Parents have the right to opt their child out of the survey.**
 - Parental consent letters (passive consent) are sent via email (or U.S. Mail) 2-6 weeks prior to the survey administration date.
 - Teachers work with their school's MIYHS Coordinator to ensure that students who have been opted out DO NOT take the survey. Documentation of this is very important.
- **Students also have the right to opt out of the survey.**
 - Teachers MUST NOT try to convince students to take the survey. While student response rates are important, they can be bolstered in other ways, such as providing a make-up session for absent students.

Importance of Confidentiality

- **Student anonymity is extremely important.**
- How can teachers help ensure confidentiality?
 - By making sure students have their own, individual working space to complete surveys.
 - By remaining at the front of the classroom once Access Code cards are passed out and instructions are given, and not wandering around the room.
 - By referring to their copy of the paper survey booklet so they do not have to look at a student's survey to answer any questions.
 - By randomly distributing the Access Code cards to students and utilizing the extra code cards in case of non-working codes.

Importance of Confidentiality

Please note:

- The surveys do not contain skip patterns (e.g., “If you answered ___ to this question, skip ahead to question ___”). This helps protect student confidentiality in that it should take each student approximately the same amount of time to complete the survey, regardless of how they answer the questions.

Teacher Responsibilities in Administering the MIYHS

In the days prior to survey administration:

- Read the “Survey Administration Instructions for Teachers” and the “Classroom Script” documents.
- Be sure the first three digits on the Access Code cards match the one listed on the front of the classroom packet. (E56, HSA, MSB, etc.)
- Check their classroom packet(s) to make sure there are enough Access Code cards, including a paper survey booklet for the teacher.
- Contact the school’s designated MIYHS Coordinator if there are not enough Access Code cards or if there seems to be any other problem **ASAP PRIOR** to the survey administration period so that the issue can be resolved before the students take the survey.

Teacher Responsibilities in Administering the MIYHS

During survey administration:

- Be sure that any students whose parents refused their participation, who decline to participate in the survey themselves, and those whose parental consent letters are returned undeliverable are: 1) **NOT** surveyed, and 2) given an alternative activity during survey administration.
- Follow the “Survey Administration Instructions for Teachers” document.
- Display the contact information of the school’s substance abuse counselor and/or guidance counselor, and the State Crisis Hotline (1-888-568-1112) on the front board of the classroom
- Read aloud and follow the “Classroom Script.”

Teacher Responsibilities in Administering the MIYHS

During survey administration (cont.):

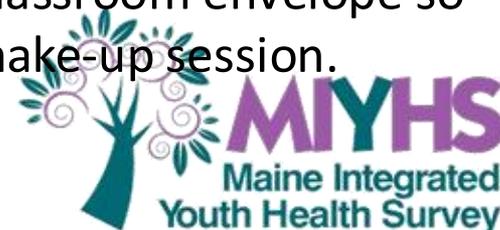

- While the students are taking the survey, teachers should:
 - Remain seated at the front of the room once the Access Code cards are passed out, instructions are given, and students have successfully accessed the onlinesurvey. This is an essential part of preserving students' **anonymity** and **confidentiality**; if teachers are wandering around the room, the students' answers and/or privacy may be impacted.
 - Refer to the paper copy of the survey so that they do not have to look at a student's survey in order to answer specific questions about survey content. A paper copy of the paper-based survey booklet will be included in each classroom survey packet for this purpose.

Teacher Responsibilities in Administering the MIYHS

During survey administration (cont.):

- While the students are taking the survey, teachers should:
 - Fill out the “Online Classroom Summary Information Form” in its entirety using the Teacher Access Code included with your survey materials. Include the actual number of students who are absent on the day of the survey. This number will be changed later by Pan Atlantic Research should any of the absent students participate in the school’s make-up session.
 - Return unused Access Code cards back into the Classroom envelope for students who are absent during survey administration. Be sure to write the names of the absent students on the Classroom envelope so that they can be surveyed during your school’s make-up session.

Teacher Responsibilities in Administering the MIYHS

Please note:

- It is okay to clarify questions regarding grammar and vocabulary not related to the survey content. It is not okay, however, to clarify questions that have to do with specific survey content.

Example: A student doesn't understand a question having to do with marijuana. It may be possible that the student doesn't recognize the word as it is spelled. It is acceptable for the teacher to read the question aloud for the student. However, it is not acceptable for the teacher to define the word or give an alternate word for it.

A good way to address students' questions related to survey content is to say, "If you don't know what it means, leave it blank."

- While the survey can be read aloud by a proctor, the survey should only be administered to students who are able to follow along by themselves.

Teacher Responsibilities in Administering the MIYHS

After the survey administration period:

- Teachers should ask students to throw away or recycle all Access Code cards that they used to login to the survey. The codes are single-use so they cards can be safely recycled.
- Deliver the Classroom packets containing all unused Access Code cards and the list of absent students to the school's survey materials collection area, as designated by the MIYHS Coordinator.
- Follow the school's make-up session plan for students absent on the day of the survey administration. **For many schools, completing this step can make the vast difference in the quality of the data contained in their school report at the conclusion of the project.**

Questions?

2023 MIYHS Teacher Training

Core MIYHS Administration Teacher Training based on a **paper-based** implementation at your school.

Course Content

- MIYHS Background
- Importance of consent and confidentiality
- Your responsibilities in administering the survey

Background

- The Maine Integrated Youth Health Survey (MIYHS) has been administered every two years since 2009.
- The MIYHS is sponsored by:
 - Maine Department of Education
 - Maine Department of Health and Human Services, Maine Center for Disease Control and Prevention

Background

- The MIYHS covers a wide range of topics -- from nutrition, physical activity, and performance in school to substance use and other risky behaviors.
- Data obtained from the MIYHS are used for a variety of purposes in evaluating student health and risk behaviors.
- Based on participation rates, schools have access to their own reports, as well as county, public health district and state-level data.
- The results often help point out the areas where improvements have been made. The results can also identify where students may still be at risk, and school administrators can take action in the form of health programs, campaigns and increased awareness.

Importance of Consent

- **Parents have the right to opt their child out of the survey.**
 - Parental consent letters (passive consent) are sent via email (or U.S. Mail) 2-6 weeks prior to the survey administration date.
 - Teachers work with their school's MIYHS Coordinator to ensure that students who have been opted out DO NOT take the survey. Documentation of this is very important.
- **Students also have the right to opt out of the survey.**
 - Teachers MUST NOT try to convince students to take the survey. While student response rates are important, they can be bolstered in other ways, such as providing a make-up session for absent students.

Importance of Confidentiality

- **Student anonymity is extremely important.**
- How can teachers help ensure confidentiality?
 - By making sure students have their own, individual working space to complete surveys.
 - By remaining at the front of the classroom once surveys are passed out and instructions are given, and not wandering around the room.
 - By keeping a copy of their own survey booklet so they do not have to look at a student's survey to answer any questions.
 - By having students pass around the classroom survey packet envelope to deposit their completed surveys, having the last student seal the envelope.

Importance of Confidentiality

Please note:

- The surveys do not contain skip patterns (e.g., “If you answered ___ to this question, skip ahead to question ___”). This helps protect student confidentiality in that it should take each student approximately the same amount of time to complete the survey, regardless of how they answer the questions.

Teacher Responsibilities in Administering the MIYHS

In the days prior to survey administration:

- Read the “Survey Administration Instructions for Teachers” and the “Classroom Script” documents.
- Be sure the survey codes printed on all surveys match the one listed on the front of the packet. (5/6, HS-A, MS-B, etc.)
- Check their classroom packet(s) to make sure there are enough survey materials, including an extra survey booklet for the teacher.
- Contact the school’s designated MIYHS Coordinator if there are not enough surveys or if there seems to be any other problem with the surveys **ASAP PRIOR** to the survey administration period so that the issue can be resolved before the students take the survey.

Teacher Responsibilities in Administering the MIYHS

During survey administration:

- Be sure that any students whose parents refused their participation, who decline to participate in the survey themselves, and those whose parental consent letters are returned undeliverable are: 1) **NOT** surveyed, and 2) given an alternative activity during survey administration.
- Follow the “Survey Administration Instructions for Teachers” document.
- **MS and HS modules:** Have students gently fold the answer sheet at the perforation line and carefully tear the answer sheet from the survey booklet, instructing them to mark their answers only on the detached answer sheet.

Teacher Responsibilities in Administering the MIYHS

During survey administration (cont.):

- Display the following information on the front board of the classroom:
 - SCHOOL ID and CLASS ID codes (printed on the front of the classroom survey packet)
 - Contact information of the school’s substance abuse counselor and/or guidance counselor, and the State Crisis Hotline (1-888-568-1112)
- Ensure that students use pencil or blue or black ink to complete the survey. Magic markers of any color as well as red, pink, and orange ink will not be read by the scanners and will result in unusable surveys.
- Read aloud and follow the “Classroom Script.”

Teacher Responsibilities in Administering the MIYHS

During survey administration (cont.):

- While the students are taking the survey, teachers should:
 - Remain seated at the front of the room once the surveys are passed out, instructions are given, and students have filled in their SCHOOL ID and CLASS ID codes. This is an essential part of preserving students' **anonymity** and **confidentiality**; if teachers are wandering around the room, the students' answers and/or privacy may be impacted.
 - Keep their own copy of the survey so that they do not have to look at a student's survey in order to answer specific questions about survey content. An extra copy of the survey booklet will be included in each classroom survey packet for this purpose.

Teacher Responsibilities in Administering the MIYHS

During survey administration (cont.):

- While the students are taking the survey, teachers should:
 - Fill out the “Classroom Summary Information Form” printed on the front of the classroom survey packet in its entirety. Include the actual number of students who are absent on the day of the survey. This number will be changed later by Pan Atlantic Research should any of the absent students participate in the school’s make-up session.
 - Set aside blank survey booklets for students who are absent during survey administration. Be sure to fill in the SCHOOL ID and CLASS ID codes for these students. Set the surveys aside so that the surveys can be taken during your school’s make-up session.

Teacher Responsibilities in Administering the MIYHS

Please note:

- It is okay to clarify questions regarding grammar and vocabulary not related to the survey content. It is not okay, however, to clarify questions that have to do with specific survey content.

Example: A student doesn't understand a question having to do with marijuana. It may be possible that the student doesn't recognize the word as it is spelled. It is acceptable for the teacher to read the question aloud for the student. However, it is not acceptable for the teacher to define the word or give an alternate word for it.

A good way to address students' questions related to survey content is to say, "If you don't know what it means, leave it blank."

- While the survey can be read aloud by a proctor, the survey should only be administered to students who are able to follow along by themselves.

Teacher Responsibilities in Administering the MIYHS

After the survey administration period:

- Teachers should have students pass around the envelope provided to deposit their completed surveys, having the last student seal the envelope. Never open the envelope once it has been sealed.
- **MS and HS modules:** Return ANSWER SHEETS ONLY. (Please recycle the survey booklets.)
- Deliver the completed surveys to the school's survey collection area, as designated by the MIYHS Coordinator.
- Follow the school's make-up session plan for students absent on the day of the survey administration. **For many schools, completing this step can make the vast difference in the quality of the data contained in their school report at the conclusion of the project.**

APPENDIX C: DATA EDITING PROTOCOL

APPENDIX C – Data Editing Protocol

I. Data Edits

Editing consisted of checking responses for range, height/weight plausibility, and logical consistency. Data deemed invalid were set to missing.

1. Single Question Edits

- If the response to a question did not correspond to one of the possible responses, the response for that question was invalid and was set to missing. For example, this type of edit would occur if the response options for a question are “A” or “B” and the response recorded was “C”, “D”, “E”, “F”, “G”, or “H”.
- If more than one response was selected for a question, the response for that question was considered to be invalid and was set to missing. The one exception to this was the race question, which could have multiple responses.

2. Height, Weight, and Body Mass Index (BMI) Edits

The following discussion applies only to survey modules that asked height and weight.

a. Height/Weight Edits:

Height was read as a three-column character variable. It was not compressed or justified by the scanning program. The possible responses for the first column ranged from “3” to “7” and indicated feet; the possible responses for the second and third columns ranged from “00” to “11” and indicated inches. The height in feet and inches was converted to height in meters using the formula below.

$$\text{Height (in m)} = [(\text{feet} \times 12) + \text{inches}] \times 0.0254 \text{ m/in}$$

- If either feet or inches was not filled in or was unreadable, then *Height* was set to missing.
- If *Weight* was missing or set to missing, then *Height* was set to missing.

Weight was read as a three-column character variable. It was not compressed or justified by the scanning program. The first column indicated 100s of pounds ranging from “0” to “3”; the second column indicated 10s of pounds and ranged from “0” to “9”; the third column indicated single pounds and ranged from “0” to “9”. The weight in pounds was then converted to weight in kilograms using the following formula:

$$\text{Weight (in kg)} = \text{Weight (in lbs)} \times 0.4536 \text{ kg/lb}$$

- If any weight-related column was left blank or was unreadable, all columns were set to missing and *Weight* was set to missing.

APPENDIX C – Data Editing Protocol

- If *Height* was missing or set to missing, then *Weight* was set to missing.

b. BMI Edits:

BMI was calculated using *Height* and *Weight* in the following formula:

$$BMI = kg/m^2 = Weight (in kg) / [Height (in m)]^2$$

- If *Height* or *Weight* were missing, BMI was set to missing
- If age or sex was missing, *Height*, *Weight*, and BMI were set to missing because the biologically implausible limits (see Section 2c) were based on age and sex.

c. Biologically Implausible Value Edits:

When the basic edits for BMI were complete, further edits were applied to *Height*, *Weight*, and BMI to ensure the results were biologically plausible. *Height*, *Weight*, and BMI were set to missing when an observation was outside the following limits developed by the Division of Nutrition, Physical Activity and Obesity, CDC.

Age	Males	Females
≤ 10	Weight: 13.61-90.72 kg Height: 0.94-1.68 m BMI: 11.5 –41	Weight: 13.61-90.72 kg Height: 0.94-1.73 m BMI: 11-40
11-12	Weight: 20.41-136.08 kg Height: 1.02-1.83 m BMI: 11.5-41	Weight: 15.88-136.08 kg Height: 1.02-1.83 m BMI: 11-40
13-14	Weight: 27.22-181.44 kg Height: 1.27-1.98 m BMI: 13-55	Weight: 27.22-181.44 kg Height: 1.27-1.98 m BMI: 13-55
≥ 15	Weight: 31.75-181.44 kg Height: 1.27-2.11 m BMI: 13-55	Weight: 27.22-181.44 kg Height: 1.27-1.98 m BMI: 13-55

3. Logical Consistency Edits

The majority of the edit criteria compare two questions at a time to ensure logical consistency. If responses from two questions conflicted logically, both questions were set to blank. (Exception – data from demographic questions were not set to missing in this case.) A list of these edits can be made available on request.

APPENDIX C – Data Editing Protocol

4. Subversion of Records

Records were marked “subverted” under the following conditions:

When there were more than 50 total questions on a module and if a **student provided 20 or fewer valid answers** or answered with b, c, d, e, f, g, or h 15 or more times in a row, the case was removed from analysis.

When there are 50 or fewer total questions on a module and if a **student provided 15 or fewer valid answers** or answered with b, c, d, e, f, g, or h 12 or more times in a row, the case was removed from analysis.

Subverting records eliminates records that are judged too incomplete overall to be valid for analysis.

APPENDIX D: RESPONSE RATES

Appendix D – 2023 Response Rates

5/6 Response Rate (without volunteer schools) – State Level

2023	Schools in the Sample	Participating Schools	Students Enrolled in Participating Schools	Participating Students	School Response Rate	Student Response Rate	Overall Response Rate
State	157	63	5082	4093	40.1%	80.5%	32.3%
