¹ Unitil may perform multiple repairs on a single leak ID until there is no gas found upon re-check. As a result, all leak repairs are reported, but may not tie back to a new or carried over leak of a given month. The summary may vary from month to month due to potential record lag within the system.

Note: A combustible gas in a distribution line must contain a natural odorant or be odorized so that at a concentration in air of one-fifth of the lower explosive limit (1% GIA), the gas is readily detectable by a person with a normal sense of smell.

If the readings do not meet this threshold the test will be considered 'failed' and a supervisor must be contacted immediately.
