## **Maine Public Utilities Commission**

### **Annual Report on Long-term Contracts**

Presented to the Joint Standing Committee on Energy, Utilities and Technology

**January 3, 2023** 

#### I. INTRODUCTION

During its 2017 session, the Legislature enacted an Act to Increase Investment and Regulatory Stability in the Electric Industry (Act).<sup>1</sup> Section 2 of the Act, now codified at 35-A M.R.S. § 3210-C(3), provides in part that:

By January 1st of each year, the commission shall submit a report to the joint standing committee of the Legislature having jurisdiction over energy and utilities matters on the procurement of transmission capacity, capacity resources, energy and renewable energy credits in the preceding 12 months under this subsection, the Community-based Renewable Energy Act and deep-water offshore wind energy pilot projects under Public Law 2009, chapter 615, Part A, section 6, as amended by Public Law 2013, chapter 369, Part H, sections 1 and 2 and chapter 378, sections 4 to 6. The report must contain information including, but not limited to, the number of requests for proposals by the commission for long-term contracts, the number of responses to requests for proposals pursuant to which a contract has been finalized, the number of executed term sheets or contracts resulting from the requests for proposals, the commission's initial estimates of ratepayer costs or savings associated with any approved term sheet, actual ratepayer costs or savings for the previous year associated with any procurement, the total ratepayer costs or savings at the time of the report and the megawatt-hours, renewable energy credits or capacity produced or procured through contracts. The report must also include a plan for the succeeding 12 months pertaining to the procurement of capacity resources, energy and renewable energy credits, including dates for requests for proposals, and types of resources to be procured.

The Commission hereby submits its annual report to the Joint Standing Committee on Energy, Utilities and Technology regarding long-term contracts.

#### II. COMPETITIVE SOLICITATIONS DURING 2022

A. Competitive Solicitations pursuant to 35-A M.R.S. §3210-C

The Commission did not conduct a competitive solicitation pursuant to Section 3210-C during 2022. The Commission has not determined whether it will conduct a Section 3210-C solicitation during 2023.

B. <u>Competitive Solicitations pursuant to the Community-Based Renewable</u> Energy Pilot Program

During 2022, the Commission did not conduct any competitive solicitations for the Community-Based Renewable Energy Pilot Program. The Commission's authority to

<sup>&</sup>lt;sup>1</sup> P.L. 2017, c. 134.

award contracts governed by this program expired on December 31, 2015. Accordingly, no future solicitations are planned.

Since 35-A M.R.S. § 3610 specifies that the Commission may not issue an order after December 31, 2015 directing an investor-owned transmission and distribution utility to enter into a long-term contract nor allow a consumer-owned transmission and distribution utility to enter into a long-term contract related to community-based renewable energy pilot program projects, the Commission suggests amending 35-A M.R.S. § 3210-C(3) to remove the reporting requirement for community-based renewable energy pilot program solicitations.

# C. <u>Competitive Solicitations Pursuant to the Deep-water Offshore Wind Energy</u> <u>Pilot Program</u>

The Commission did not conduct any competitive solicitations pursuant to deepwater offshore wind energy program during 2022. The Commission no longer has the authority to award additional contracts governed by this program. Accordingly, no future solicitations are planned.

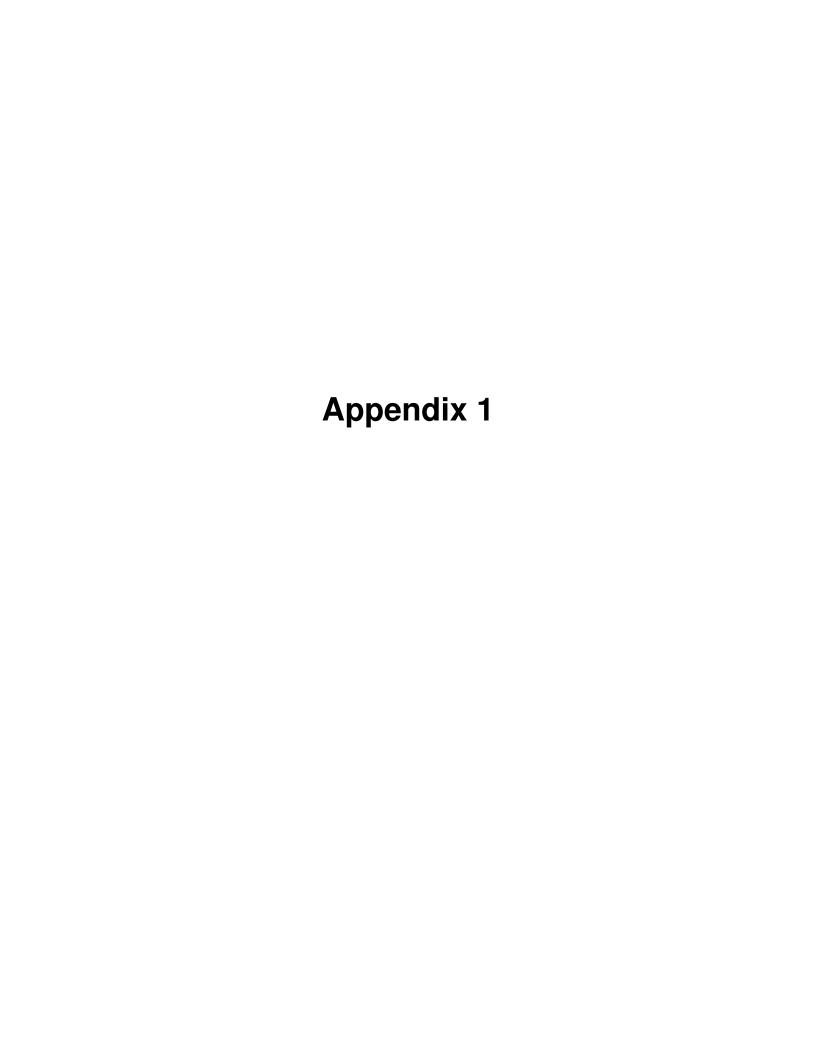

## III. RATEPAYER COSTS OR SAVINGS ASSOCIATED WITH PRIOR SOLICITATIONS

The Commission's Annual Report on Long-Term Contracts dated January 1, 2018, included extensive information on the contracts that have been authorized or executed and the historical cost or benefit to ratepayers of contracts authorized pursuant to Section 3210-C, the Community Based Renewable Energy Pilot Program and the Offshore Wind Pilot Program.<sup>2</sup>

This Report provides updated information regarding the MWh generation, contract costs and wholesale market revenues for each contract facility that has reached commercial operations. As shown in Appendix 1, the above-market benefits, i.e., wholesale market revenue net of contract costs, for these contracts for the 12-month period ending November 2022 totals approximately \$13.9 million in savings to ratepayers.
