Fuel Type		Capacity (MW AC)	
Initial In-Service Date	Click drop down to choose date==>		
New Renewable Capacity Resource Category (as defined in Chapter 311 §2(T))			
NEPOOL GIS (IMP, MSS or NON) and/or NAR Generator ID number			

**Supporting Documentation Check**

<p>Is this facility certified for any other state's RPS program?</p> <p><i>If yes, provide documentation of certification for comparable portfolio requirements in other states.</i></p>	
<p>Is this facility seeking certification as an addition to an existing facility?</p> <p><i>If yes, provide historical output and means to determine incremental output.</i></p>	
<p>Is this facility seeking certification under resumed operations?</p> <p><i>If yes, provide the time period for which the facility did not operate, the reasons the facility did not operate, and the date operation resumed.</i></p>	
<p>Is this facility seeking certification under refurbishment?</p> <p><i>If yes, provide a description of facility refurbishment, the degree to which the useful life has been extended, and the use of an alternate technology and resulting efficiency increases.</i></p>	

Is the facility seeking certification a hydroelectric generator?

*If yes, provide documentation demonstrating compliance or exemption with all applicable state and federal fish passage requirements.*

### Additional Questions

Will this facility serve load “behind the meter”?

Will this facility be participating in Maine’s Net Energy Billing (NEB) Kilowatt-Hour Credit Program?

Will this facility be participating in Maine’s NEB Tariff Rate Program?

*If yes, please contact the interconnecting utility regarding RPS certification. The interconnecting utility will petition for RPS certification on behalf of NEB Tariff Rate Program facilities.*

Will this facility be considered an “assisted project”?

*During its 2022 session, Maine’s Legislature enacted [An Act Concerning Equity in Renewable Energy Projects and Workforce Development P.L. 2021, ch 705](#). The Act contains labor requirements for “assisted projects.” Assisted projects include generation projects: that receive certification for Maine’s RPS; are located in Maine; are 2 MW or greater; and for which requests for bids or proposals for site preparation, construction, retrofitting and demolition work were initiated on or after January 1, 2023. Title 26, section 1311 specifies that certain records must be kept and filed with the Maine Public Utilities Commission on a monthly basis.*

Use of this application form is not required. Submitted applications must contain all information required by [Chapter 311](#) § 3(C)(2) and be filed electronically into the Commission’s Case Management System (CMS).
