

Try “sifting and sorting” to find the resource you need!

The new Digital Maine Library provides a fun and visual way to narrow down the number of resources you may want to explore for the information you seek.

Our “Sift and Sort” technology allows you to sort by subject, resource type or audience.

An elementary school student or teacher can select Elementary for the drop-down menu under Audience.

The resulting list of resources are those that we have tagged with the Elementary identifier. If you click on the Elementary tag, a page is created by the database for you to bookmark.
