

Make a GREENHOUSE

Inside this bag you have almost everything you need to create a greenhouse

PROVIDED	FROM HOME
Cotton balls	Water
Seeds	Tape

Seed + Warmth + Water = Plant

The plastic bag creates a mini greenhouse that makes warm, moist air from the sunlight shining through the window. The water in the cotton balls also helps the happy seeds sprout quickly.

OVER

STEP 1: To prep the seeds, soak in water overnight to speed up germination.

STEP 2: Next morning, dip cotton balls in water—squeeze them out so they are wet, but not dripping.

STEP 3: Place cotton balls and seeds into plastic bag. Seal.

STEP 4: Tape your “greenhouse” to a sunny window in your home.

STEP 5: Watch the progress of your seeds. They should sprout within a week. (If you would like, plant the sprout in soil when it is a hearty sprout.)
