150,000.00	\$14.42	\$750.00	\$1,199.00
175,000.00	\$16.83	\$875.00	\$1,199.00
200,000.00	\$17.74	\$922.50	\$1,199.00

\*These are the employee's estimated earnings in the last year. The base period is a window of four calendar quarters before the employee's leave starts. Employers report quarterly earnings (total wages after certain pre-tax deductions like contributions to an employer sponsored health plan) of all their employees. Reported earnings from the Base Period quarters are used to calculate the employee's Weekly Benefit Amount.

\*\*Assuming the employee continues to earn what they earned during the Base Period.

\*\*\*This is the employee's weekly premium added up to show the total premium in a year. The premium amount is capped on wages above the Social Security Administration wage cap. The current 2026 maximum amount of \$184,500 is used above.

\*\*\*\*The weekly benefit amount is capped at the State Average Weekly Wage. The current average of \$1,199.00 (rounded) is used above.
