B. Use of Estimates in the Preparation of the Financial Statement

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities. It also requires estimates in the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of the revenue and expenses during the period. The most significant estimates affecting the Company's financial statements involve the estimation of future indemnity losses and loss adjustment expenses to be incurred by the Company and the level of reserves required to adequately cover the estimate. Actual results could differ from these estimates.

C. Accounting Policy

Direct and ceded premiums are earned over the terms of related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct and ceded business. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Net investment income earned consists primarily of interest and dividend income, less investment related expense. Interest income is recognized on an accrual basis and dividends are recognized on an ex-dividend basis. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed, or otherwise disposed of. Realized capital losses include writedowns for impairments considered to be other than temporary.

In addition, the Company uses the following accounting policies:

- (1) Investments with maturities of less than one year at the time of acquisition are considered short-term investments and are stated at amortized cost using the interest method. Non-investment grade short-term investments are stated at the lower of amortized cost or fair value.
- (2) Investment grade bonds not backed by other loans are stated at amortized cost using the interest method. Non-investment grade bonds with NAIC designations of 3 through 6 are stated at the lower of amortized cost or fair value. Declines in market values that are determined to be other than temporary are recorded as realized losses. The new cost basis is not changed for subsequent recoveries.
- (3) Common stocks, other than investments in subsidiaries and affiliates, are stated at fair value. Declines in market values that are determined to be other than temporary are recorded as realized losses. The new cost basis is not changed for subsequent recoveries.
- (4) Stated Basis of Preferred Stock
Not Applicable
- (5) Valuation of Mortgage Loans
Not Applicable
- (6) Investment grade loan-backed securities are stated at amortized cost. The retrospective adjustment method is used to value all loan-backed securities. Non-investment grade loan-backed securities are stated at the lower of amortized cost or fair value.

The carrying value and final NAIC designation for non-agency residential mortgage-backed securities are determined using a special two-step NAIC process. Those assigned an NAIC designation in the first step of 1 or 2 are stated at amortized cost and those assigned a 3 through 6 designation are stated at the lower of amortized cost or fair value. The NAIC designation assigned under the second step of the process is reported for these securities in Schedule D and is used in the risk-based capital calculation.

- (7) Investments in subsidiaries (all non-insurance) are stated at GAAP equity value.

(10) The Company anticipates investment income as a factor when evaluating the need for premium deficiency reserves (see Note 30).

(11) Reserves for unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and an amount, based on past experience (adjusted for expected changes in factors potentially affecting future losses), for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes reported reserves are adequate, the ultimate liability may be in excess of, or less than, the amounts provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.

(12) The Company has a written capitalization policy for purchases of fixed assets. The predefined capitalization threshold under this policy was increased, effective January 1, 2014.

D. Loan-Backed Securities

(1) Prepayment assumptions for loan-backed and structured securities were obtained from broker dealer survey values or internal estimates.

(2) The Company did not recognize any other-than-temporary impairments (OTTI) on loan-backed or structured securities during the period.

(3) The Company did not hold any loan-backed or structured securities with OTTI at the end of the current period.

(4) The following table summarizes unrealized losses on loan-backed securities and structured securities by the length of time that the securities have continuously been in unrealized loss positions:

a.	The aggregate amount of unrealized losses:	1.	Less than 12 Months	\$	91,536
		2.	12 Months or Longer	\$	177,707
b.	The aggregate related fair value of securities with unrealized losses:	1.	Less than 12 Months	\$	3,458,644
		2.	12 Months or Longer	\$	13,660,902

NOTES TO FINANCIAL STATEMENTS

(5) All loan-backed and structured securities in an unrealized loss position were reviewed to determine whether an OTTI should be recognized. For those securities in an unrealized loss position as of the end of the current period, the Company has not made a decision to sell any such securities. The Company has evaluated its cash flow requirements and believes that its liquidity is adequate and it will not be required to sell these securities before recovery of their cost basis. As of the end of the current period, the Company can assert that it has the intent and believes that it has the ability to hold these securities long enough to allow the cost basis of these securities to be recovered. The conclusions are supported by a detailed analysis of the underlying credit and cash flows on each security. Unrealized losses are primarily attributable to credit spread widening and increased liquidity discounts. It is possible that the Company could recognize OTTI in the future on some of the securities held at the end of the current period if future events, information and the passage of time cause it to conclude that declines in value are other than temporary.

NOTE 20 – FAIR VALUE MEASUREMENTS**A. Inputs Used for Assets and Liabilities Measured at Fair Value****(1) Items Measured and Reported at Fair Value by Levels 1, 2 and 3**

The Company has categorized its assets and liabilities that are measured at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows:

Level 1 – Quoted Prices in Active Markets for Identical Assets and Liabilities: This category, for items measured at fair value on a recurring basis, includes exchange-traded common stocks. The estimated fair value of the equity securities and derivatives within this category are based on quoted prices in active markets and are thus classified as Level 1.

Level 2 – Significant Other Observable Inputs: This category, for items measured at fair value on a recurring basis, includes bonds. The estimated fair value of some of these items were determined by independent pricing services using observable inputs. Others were based on quotes from markets which were not actively traded..

Level 3 – Significant Unobservable Inputs: The Company has no assets or liabilities measured at fair value in this category.

Assets at Fair Value	Level 1	Level 2	Level 3	Total
Bonds	\$	\$	\$	\$ 0

(3) Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

F. Subprime Mortgage Related Risk Exposure

(1) Subprime Mortgage Exposures

The Company invests in several asset classes that could be adversely impacted by subprime mortgage exposure including mortgage-backed securities and equity investments in financial institutions. In addition, all investment classes are impacted by market exposure to adverse news in the economy. Conservative investment guidelines limit the Company's exposure to such losses.

The Company identifies non-agency mortgage and asset-backed securities as "subprime" if the underlying collateral consists of residential mortgage or home-equity loans with an average credit score of 660 or lower at the time of origination. Securitized products, such as CDO's (Collateralized Debt Obligations), where a significant fraction of the collateral consists of "subprime" ABS, CMOs or other "subprime" CDOs, would also be considered "subprime."

Subprime risk is measured in terms of both potential mark-to-market losses as well as principal writedowns, with current "exposure" being best defined as the total face amount outstanding on mortgage-backed issues deemed to be "subprime" using the definition above. Top-down risk management strategies include strict limits in dollar and/or percentage terms on the total amount invested in any single issue, limits on the aggregate amount invested in the "subprime" sector and monitoring of the total interest-rate and credit spread-exposure to the "subprime" sector. Bottom-up surveillance includes monitoring of collateral performance, stress testing of the safety of principal and establishing pricing levels based on primary and secondary market activity in identical or similar bonds. Should either effort reveal sector or issue-level concerns, the investment manager's credit committee will investigate the situation and decide whether to reduce the exposure. This reduction may be accomplished either through selling the security or by hedging the economic risk using credit derivatives or other instruments, if such prerogative exist under the then current investment guidelines governing the portfolio.

Changes in asset values are adjusted and reflected on the Company's income statement to the extent such changes reflect other-than-temporary declines in market value, or if there is intent to sell such securities at a loss either to meet cash needs or to restructure the investment portfolio.

(2) Direct Exposure Through Investments in Subprime Mortgage Loans

Not Applicable

(3) Direct Exposure Through Other Investments

The Company invests in several other asset classes that could have subprime mortgage exposure including:

- Residential mortgage-backed securities
- Structured loan-backed securities
- Debt obligations and equity securities of financial institutions participating in subprime lending practices
- Equity and debt investments in companies affiliated with institutions adversely impacted due to participation in holdings of subprime investments

The Company has reviewed its investments in debt obligations to determine that they are investment grade quality, are current for interest payments due, and, in the case of mortgage-backed securities, that such investments are in tranches that have minimal default risk. Default risk on bonds appears to be minimal at present; however, the credit crisis could worsen in the future, negatively impacting the status of obligations held. An estimate of potential future losses has been provided in the financial statements. In the case of equity securities, market values that are less than the cost of securities have been deducted from surplus to the extent such differences do not reflect other-than-temporary declines in market value.

There is no subprime residential mortgage exposure as of the end of the current year.

NOTE 25 – CHANGE IN INCURRED LOSSES AND LOSS ADJUSTMENT EXPENSES (000's omitted)

Current year changes in estimates of the costs of prior year losses and loss adjustment expenses (LAE) affect the current year Statement of Income. Increases in those estimates increase current year expense and are referred to as unfavorable development or prior year reserve shortages. Decreases in those estimates decrease current year expense and are referred to as favorable development or prior year reserve redundancies. Current year losses and LAE reflected on the Statement of Income of \$25,646 were lower by \$5,459 due to favorable development of prior year estimates. This favorable development was approximately 6.6% of the prior year reserves for unpaid losses and LAE reflected on the Balance Sheet of \$83,189.

The first two columns in the table below reflect by line of business the expense on the Statement of Income and what that expense would have been without prior year development (from Schedule P – Part 1). The third column is the difference between the first two columns and reflects the favorable development of \$5,459. The decrease was primarily due to improved experience in the 2011 through 2015 report years. Increases or decreases of this nature occur as a result of claim settlements and receipt and evaluation of additional information regarding unpaid claims. Recent development trends are also taken into account in evaluating the overall adequacy of reserves.

The last two columns reconcile the redundancy shown in the third column to the information shown in Schedule P – Part 2, which includes losses and the defense and cost containment (DCC) portion of LAE, but excludes the adjusting and other (AO) portion of LAE.
