NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of Patriot Insurance Company (Company) are presented on the basis of accounting practices prescribed or permitted by the State of Maine Bureau of Insurance.

The State of Maine Bureau of Insurance recognizes only statutory accounting practices prescribed or permitted by the State of Maine for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Maine Insurance Law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Maine. During 2017 and 2016 there were no recorded differences between State of Maine prescribed practices and NAIC statutory accounting practices.

B. Use of Estimates in the Preparation of the Financial Statements

In preparing the financial statements in conformity with Statutory Accounting Principles, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results may differ from those estimates.

C. Accounting Policies

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premiums are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct and ceded business and are based on reports received from ceding companies for reinsurance assumed. Health premiums are earned ratably over the terms of the related insurance contracts or policies. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Real estate investments are classified in the balance sheet as properties occupied by the company. Properties occupied by the company are carried at depreciated cost less encumbrances. Fair values of properties occupied by the company are based upon market appraisals performed when deemed necessary by the Company using certified valuation techniques.

In addition, the Company uses the following accounting policies:

- Short-term investments are stated at amortized cost which approximates fair value.
- Bonds not backed by other loans are stated at amortized cost using the Scientific Yield to Worst Method. Bonds that are defined by the NAIC as non-investment grade (rated 3 through 6) are carried at the lower of amortized cost or fair market value.
- The Company does not have investments in common stocks.
- Preferred stocks are stated in accordance with the guidance provided in Statement of Statutory Accounting Principle (SSAP) No. 32.
- The Company does not participate in mortgage loans as an investment vehicle.
- Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair value. The retrospective adjustment method is used to value all securities except for interest only securities or securities where the yield has become negative, which are valued using the prospective method.
- The Company does not have investments in subsidiaries, controlled or affiliated companies.
- The Company does not have investments in joint ventures, partnerships or limited liability companies.
- The Company does not have investments in derivative instruments.
- The Company anticipates investment income as a factor in premium deficiency calculations, in accordance with SSAP No. 53, Property-Casualty Contracts – Premiums.
- Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.
- The Company has a written capitalization policy for purchases of items such as real estate, electronic data processing equipment, software, furniture, vehicles and other equipment. This policy was not modified from the prior year.
- The Company does not have pharmaceutical rebate receivables.

D. Loan-Backed Securities

1. The Company's investment advisor uses proprietary models for loss assumptions and widely accepted models for prepayment assumptions in valuing mortgage-backed and asset-backed securities with inputs from major third-party data providers. The models combine the effects of interest rates, volatility and prepayment speeds based on various scenario simulations which produce effective analytics (spreads, duration, convexity) and cash flows on a monthly basis. Credit sensitive cash flows are calculated using a proprietary model which estimate future loan defaults in terms of timing and severity. Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.
2. The Company did not recognize any other-than-temporary impairments on loan-backed securities during the period.
3. The Company did not recognize any other-than-temporary impairments on loan-backed securities during the period.
4. The following summarizes gross unrealized investment losses on loan-backed and structured securities by the length of time that securities have continuously been in an unrealized loss position as of December 31, 2017.

a.	The aggregate amount of unrealized losses:	
1.	Less than twelve months	\$35,000
2.	Twelve months or longer	\$36,000
b.	The aggregate related fair value of securities with unrealized losses:	
1.	Less than twelve months	\$6,041,000
2.	Twelve months or longer	\$2,203,000

5. The Company held certain loan-backed and structured securities that have been continuously in an unrealized loss position at December 31, 2017, as summarized in the above table. After an evaluation of each security, management concluded these securities have not suffered an other-than-temporary impairment in value. Each security has paid all scheduled contractual payments. Nothing has come to management's attention which would lead to the belief that each issuer would not have the ability to meet the remaining contractual obligations of the security, including payment at maturity, and the Company has the capacity to hold the security until the scheduled maturity date.

On December 22, 2017, the Tax Cuts and Jobs Act of 2017 (TCJA) was enacted, reducing the corporate income tax rate from a maximum of 35% down to a 21% flat rate for tax years beginning in 2018 and in future years. Although current income taxes for the 2017 statutory financial statements reflect the 35% tax rate that is in effect for the 2017 tax year, per SSAP No. 101 the deferred tax assets and deferred tax liabilities are required to be computed using the new 21% tax rate that is in effect in 2018 and future years. The resulting impact of the tax rate change from the TCJA in the accompanying 2017 statutory financial statements was a reduction in the Company's net deferred tax asset (and surplus) of \$1.0 million, which is comprised of a decrease in gross deferred tax assets of \$1.1 million offset by a decrease in non-admitted deferred tax assets of \$0.1 million.

Most assessments are recorded either at the time the assessments are levied or, in the case of premium-based assessments, at the time the premiums are written. Financial assets and liabilities that are recorded at fair value on the statutory statements of admitted assets, liabilities and policyholders' surplus are classified based on the level of the fair value measurements hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy is composed of the following levels:

Level 1 – Valuations based on unadjusted quoted prices in active markets for identical assets that our pricing sources have the ability to access. Since the valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant amount of degree of judgment.

Level 2 – Valuations based upon quoted prices for similar assets in active markets, quoted prices for identical or similar assets in inactive markets; or valuations based on models where the significant inputs are observable (e.g., interest rates, yield curves, prepayment speeds, default rates, loss severities) or can be corroborated by observable market data.

Level 3 – Valuations that are derived from techniques in which one or more of the significant inputs are unobservable, including broker quotes which are non-binding.

25. Change in Incurred Losses and Loss Adjustment Expenses

- A. Reserves as of December 31, 2016, were \$34,580,000. As of December 31, 2017, \$11,554,000 has been paid for incurred losses and loss adjustment expenses (LAE) attributable to insured events of prior years. Reserves remaining for prior years are now \$18,138,000 as a result of re-estimation of unpaid losses and LAE. The estimated cost of losses and LAE attributable to insured events of prior years' decreased by \$4,888,000 or 14.1% of the unpaid losses and LAE as of the end of the prior year. The \$4,888,000 favorable development in incurred losses and LAE related to prior accident years is primarily due to favorable development in commercial multiple peril, private passenger auto liability and workers' compensation lines of business. This change is generally the result of the on-going analysis of loss development trends. Increases or decreases of this nature occur as the result of claim settlements during the current year and as additional information is received regarding unpaid individual claims. The Company does not write retrospectively rated policies, and accordingly, prior year loss development was not impacted by this type of policy.
- B. There were no significant changes in methodologies and assumptions used in calculating the liability for unpaid loss and loss adjustment expenses.
