#### B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC Annual Statement Instructions and NAIC SAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

#### C. Accounting Policy

Health premiums are earned over the term of the related insurance policies and reinsurance contracts. Premiums written are reported net of reinsurance ceded and experience rating refunds. Premiums paid by subscribers prior to the effective date are recorded on the balance sheet as premiums received in advance and are subsequently credited to income as earned during the coverage period. Premium rates are subject to approval by the Bureau. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. All other costs, including underwriting expenses, are charged to operations as incurred.

\_\_\_\_\_

In addition, the Company uses the following accounting policies:

- 1) Short-term investments include investments with maturities of less than one year at the date of acquisition and are reported at amortized cost, which approximates fair value.
- 2) Investment grade bonds not backed by other loans are stated at amortized cost, with amortization calculated based on the scientific interest method, using yield to maturity.
- 3) The Company has no investments in common stocks of unaffiliated companies.
- 4) The Company has no investments in preferred stocks.
- 5) The Company has no mortgage loans on real estate.
- 6) Loan-backed securities are stated at either amortized cost or fair value. The retrospective adjustment method is used to value all securities.
- 7) The Company owns 100% of Community Options, LLC.
- 8) The Company has an investment in an unaffiliated limited liability company. The Company reports this investment as an other long-term invested asset on Schedule BA. The asset, which is carried at its Generally Accepted Accounting Principles equity, is nonadmitted for statutory reporting purposes.
- 9) The Company has no derivative instruments.
- 10) The Company uses anticipated investment income as a factor in the premium deficiency reserve calculation.
- 11) Unpaid claims and claims adjustment expenses include management's best estimate of amounts based on historical claim development patterns and certain individual case estimates. The established liability considers health benefit provisions, business practices, economic conditions and other factors that may materially affect the cost, frequency and severity of claims. Liabilities for unpaid claims and claim adjustment expenses are based on assumptions and estimates. While management believes such estimates are reasonable, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and changes in estimates are incorporated into current period estimates.
- 12) The Company has not modified its capitalization policy from the prior period.
- 13) Pharmaceutical rebate receivables are recorded when earned based on actual rebate receivables billed and an estimate of receivables based on current utilization of specific pharmaceuticals and provider contract terms.
