#### B. Use of Estimates in the Preparation of the Financial Statements

No significant change.

#### C. Accounting Policies

- (1) No significant change.
- (2) Investment grade bonds not backed by other loans are stated at amortized cost, with amortization calculated based on the modified scientific method, using lower of yield to call or yield to maturity. Non-investment grade bonds are stated at the lower of amortized cost or fair value as determined by various third-party pricing sources.
- (3) (5) No significant change.

- (6) Loan-backed securities are stated at amortized cost. Pre-payment assumptions for loan-backed securities and structured securities were obtained from broker-dealer survey values or internal estimates. These assumptions are consistent with the current interest rate and economic environment. The retrospective adjustment method is used to value all loan-backed securities. Non-investment grade loan-backed securities are stated at the lower of amortized cost or fair value.
- (7) (13) No significant change.

#### D. Loan-Backed Securities

- (1) Prepayment assumptions for single-class and multi-class mortgage-backed and asset-backed securities were obtained from broker-dealer survey values or internal estimates. The Company used various third-party pricing sources in determining the market value of its loan-backed securities.
- (2) The Company did not recognize other-than-temporary impairments ("OTTI") on its loan-backed securities during the three months ended March 31, 2024.
- (3) The Company did not recognize OTTI on its loan-backed securities at March 31, 2024.
- (4) All impaired securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains):
  - a. The aggregate amount of unrealized losses:

	1.	Less than 12 Months	\$ (25,281)
	2.	12 Months or Longer	\$ (56,357)
The aggregate related fair value of securities with unrealized losses:			
	1.	Less than 12 Months	\$ 3,654,667
	2.	12 Months or Longer	\$ 3 984 687

(5) The Company's bond portfolio is sensitive to interest rate fluctuations, which impact the fair value of individual securities. Unrealized losses on bonds were primarily caused by the effects of the interest rate environment and the widening of credit spreads on certain securities. The Company currently has the ability and intent to hold these securities until their full cost can be recovered. Therefore, the Company does not believe the unrealized losses represent an OTTI at March 31, 2024.

(2) Fair Value Measurement in (Level 3) of the Fair Value Hierarchy

There are no investments in Level 3 as of March 31, 2024.

(3) The Company's policy is to recognize transfers between Levels, if any, as of the beginning of the reporting period.

(4) Fair values of bonds are based on quoted market prices, where available. These fair values are obtained primarily from third party pricing services, which generally use Level 1 or Level 2 inputs, for the determination of fair value to facilitate fair value measurements and disclosures. Level 2 securities primarily include United States government securities, corporate securities, securities from states, municipalities and political subdivisions, mortgage-backed securities and certain other asset-backed securities. For securities not actively traded, the pricing services may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. The Company has controls in place to review the pricing services' qualifications and procedures used to determine fair values. In addition, the Company periodically reviews the pricing services' pricing methodologies, data sources and pricing inputs to ensure the fair values obtained are reasonable.

Certain bonds, primarily corporate debt securities, are designated Level 3. For these securities, the valuation methodologies may incorporate broker quotes or discounted cash flow analyses using assumptions for inputs such as expected cash flows, benchmark yields, credit spreads, default rates and prepayment speeds that are not observable in the markets.

There have been no significant changes in the valuation techniques during the current period.
