B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC Annual Statement Instructions and NAIC SAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

C. Accounting Policy

Health premiums are earned over the term of the related insurance policies and reinsurance contracts. Premiums written are reported net of reinsurance ceded and experience rating refunds. Premiums paid by subscribers prior to the effective date are recorded on the balance sheet as premiums received in advance and are subsequently credited to income as earned during the coverage period. Premium rates are subject to approval by the Bureau. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. All other costs, including underwriting expenses, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments include investments with maturities of less than one year at the date of acquisition and are reported at amortized cost, which approximates fair value.
- (2) Investment grade bonds not backed by other loans are stated at amortized cost, with amortization calculated based on the scientific interest method, using yield to maturity.
- (3) The Company has no investments in common stocks of unaffiliated companies.
- (4) The Company has no investments in preferred stocks.
- (5) The Company has no mortgage loans on real estate.
- (6) Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair value. The retrospective adjustment method is used to value all securities.
- (7) The Company owns 100% of Community Options LLC.
- (8) The Company has an investment in an unaffiliated limited liability company. The Company reports this investment as an other long-term invested asset on Schedule BA. The asset, which is carried at its Generally Accepted Accounting Principles equity, is nonadmitted for statutory reporting purposes.
- (9) The Company has no derivative instruments.

NOTES TO FINANCIAL STATEMENTS

(10)The Company uses anticipated investment income as a factor in the premium deficiency reserve calculation.

(11)Unpaid claims and claims adjustment expenses included management's best estimate of amounts based on historical claim development patterns and certain individual case estimates. The established liability considered health benefit provisions, business practices, economic conditions and other factors that may materially affect the cost, frequency and severity of claims. Liabilities for unpaid claims and claims adjustment expenses are based on assumptions and estimates. While management believes such estimates are reasonable, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continuously reviewed and changes in estimates are incorporated into current period estimates.

(12)The Company has not modified its capitalization policy from the prior period.

(13)Pharmaceutical rebate receivables are recorded when earned based on actual rebate receivables billed and an estimate of receivables based on current utilization of specific pharmaceuticals and provider contract terms.

A. Fair Value Measurements

The Company had no material assets or liabilities measured and reported at fair value at December 31, 2021.

B. Fair Value Measurements Under Other Accounting Pronouncements

Not applicable.

C. Financial Instruments

Certain of the Company’s financial instruments are measured at fair value. The fair values of these instruments are based on valuations that include inputs that can be classified within one of three levels of a hierarchy established by GAAP. The following are the levels of the hierarchy and a brief description of the type of valuation information (inputs) that qualifies a financial asset or liability for each level:

- **Level 1** – Unadjusted quoted prices for identical assets or liabilities in active markets.
- **Level 2** – Inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates and credit risks) and inputs that are derived from or corroborated by observable markets.
- **Level 3** – Developed from unobservable data, reflecting the Organization’s own assumptions.

Financial assets and liabilities are classified based upon the lowest level of input that is significant to the valuation. When quoted prices in active markets for identical assets and liabilities are available, the Company uses these quoted market prices to determine the fair value of financial assets and liabilities and classify these assets and liabilities as Level 1. In other cases where a quoted market price for identical assets and liabilities in an active market is either not available or not observable, the Company estimates fair value using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets and liabilities would then be classified as Level 2. If quoted market prices are not available, the Company determines fair value using broker quotes or an internal analysis of each investment’s financial performance and cash flow projections. Thus, financial assets and liabilities may be classified in Level 3 even though there may be some significant inputs that may be observable.

There have been no significant changes in the valuation techniques during 2021.

The carrying values and estimated fair values of the Company’s financial instruments at December 31, 2021 were as follows:

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
