1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Starmount Life Insurance Company (the Company) have been completed in accordance with Statutory Accounting Principles (SAP) prescribed in the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures* manual. The Maine Bureau of Insurance (the Bureau) has adopted no accounting practices that differ materially from SAP.

| | _ | SSAP# | F/S Page | F/S Line # | 12/31/2022 | 12/31/2021 |

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known, particularly when considering the risks and uncertainties associated with the coronavirus disease 2019 (COVID-19), which could impact the amounts reported and disclosed herein.

C. Accounting Policy

Life and accident and health premiums are recognized as revenue when due from policyholders. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred

Real estate is carried at cost less accumulated depreciation and less encumbrances.

Contract loans are stated at the aggregate unpaid balance.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments and cash equivalents are carried at cost.
- (2) Long-term bonds classified as issuer obligations are generally carried at amortized cost unless they have a NAIC designation of 6, in which case they are stated at the lower of amortized cost or fair value. Issuer obligations are amortized using the interest method.
- (3) Common stock of the Federal Home Loan Bank (FHLB) is carried at cost, which approximates fair value.
- (4) Not applicable
- (5) Not applicable

- (6) Loan-backed and structured securities are stated at amortized cost. Amortization of mortgage-backed and loan-backed securities considers the estimated timing and amount of prepayments of the underlying loans at the date of purchase. Actual prepayment experience is periodically reviewed with significant changes in estimated cash flows from the original purchase assumptions accounted for using the retrospective method.
- (7) Not applicable
- (8) Not applicable
- (9) Not applicable
- (10) The Company considers anticipated investment income in its review of reserves for potential premium deficiencies.
- (11) Liabilities for losses and loss/claim adjustment expenses for accident and health contracts are estimated using statistical claim development models and tabular reserves employing assumptions concerning mortality, morbidity, and social security as well as appropriate discount rates for accident and health business.
- (12) The Company's fixed asset capitalization policy has not changed from the prior period.
- (13) Not applicable
- D. Going Concern

After evaluating the Company's ability to continue as a going concern, management was not aware of any conditions or events which raised substantial doubts concerning the Company's ability to continue as a going concern as of the date these financial statements were issued.

2. Accounting Changes and Corrections of Errors

During 2021, the Company established additional reserves based on an asset adequacy analysis. The Exhibit 5A change increased Exhibit 5 ordinary life reserves by \$750,000 with a corresponding decrease in surplus.

3. Business Combinations and Goodwill

Not applicable

4. Discontinued Operations

Not applicable

- 5. Investments
- A. Not applicable
- B. Not applicable
- C. Not applicable
- D. Loan-Backed Securities
 - (1) Prepayment assumptions for mortgage-backed/loan-backed and structured securities were obtained from broker dealer survey values and internal estimates.
 - (2) Not applicable
 - (3) Not applicable

- (4) As of December 31, 2022, impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment had not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains) were as follows:
 - a. The aggregate amount of unrealized losses:

| 1. Less than 12 months | \$ 354,510 |
|------------------------|---------------|
| 2. 12 months or longer | \$ _ |

b. The aggregate related fair value of securities with unrealized losses:

| 1. Less than 12 months | \$ 5,471,641 |
|------------------------|-----------------|
| 2. 12 months or longer | \$ |

- (5) In determining when a decline in fair value below amortized cost of a security is other than temporary, the Company evaluates the following factors:
 - Whether the Company expects to recover the entire amortized cost basis of the security.
 - Whether the Company intends to sell the security or will be required to sell the security before the recovery of its amortized cost basis.
 - Whether the security is current as to principal and interest payments.
 - The significance of the decline in value.
 - The time period during which there has been a significant decline in value.
 - Current and future business prospects and trends of earnings.
 - The valuation of the security's underlying collateral.
 - Relevant industry conditions and trends relative to their historical cycles.
 - Market conditions.
 - Rating agency and governmental actions.
 - Bid and offering prices and the level of trading activity.
 - Adverse changes in estimated cash flows for securitized investments.
 - Changes in fair value subsequent to the balance sheet date.
 - Any other key measures for the related security.

The Company evaluates available information, including the factors noted above, both positive and negative, in reaching its conclusions. In particular, the Company also considers the strength of the issuer's balance sheet, its debt obligations and near term funding requirements, cash flow and liquidity, the profitability of its core businesses, the availability of marketable assets which could be sold to increase liquidity, its industry fundamentals and regulatory environment, and its access to capital markets. Although all available and applicable factors are considered in the analysis, the expectation of recovering the entire amortized cost basis of the security, whether the Company intends to sell the security, whether it is more likely than not the Company will be required to sell the security before recovery of its amortized cost, and whether the security is current on principal and interest payments are the most critical factors in determining whether impairments are other than temporary. The significance of the decline in value and the length of time during which there has been a significant decline are also important factors, but the Company does not record an impairment loss based solely on these two factors, since often other factors will impact the evaluation of a security.

While determining other-than-temporary impairments is a judgmental area, the Company utilizes a formal, well-defined, and disciplined process to monitor and evaluate its investments, supported by issuer specific research and documentation as of the end of each period. The process results in a thorough evaluation of problem investments and the recording of realized losses on a timely basis for investments determined to have an other-than-temporary impairment.

- 7. Investment Income
- A. The Company does not accrue investment income on bonds where collection of interest is uncertain. All investment income due and accrued amounts that are over 90 days past due are excluded from surplus in accordance with SSAP 34.
- B. The Company did not exclude any amounts from investment income due and accrued as of December 31, 2022.

8. Derivative Instruments

Not applicable

9. Income Taxes

A. On August 16, 2022, the Inflation Reduction Act (IRA) was signed into law and includes certain corporate tax provisions. Impacts to the Company include the enactment of a corporate alternative minimum tax (CAMT), applicable to tax years beginning after December 31, 2022. The CAMT imposes a new 15 percent minimum tax on adjusted financial statement income (AFSI) on corporations that have average AFSI over \$1.0 billion in any prior three-year period, starting with years 2020 to 2022 and is determined on an affiliated group basis. We anticipate that the affiliated group of which the Company is a member will be an applicable corporation as early as 2023. The Company has not determined, as of December 31, 2022, if it will be subject to the CAMT in 2023. The fourth quarter 2022 financial statements do not include an estimated impact of the CAMT because a reasonable estimate cannot be made.

The Components of the net deferred tax assets (liabilities) and change from the prior year are comprised of the following:

| | • | | ` | / | | - | - | | | | |

| Other | 93,057 | (0.3) | (168,727) | 0.9 | | | | | | | |
| Total | \$ (7,699,757) | 23.8 % | 33,015 | (0.2)% | | | | | | | |
| Federal Income Tax Incurred Change in Net Deferred Income Tax | \$ (7,699,757) | 23.8 % 5 | 33,015 | (0.2)% | | | | | | | |
| Total Statutory Income Tax | \$ (7,699,757) | 23.8 % | 33,015 | (0.2)% | | | | | | | |

E. The Company had a federal net operating loss that can be carried forward indefinitely of \$15,517,457 million as of December 31, 2021. The Company utilized all of the federal net operating loss in 2022. The Company had a capital loss carryforward of \$60,122 and \$615,538 at December 31, 2022 and 2021, respectively. The remaining capital loss carryforward as of December 31, 2022 expires in 2023 and 2024. During both 2022 and 2021, the Company has recorded a valuation allowance against its net deferred tax asset as a result of its recent cumulative losses.

The Company has no tax expense available for recoupment in the event of future net losses.

F. The Company filed a separate federal income tax return for five years as required by the Internal Revenue Service following a change in ownership of a life insurance company. The Company was eligible to be included in the consolidated federal income tax return with its parent company, Unum Group, in 2022 and joined the consolidated group in 2022.

The Company's federal income tax return is consolidated with the following entities:

Unum Group (ultimate parent company), Unum Life Insurance Company of America, First Unum Life Insurance Company, Northwind Reinsurance Company, Colonial Life & Accident Insurance Company, Provident Life and Accident Insurance Company, Provident Life and Casualty Insurance Company, The Paul Revere Life Insurance Company, Unum Insurance Company, Duncanson & Holt, Inc., Fairwind Insurance Company, H&J Capital, LLC, Starmount Insurance Agency, Inc., AlwaysCare Benefits, Inc., Starmount Managed Dental of California, Inc., and LeaveLogic, Inc.

The Company is party to a written tax sharing agreement with the consolidated group members listed above. The agreement provides that the portion of the consolidated tax liability allocated to the Company is based on its separate return tax liability. Under the agreement, additional tax benefits are allocated to the Company for its portion of net operating losses and tax credit carryforwards in the year they are used by the consolidated group.

As of December 31, 2022, the Company had no tax related balance outstanding to H&J Capital, LLC and the tax related balance due to Unum Group was \$732,117. As of December 31, 2021, the Company had no tax related balance outstanding with either H & J Capital, LLC or Unum Group.

Tax years subsequent to 2018 remain subject to examination by tax authorities in the U.S.

- G. The Company does not anticipate a significant increase to a loss contingency for income taxes in the next 12 months.
- H. Not applicable
- I. Not applicable

10. Information Concerning Parent, Subsidiaries, Affiliates, and Other Related Parties

- A. Nature of the Relationship: Starmount Life Insurance Company is a wholly-owned subsidiary of H&J Capital, LLC (HJC), a wholly-owned subsidiary of Unum Group. See Schedule Y Part 1 for a complete listing of affiliates.
- B. The capital contributions by HJC to the Company are listed below:

| Date Contributed | Amount Contributed |
|---------------------|-----------------------|
| 12/29/22 | 5,000,000 |
| 11/30/22 | 8,000,000 |
| 09/02/22 | 4,000,000 |
| 06/16/22 | 4,000,000 |
| 03/25/22 | 3,700,000 |
| 12/27/21 | 8,900,000 |
| 09/07/21 | 5,600,000 |

Listed below are the Company's short-term, intercompany borrowings from Unum Group:

| Date | Date Amount | | Interest |
|----------|-------------|----------|----------|
| Borrowed | Borrowed | Repaid | Paid |
| 11/09/22 | 3,000,000 | 11/15/22 | 2,065 |

14. Liabilities, Contingencies and Assessments

- A. Not applicable
- B. Assessments
 - (1) The Company accrues in its financial statements estimates of guaranty fund assessments based on known insolvencies and historical Company state participation levels. A corresponding receivable is recorded for amounts estimated to be recoverable through future state premium tax offsets. Based on notifications the Company has received regarding the insolvency of various external companies, the Company recognized a liability in previous years, the balance of which is \$366,711 at December 31, 2022. The Company cannot determine the periods over which the assessments are expected to be paid.
 - (2) The change in the guaranty asset balance summarized below reflects estimated premium tax offsets of new insolvencies accrued for during 2022, revised estimated premium tax offsets for existing insolvencies based on revised estimated cost information provided by the National Organization of Life and Health Guaranty Associations, and an adjustment for premium tax offsets used.

| Rollforward of Related Asset | December 31, 2022 |
|-------------------------------------------------------------------------------------------------------|-------------------|
| a. Assets recognized from paid and accrued premium tax offsets and policy surcharges prior year-end | \$ 449,566 |
| b. Decreases current year: | |
| Premium tax offset applied | 51,829 |
| c. Increases current year: | |
| Change in cost estimate | 26,975 |
| d. Assets recognized from paid and accrued premium tax offsets and policy surcharges current year-end | \$ 424,712 |

- (3) Not applicable
- C. Not applicable
- D. The Company had no claims related extra contractual obligation losses or bad faith losses stemming from lawsuits.
- E. Not applicable
- F. Unum Group and its insurance subsidiaries, including the Company (collectively, the Group), are defendants in a number of litigation matters that have arisen in the normal course of business, including the matters discussed below. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning the Group's compliance with applicable insurance and other laws and regulations. Given the complexity and scope of the Group's litigation and regulatory matters, it is not possible to predict the ultimate outcome of all pending investigations or legal proceedings or provide reasonable estimates of potential losses, except if noted in connection with specific matters.

In some of these matters, no specified amount is sought. In others, very large or indeterminate amounts, including punitive and treble damages, are asserted. There is a wide variation of pleading practice permitted in the United States courts with respect to requests for monetary damages, including some courts in which no specified amount is required and others which allow the plaintiff to state only that the amount sought is sufficient to invoke the jurisdiction of that court. Further, some jurisdictions permit plaintiffs to allege damages well in excess of reasonably possible verdicts. Based on extensive experience and that of

others in the industry with respect to litigating or resolving claims through settlement over an extended period of time, the Group believes that the monetary damages asserted in a lawsuit or claim bear little relation to the merits of the case, or the likely disposition value. Therefore, the specific monetary relief sought is not stated.

Unless indicated otherwise in the descriptions below, reserves have not been established for litigation and contingencies. An estimated loss is accrued when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated.

Claim Handling Matters

The Company, in the ordinary course of its business, is engaged in claim litigation where disputes arise as a result of a denial or termination of benefits. Most typically these lawsuits are filed on behalf of a single claimant or policyholder, and in some of these individual actions punitive damages are sought, such as claims alleging bad faith in the handling of insurance claims. For its general claim litigation, the Company maintains reserves based on experience to satisfy judgments and settlements in the normal course. Management expects that the ultimate liability, if any, with respect to general claim litigation, after consideration of the reserves maintained, will not be material to the financial condition of the Company. Nevertheless, given the inherent unpredictability of litigation, it is possible that an adverse outcome in certain claim litigation involving punitive damages could, from time to time, have a material adverse effect on the Company's results of operations in a period, depending on the results of operations of the Company for the particular period. The Company is unable to estimate the range of reasonably possible punitive losses.

From time to time class action allegations are pursued where the claimant or policyholder purports to represent a larger number of individuals who are similarly situated. Since each insurance claim is evaluated based on its own merits, there is rarely a single act or series of actions, which can properly be addressed by a class action. Nevertheless, these cases are monitored closely, and the Company defends itself appropriately where these allegations are made.

Miscellaneous Matters

Insurance companies within the Group are examined periodically by their states of domicile and by other states in which they are licensed to conduct business. The domestic examinations have traditionally emphasized financial matters from the perspective of protection of policyholders, but they can and have covered other subjects that an examining state may be interested in reviewing, such as market conduct issues, reserve adequacy, sales practices, advertising materials, licensing and appointing of agents and brokers, underwriting, data security and identification and handling of unclaimed property.

15. Leases

A. Lessee Leasing Arrangements

- (1) The Company leases office space under various noncancelable operating leases under terms that expire through 2024. Rent expense in 2022 and 2021 was \$255,626 and \$226,709, respectively. The Company had no contingent or sublease rentals or liability for early lease terminations as of December 31, 2022.
- (2) At December 31, 2022, the minimum aggregate rental commitments are as follows:

Year Ending

| | December 31 | Oper | Operating Leases | | | |
|----|----------------------------|------|------------------|--|--|--|
| 1. | 2023 | \$ | 87,108 | | | |
| 2. | 2024 | | 42,300 | | | |

There were no direct premiums written through managing general agents and third party administrators for the year ending December 31, 2022.

20. Fair Value Measurements

The fair values of the Company's financial instruments are categorized into a three-level classification. The lowest level input that is significant to the fair value measurement of a financial instrument is used to categorize the instrument and reflects the judgment of management. The valuation criterion for each level is summarized as follows:

- Level 1 Inputs are unadjusted and represent quoted prices in active markets for identical assets or liabilities at the measurement date.
- Level 2 Inputs (other than quoted prices included in Level 1) are either directly or indirectly observable for the asset or
 liability through correlation with market data at the measurement date and for the duration of the instrument's anticipated life.
 Level 2 inputs include, for example, indicative prices obtained from brokers or pricing services validated to other observable
 market data and quoted prices for similar assets or liabilities.
- Level 3 Inputs reflect the Company's best estimate of what market participants would use in pricing the asset or liability at the measurement date. Financial assets and liabilities categorized as Level 3 are generally based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. The inputs reflect the Company's estimates about the assumptions that market participants would use in pricing the instrument in a current period transaction.

See section C for further discussion of the Company's valuation methods and techniques.

A. Not applicable

B. Not applicable

C. Presented as follows are the fair values, admitted values, and categorization by input level of financial instruments held at the reporting date. The admitted values of financial instruments such as cash and cash equivalents, accounts and premiums receivable, accrued investment income, borrowed money, payable for securities lending, and short-term payables approximate fair value due to the short-term nature of the instruments. As such, these financial instruments are not included in the following charts.

| | | | December 31, 2 | 2022 | | | |
|---------------------------------------------------|--------------------------------------|--------------------------------------|-------------------------|------------------------------|-------------------------|-----------------------|----------------------------------|
| Types of Financial Instruments | Aggregate Fair Value | Admitted Values | Level 1 | Level 2 | Level 3 | Net Asset Value (NAV) | Not Practicable (Carrying Value) |
| Admitted Assets Bonds Common Stock Contract Loans | \$ 84,674,816 66,100 1,955,769 | \$ 96,737,264 66,100 1,253,501 | \$ 15,647,765 — — | \$ 69,027,051 66,100 | \$ — — 1,955,769 | \$ — — — | \$ — — — |
| | | | December 31, 2 | 2021 | | | |
| Types of Financial | Aggregate | Admitted | | | | Net Asset | Not Practicable (Carrying |
| Instruments | Fair Value | Values | Level 1 | Level 2 | Level 3 | Value (NAV) | Value) |
| Admitted Assets Bonds Common Stock Contract Loans | \$ 94,549,961 10,000 1,676,908 | \$ 90,617,547 10,000 1,082,286 | \$ 16,407,943 — — | \$ 78,141,976 10,000 — | \$ 42 — 1,676,908 | \$ — — — | \$ — — — |

The following methods and assumptions were used in estimating the fair values of the Company's financial instruments.

Bonds: Fair values are based on quoted market prices, where available. For bonds not actively traded, fair values are estimated using values obtained from independent pricing services. For private placements, the Company either obtains prices from

independent third-party brokers to establish valuations for certain of these securities or uses fair values that are estimated using analyses of similar bonds adjusted for comparability.

Common Stock: FHLB stock valued at cost, which approximates fair value.

Contract Loans: Fair values are estimated using discounted cash flow analyses and interest rates currently being offered to policyholders with similar policies.

Fair values for the Company's insurance contracts other than investment contracts are not required to be disclosed. However, the fair values of liabilities under all insurance contracts are taken into consideration in the Company's overall management of interest rate risk, which minimizes exposure to changing interest rates through the matching of investment maturities with amounts due under insurance contracts.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and, therefore, represents an exit price, not an entry price. The exit price objective applies regardless of a reporting entity's intent and/or ability to sell the asset or transfer the liability at the measurement date.

The degree of judgment utilized in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices in active markets generally have more pricing observability and less judgment utilized in measuring fair value. An active market for a financial instrument is a market in which transactions for an asset or a similar asset occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value and should be used to measure fair value whenever available. Conversely, financial instruments rarely traded or not quoted have less observability and are measured at fair value using valuation techniques that require more judgment. Pricing observability is generally impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction, and overall market conditions.

Valuation techniques used for assets and liabilities accounted for at fair value are generally categorized into three types. The market approach uses prices and other relevant information from market transactions involving identical or comparable assets or liabilities. The income approach converts future amounts, such as cash flows or earnings, to a single present amount, or a discounted amount. The cost approach is based upon the amount that currently would be required to replace the service capacity of an asset, or the current replacement cost.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available that can be obtained without undue cost and effort. In some cases, a single valuation technique will be appropriate (for example, when valuing an asset or liability using quoted prices in an active market for identical assets or liabilities). In other cases, multiple valuation techniques will be appropriate. If the Company uses multiple valuation techniques to measure fair value, it evaluates and weighs the results, as appropriate, considering the reasonableness of the range indicated by those results. A fair value measurement is the point within that range that is most representative of fair value in the circumstances.

The selection of the valuation method(s) to apply considers the definition of an exit price and depends on the nature of the asset or liability being valued. The Company generally uses valuation techniques consistent with the market approach, and to a lesser extent, the income approach. The Company believes the market approach provides more observable data than the income approach, considering the type of investments the Company holds. The Company's fair value measurements could differ significantly based on the valuation technique and available inputs. When using a pricing service, the Company obtains the vendor's pricing documentation to ensure the Company understands their methodologies. The Company periodically reviews and approves the selection of its pricing vendors to ensure the Company is in agreement with their current methodologies. When markets are less active, brokers may rely more on models with inputs based on the information available only to the broker. The Company's internal investment management professionals, which include portfolio managers and analysts, monitor securities priced by brokers and evaluate their prices for reasonableness based on benchmarking to available primary and secondary market information. In weighing a broker quote as an input to fair value, the Company places less reliance on quotes that do not reflect the result of market transactions. The Company also considers the nature of the quote, particularly whether it is a bid or market quote. If prices in an inactive market do not reflect current prices for the same or similar assets, adjustments may be necessary to arrive at fair value. When relevant market data is unavailable, which may be the case during periods of market uncertainty, the income approach can, in suitable circumstances, provide a more appropriate fair value. During 2022, the Company has applied valuation approaches and techniques on a consistent basis to similar assets and liabilities and consistent with those approaches and techniques used at year end 2021.

The Company uses observable and unobservable inputs in measuring the fair value of its financial instruments. Inputs that may be used include the following:

- Market maker prices and price levels
- Trade Reporting and Compliance Engine (TRACE) pricing
- Prices obtained from external pricing services

- Benchmark yields (Treasury and interest rate swap curves)
- Transactional data for new issuance and secondary trades
- Security cash flows and structures
- Recent issuance/supply
- Sector and issuer level spreads
- Security credit ratings/maturity/capital structure/optionality
- Corporate actions
- Underlying collateral
- Prepayment speeds/loan performance/delinquencies/weighted average life/seasoning
- Public covenants
- Comparative bond analysis
- · Relevant reports issued by analysts and rating agencies
- Audited financial statements

The management of the Company's investment portfolio includes establishing pricing policy and reviewing the reasonableness of sources and inputs used in developing pricing. The Company reviews all prices that vary between multiple pricing vendors by a threshold that is outside of a normal market range for the asset type. In the event the Company receives a vendor's market price that does not appear reasonable based on its market analysis, the Company may challenge the price and request further information about the assumptions and methodologies used by the vendor to price the security. The Company may change the vendor price based on a better data source such as an actual trade. The Company also reviews all prices that did not change from the prior month to ensure that these prices are within the Company's expectations. The overall valuation process for determining fair values may include adjustments to valuations obtained from the Company's pricing sources when they do not represent a valid exit price. These adjustments may be made when, in the Company's judgment and considering its knowledge of the financial conditions and industry in which the issuer operates, certain features of the financial instrument require that an adjustment be made to the value originally obtained from the Company's pricing sources. These features may include the complexity of the financial instrument, the market in which the financial instrument is traded, credit structure, concentration, or liquidity. Additionally, an adjustment to the price derived from a model typically reflects the Company's judgment of the inputs that other participants in the market for the financial instrument being measured at fair value would consider in pricing that same financial instrument. In the event an asset is sold, the Company tests the validity of the fair value determined by its valuation techniques by comparing the selling price to the fair value determined for the asset in the immediately preceding month end reporting period closest to the transaction date.

The parameters and inputs used to validate a price on a security may be adjusted for assumptions about risk and current market conditions on a quarter to quarter basis, as certain features may be more significant drivers of valuation at the time of pricing. Changes to inputs in valuations are not changes to valuation methodologies; rather, the inputs are modified to reflect direct or indirect impacts on asset classes from changes in market conditions.

Certain of the Company's investments do not have readily determinable market prices and/or observable inputs or may at times be affected by the lack of market liquidity. For these securities, the Company uses internally prepared valuations, including valuations based on estimates of future profitability, to estimate the fair value. Additionally, the Company may obtain prices from independent third-party brokers to aid in establishing valuations for certain of these securities. Key assumptions used to determine fair value for these securities include risk free interest rates, risk premiums, performance of underlying collateral (if any), and other factors involving significant assumptions which may or may not reflect those of an active market.

The Company considers transactions in inactive or disorderly markets to be less representative of fair value. The Company uses all available observable inputs when measuring fair value, but when significant other unobservable inputs and adjustments are necessary, it classifies these assets or liabilities as Level 3.

25. Change in Incurred Losses and Loss Adjustment Expenses

- A. As of December 31, 2021, reserves for unpaid claim and claim adjustment expenses attributable to claims incurred on or before that date were \$11,990,793. For the twelve months ended December 31, 2022, \$10,885,051 had been paid for incurred claims and claim adjustment expenses attributable to claims incurred in prior years. As of December 31, 2022, reserves remaining for prior years were \$24,115 as a result of re-estimation of unpaid claims and claim adjustment expenses, principally on accident and health policies. Therefore, there has been a favorable prior year development of \$1,081,627 for the period December 31, 2021 to December 31, 2022. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims.
- B. There were no significant changes in methodologies and assumptions used in calculating the liability for unpaid losses and loss adjustment expenses.

31. Reserves for Life Contracts and Annuity Contracts

- (1) The Company waives deduction of deferred fractional premiums upon death of the insured and returns any portion of the final premium beyond the date of death. Surrender values are not promised in excess of legally computed reserves.
- (2) The extra reserve on annual premium policies subject to an extra premium is one-half the extra annual gross premium. The extra reserve for single premium policies subject to an extra premium is one-half the extra gross single premium. The rating-up in age method and liens are not used by the Company.
- (3) As of December 31, 2022, the Company had \$26,489,700 of insurance in force for which the gross premiums are less than the net premiums according to the standard valuation required by the State of Maine. Reserves to cover the above insurance totaled the gross amount of \$105,188 at year-end and are reported in Exhibit 5, Life Insurance and Annuities sections.
- (4) The tabular interest, tabular less actual reserve released, and tabular cost have each been determined by formula as described in the instructions.
- (5) Not applicable

(6) There were no other material reserve changes.

36. Loss/Claim Adjustment Expenses

The liability for unpaid accident and health claim adjustment expenses as of December 31, 2022 and 2021 was \$188,732 and \$213,515, respectively.

The Company incurred \$3,274,392 and paid \$3,299,175 of claim adjustment expenses during 2022, of which \$193,839 of the paid amount was attributable to insured or covered events of prior years. The Company did not increase or decrease the provision for insured events of prior years.

The Company took into account estimated anticipated salvage and subrogation in its determination of the liability for unpaid claims/losses. There was no material value to the estimated salvage and subrogation.

GENERAL INTERROGATORIES
