Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of Taro Health Plan of Maine, Inc. (Company) have been prepared on the basis of accounting practices prescribed or permitted by the Maine Bureau of Insurance. The state of Maine requires insurance companies domiciled in the state of Maine to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the Maine Bureau of Insurance. The Company does not have any permitted practices.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in these financial statements and notes. Actual results could differ from these estimates.

C. Accounting Policy

Health premiums received are recognized as income in the month of coverage. Premiums are reported net of reinsurance. Claims are reported based on the service date of services rendered. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, will be charged to operations as incurred. Expenses for management and administration of the organization are charged to operations as incurred.

- (9) Derivatives - Not Applicable
- (10) The Company does not anticipate investment income when evaluating the need for premium deficiency reserves, in accordance with SSAP 54 Individual and Group Accident and Health Contracts.
- (11) Unpaid claims and claim adjustment expenses include management's best estimate of amounts based on historical claim development patterns and certain individual case estimates. The established liability considers health benefit provisions, business practices, economic conditions and other factors that may materially affect the cost, frequency and severity of claims. Liabilities for unpaid claims and claim adjustment expenses are based on assumptions and estimates, and while management believes such estimates are reasonable, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
- (12) Changes in capitalization policy - Not Applicable
- (13) Pharmacy rebates are recorded based on information received from the pharmacy benefit manager. Additionally, estimates are made for unreceived rebates based on historical trends.

D. Going Concern

The Plan has sustained recurring losses from operations since its inception in 2022 and has relied on capital contributions from the Parent. Based on historical results, the Plan is expected to incur losses through the going concern evaluation period. However, the Parent has committed to continue to make capital contributions up to \$1,000,000 to meet needed liquidity and capital needs. Management believes that they will have the liquidity to meet their obligations as they become due during the going concern evaluation period.

20. Fair Value Measurements

A. Fair Value Measurement

SSAP 100, Fair Value Measurements, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are described as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.

Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Company believes its valuation methods are appropriate and consistent with other market participants. The use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

(1) Fair value measurements at reporting date
