#### 1. Summary of Significant Accounting Policies and Going Concern

#### A. Accounting Practices

The financial statements of WellCare of Maine, Inc. (the "Company"), domiciled in the state of Maine, are presented on the basis of accounting practices prescribed or permitted by the Maine Bureau of Insurance (the "Department").

The Department recognizes only statutory accounting practices prescribed or permitted by the state of Maine for determining and reporting the financial condition, results of operations, and cash flows of an insurance company for determining its solvency under Maineinsurance law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures manual, ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the state of Maine.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Maine is shown below:

5. For any security in an unrealized loss position, the Company assesses whether it intends to sell the security or if it is more likely than not that the Company will be required to sell the security before recovery of the amortized cost basis for reasons such as liquidity, contractual or regulatory purposes. If the security meets this criterion, the decline in fair value is other-than-temporary and is recorded in earnings. The Company does not intend to sell these securities prior to maturity; therefore, there is no indication of other than temporary impairment of these securities.

For loan-backed securities in an unrealized loss position, management further evaluates whether the collection of all cash flows is probable. Management utilizes the prospective adjustment method to evaluate the present value of future cash flows. For those loan-back and structured securities (NAIC designated 1 or 2) where management has determined that collection of all contractual cash flows is not probable, the securities are considered other than temporarily impaired to the extent amortized cost is greater than the present value of future cash flows.

The Company does not intend to sell these securities prior to maturity; therefore, there is no indication of other than temporary impairment.

|             | markets at the measurement date.  |
| Level II    | Inputs other than quoted prices included in Level I that are observable for the asset |
|             | or liability through corroboration with market data at the measurement date.          |
| Level III   | Unobservable inputs that reflect management's best estimate of what market            |
|             | participants would use in pricing the asset or liability at the measurement date.     |
