

**STATE OF MAINE
OFFICE OF THE SECRETARY OF STATE**

Determination of the Validity of a Petition for Initiated Legislation Entitled:

“An Act to Protect Maine Communities by Enacting the Extreme Risk Protection Order Act”.

1. On January 23, 2025, 5,581 petition forms containing 79,981 signatures were submitted to the Secretary of State pursuant to the Constitution of Maine, Article IV, Part Third, Section 18 on behalf of the above-entitled initiated legislation.¹
2. Following a review of these 5,581 petition forms, I find the following signatures to be invalid for the following reasons:
 - A. 2,160 signatures are invalid because they were not certified by the registrar as belonging to a registered voter in that municipality. (REG)
 - B. 1,740 signatures are invalid because they are duplicates of signatures already counted. (DUP)
 - C. 452 signatures are invalid because the voter failed to provide a signature. (SIG)
 - D. 236 signatures are invalid because the circulator did not file a circulator’s affidavit at the time the petitions were filed with the Secretary of State. (AFF)
 - E. 130 signatures are invalid because the circulator’s oath was not complete or not administered properly. (OATH)
 - F. 119 signatures are invalid because the voter’s signature was crossed out on the petition form. (WD)
 - G. 81 signatures are invalid because they were dated after the date that the circulator’s oath was completed in the presence of the notary or the voter’s signature was not dated and it could not be determined that the voter signed the petition before the circulator took the oath. (DATE)
 - H. 80 signatures are invalid because the registered voter’s signature was made by another. (ANO)
 - I. 51 signatures are invalid because the petition forms were received by the municipal office after the municipal filing deadline. (AMD)
 - J. 43 signatures are invalid because of material alterations to the petition. (ALT)
 - K. 1 signature is invalid because the certification of the registrar was not completed. (CERT)

¹ An additional 299 petition forms were submitted that contained only signatures that were certified as invalid by municipal registrars or included no municipal certification. The Secretary of State did not complete a full review of signatures included on these 299 petition forms and these signatures were not included in the final tally of signatures that culminated in this Determination of Validity.

3. For the reasons set forth above, on the 5,581 petition forms filed with the Secretary of State, I find that 74,888 signatures are valid and 5,093 signatures are invalid. The number of signatures required to determine the petition to be valid is 67,682. Because the number of valid signatures exceeds the required number by 7,206 signatures, I find the petition to be valid.

Dated: March 7, 2025
