6: Environmental Protection

Description	Media	Last Updated	In Agency Retention	Rec Center Retention	Disposition	Status
<p>96#:</p> <p>Schedule #: 481 1#:Tannery Liaison Files</p> <p>In this file is kept a history of each tannery in the state including processes they use, problems they have had, disposal practices they use, and chemical analyses of their wastes. Also, notes from meetings, information on federal programs and contracts for professional services. Information on chromium and its effect on the environment and special projects including spreading of tannery sludge on agricultural land.</p>	Paper	5/23/1986	Years 5	Years 2	Destroy	Current
<p>Schedule #: 1078 7#:Legislative Liaison Information</p> <p>These files are kept for every legislative session. They contain such information as legislative documentation from the Governor's Office, Revisor's Office and public legislative hearings; testimony given on the bills; pertinent departmental notes on the bill; legislative language; etc. These records provide a history for the laws that are in place, as well as needed information on prior bills that did not become law, and that we may again try to request. It gives us the insight of why the bill did not pass, what our arguments for or against may have been, or what oppositions we may have faced. The information provides such things as names of the bills supporters, changes in language from current law, and information gathered from the department's policy and procedures staff.</p>	Paper	1/10/2000	Years 5	Years 10	Destroy	Current
<p>Schedule #: 1105 15#:Metallic Mineral Mining</p> <p>These files contain all the monitoring done in past years on the original conditions of the mining site. These are kept for the purpose of comparing them with new transfers or modifications that come to determine what needs to be done before the site can begin operation.</p>	Paper	6/13/1994	Years 3	Years 5	Archives	Current
<p>Schedule #: 1850 78#:Enforcement Working Papers, Drafts, and Reference Materials (Department Wide)</p>

6: Environmental Protection

Description	Media	Last Updated	In Agency Retention	Rec Center Retention	Disposition	Status	
<p>The department maintains records in this series in support of rulemaking proceedings under the authority of 38 M.R.S.A. § 341-H. Department program staff members generate records in this series as working documents during the rulemaking process.</p> <p>Records in this series include: Rough notes, calculations, non-circulated drafts, handwritten records transcribed into electronic form, and reference materials that do not contain annotations. Materials considered in connection with formulation, proposal and adoption of rule, such as: reference materials, peer-reviewed articles, other states' rules, polices or statutes, Maine statute; enabling legislation, federal law, regulation or guidance document. Transitory records of preliminary input from outside parties, such as stakeholder group, workshop, task force or comment period, including: agenda; telephone logs; correspondence; audio file; and comments. Internal working drafts of rule, intra-departmental comments generated prior to posting of rule, and assistant Attorney General correspondence related to rule review and legal fine tuning. Copy of public notice. Memos filed with Legislative council with rulemaking notice and major substantive filing and with Legislature's Joint Standing Committee on Natural Resources and the Environment for revisions to State Implementation Plan under Clean Air Act. Opening statement. Correspondence notifying interested parties of adoption meeting. Memo to Secretary of State indicating that adopted rule is major substantive. Correspondence with department or Board of Environmental Protection rulemaking staff regarding hearing logistics. Interested persons list. Legislative resolve supporting final adoption of major substantive rules. Rulemaking tracking sheet.</p> <p>Records in this schedule may be destroyed 60 days after the effective date of the rule.</p> <p>The retention periods in this series apply to records generated after July 1, 1972 and existing at the time of the effective date of this schedule.</p>	Mixed	3/4/2014 Days	60	No Retention	0	Destroy	Current

96C:Land Resources						
Schedule #: 114 70#:Environmental Protection Agency Correspondence						
Subsidy Bond monies was made to several municipalities in 1980. This was a one-time thing.	Paper	2/4/1985	Years 5	Years 1	Archives	Current
<hr/>						
Schedule #: 114 71#:Comprehensive Planning						
The Natural Resources Protection Act allows the Department of Environmental Protection to permit by rule certain development of natural resources. Files include: permit files; maps and pictures. When a landowner wants to do work that would affect the environment (such as construction of a building or addition; hauling in fill; evacuations, etc.) a municipal permit is sought. The municipality may refer the landowner to the DEP for its approval. If the landowner must submit an application to the DEP, and that application meets certain standards specified by the DEP, the landowner after 14 days may proceed with the project if he does not hear back from the DEP. This is called permit by rule.	Paper	12/7/1995	Years 2	Years 5	Destroy	Current
<hr/>						
Schedule #: 133 4#:Site Location of Development Applications						
Application and supporting documents for permit to locate a state, municipal, quasi-municipal, educational, charitable, commercial or industrial development on a specific site. Per Sherry Berry Goodwin The DEP must now keep plans and designs of Stormwater Best Management Practices must be forever kept. This series already contains Stormwater practices so we can officially add this to the series. File folder may contain maps, sketches, photos, transcripts of hearings, recommendation relating to project, etc. File also used by Enforcement Division to enforce adherence to application as approved by Board of Environmental Protection. Retention counted from date of Board action or project completion.	Paper	9/13/2000	Years 5	Years 45	Archives	Current
<hr/>

Schedule #: 1674 20#:Lead & Asbestos Project Notification files						

Department Series Report

6: Environmental Protection

Description	Media	Last Updated	In Agency Retention	Rec Center Retention	Disposition	Status
Lead and Asbestos Abatement Program Project Notification records are the official record of all asbestos and lead abatement projects that occur in Maine. These are highly regulated projects due to the hazardous nature of the materials which pose a threat to worker and public health when disturbed. These files are used by the property owners, the legal community and DEP to determine the history of abatement in buildings, and to assess compliance and implement enforcement as appropriate. A typical file includes all project notifications from a specific licensed contractor for a specific month.	Paper	10/3/2007	Years 2	Years 10	Destroy	Current
<hr/>						
Schedule #: 1676 21:Transportation of Petroleum Product Reports						
The Maine Coastal and Inland Surface Oil Clean Up Fund is established by 38 MRSA § 551 and is funded from license fees assessed per barrel on unrefined crude oil and all other refined oil, including fuel oil, kerosene, gasoline, jet fuel and diesel fuel transported into the State of Maine. The fees are paid monthly to the DEP on the basis of records certified to the commissioner and upon receipt are credited to the Fund.	Paper	3/14/2008	Years 3	Years 3	Destroy	Current
The Ground Water Oil Clean Up Fund is established by 38 MRSA § 569-A and is funded from per barrel fees on gasoline, refined petroleum products and their by-products other than gasoline, liquid asphalt and fuel oil, kerosene, jet fuel and diesel fuel. The fee is assessed on the first transfer of those products by oil terminal facility licensees and on a person required to register with the commissioner who first transports oil into the State. The fees must be paid monthly on the basis of records certified to the commissioner.						
The Transportation of Petroleum Product Reports maintained by the DEP support these two Funds and are used by agency personnel for financial reference and by state auditors and contracted auditors. A typical file contains information regarding petroleum products transported into Maine, date of transfer, facility shipped from and to, type of product, number of barrels, payments received. The retention schedule for these records coincides with Revenue Services' retention of fuel tax records which is 6 years.						
<hr/>						
Schedule #: 1677 22:Spill Prevention, Control and Countermeasures (SPCC) Plans						

Department Series Report

6: Environmental Protection

Description	Media	Last Updated	In Agency Retention	Rec Center Retention	Disposition	Status
<p>Spill Prevention, Control and Countermeasures (SPCC) plans are retained by the department under 38 MRSA §1318-C, a hazardous matter spill, regardless of the quantity spilled, must be reported immediately to the State Police unless an SPCC plan has been filed with the DEP. Enforcement and Licensing units in the Remediation and Waste Management program will review the plans for possible violations in handling of hazardous waste. Also during a spill emergency, the Department's Response group will utilize the plan for identification of chemicals used by the company and company contacts.</p> <p>The report will consist of reportable quantity for each hazardous matter, containment and diversionary structures, inspection, maintenance and testing procedures for storage and containment areas, emergency response equipment and locations and a description of the capabilities of the equipment, description of employee training programs, description of areas in need of protection and method of protection, description of discharge detection devices and emergency warning systems. The report will also contain a list of on-site emergency coordinators and the qualifications of on-site trained employee responders, description of evacuation procedures and assembly points, notification procedures for federal, state and local officials, procedures for supplying written reports to the department, general response and clean-up protocols by substance or substance class, specific on-site containment, treatment or removal plans, a description of the record-keeping process for responses involving the implementation of this plan, a description and copies of mutual aid agreements and any agreements with clean-up contractors and a promulgation statement and date of plan adoption. The retention period for these reports will begin when the boxes are received by the Records Center.</p>	Paper	3/14/2008	Variable - See Description	Years 10	Destroy	Current

Schedule #: 1756 25#:Solid Waste Product Management Programs

<p>Includes records from product management programs established pursuant to 38 MRSA Chapter 16 Sale of Consumer Products Affecting the Environment, including: mercury products, e-waste, and similar files from additional product management programs as enacted in this chapter of law. These files are used by program staff to track each entity's scope of responsibility and compliance under these laws. Typical files include: legal and contact information and product toxics content, sales, and recycling information from manufacturers; consolidator legal, contact and operational information; wholesaler and retailer contact, training and product recycling related information; end-of-life collection site contact, location and product handling information; and program reports.</p>	Record Copy	9/24/2009	Years 9	Years 6	Destroy	Current

Schedule #: 1886 26#:DEP Home Heating Oil Tank Replacement Program

Department Series Report

6: Environmental Protection

Description	Media	Last Updated	Years	In Agency Retention	1	Rec Center Retention	19	Disposition	Status
<p>The DEP spends over \$1.5 million each year cleaning up oil spills from home heating oil tanks at single family residences. This program replaces, free of charge, substandard home heating oil tanks at single family residences that meet low income guidelines. Problems may occur with the home heating oil tanks installed under this program and 99% of the time these problems will be resolved using only the data presented to use by the homeowner over the phone and the information contained in our database. But there is a likely change that DEP will need the information contained in one of the paper copies. In that situation, these records may prove valuable. Although the heating oil tank becomes the property of the homeowner, the DEP retains much of the responsibility for the tank for many years to come. For example, if the tank fails, DEP will be faced with the choice of replacement, possibility of cleaning up an oil spill for substandard tank repair. Because of this, DEP feels the need to retain the paper records associated with each tank installation for 2 primary reasons: 1) Verifying physical location of each tank installation should the homeowner claiming the tank was installed under the DEP Home Heating Oil Tank Replacement Program not appear in our database. The paper files will not only aid in determining the name and address of the installation but also the installing company and what accessories were supplied with the tank, allowing verification of what was actually installed and where it was installed. 2) Spotting of trends should problems appear. If, for example, a large number of tanks started failing prematurely or a large number of similar problems occurred, the paper copies would augment the Access database because of the detail contained in the paper records and only in the paper records. It is not feasible to enter all of the detailed information contained in the paper files into the computer database.</p>	Paper	12/28/2012	Years	1		Years	19	Destroy	Current

Schedule #: 1904 94#:Facility or Project Licensing or Permitting Drafts, Hazardous Waste Treatment, Storage and Disposal Facility Licensing; and Biomedical Waste Treatment, Storage and Disposal Facility Licensing

Department Series Report

6: Environmental Protection

Description	Media	Last Updated	In Agency Retention	Rec Center Retention	Disposition	Status
The Department maintains the records in this series for Hazardous Waste Treatment, Storage and Disposal Facility Licensing; and Biomedical Waste Treatment, Storage and Disposal Facility Licensing activities under the authority of 38 MRSA § 1306(1).	Mixed	10/29/2013 Days	60	No Retention	0 Destroy	Current

The licensing unit in the division of oil and hazardous waste facilities regulation is responsible for the processing of applications for hazardous waste treatment and storage facilities, waste oil storage facilities, universal waste, marine oil terminals, biomedical waste, rule promulgation, RCRA (Resource Conservation and Recovery Act, the principle federal law governing the disposal of hazardous waste) grant activities, closure of generators and licensed facilities and corrective action activities. The records are used for historical reviews of past decisions during rule promulgation and making grant commitment decisions. These records are also used for licensing renewal reviews; records are also indispensable for use when conducting facility closures and corrective action investigations or during change of land use. These records allow us to identify areas of concern that may need remediation from past operations of a facility and what potential health or environmental hazards may exist from present and past operations. Records in this series include: internal review routing sheet. The retention period begins upon the date the license is issued. The retention periods in this series apply to records generated after July 1, 1972 and existing at the time of the effective date of this schedule. Keep in agency for 60 days.

Schedule #: 2092 111:Brownfields (The Small Business Liability Relief and Brownfields Revitalization Act)

Department Series Report

6: Environmental Protection

Description	Media	Last Updated	In Agency Retention	Rec Center Retention	Disposition	Status		
<p>Brownfields are "Real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant." Essentially, a Brownfield site is a property where re-development is impeded because of contamination, real or perceived. The key benefits of Brownfields redevelopment include: the protection of public health and the environment through cleanup of commercial/industrial properties, slowing of "urban sprawl" by encouraging reuse of properties, increased tax revenues, use of existing infrastructure (e.g. roads, rail, water, sewer), and the revitalization of declining commercial/industrial based communities.</p> <p>Documents that can be found in a typical Brownfield file include: Municipal Brownfield Site Assessment Application, Municipal Brownfields Request for Remedial Assistance Application, Brownfields Cleanup Revitalization Loan Fund Subgrant Agreement as well as general correspondence and various reports from laboratories and consultants.</p>	Paper	12/8/2017	Years 2	Years 20	Archives	Current

Department Series Report

6: Environmental Protection

Description	Media	Last Updated	In Agency Retention	Rec Center Retention	Disposition	Status
<p>Schedule #: 2097 113:Landfills (Landfill Remediation and Closure Program)</p> <p>Maine has about 414 municipal landfills that include current licensed operating sites, closed sites or inactive sites that no longer take municipal waste but never went through an approved closure process. Most were unlicensed sites that threatened ground and surface water quality because of inappropriate siting, inadequate design or improper operation. The slow rate of closures during the late 1970's and early to mid 1980's showed the need for the state to provide assistance to municipalities for the proper planning and closure of these sites. To address this problem, the Maine Legislature created the Landfill Closure and Remediation Program.</p> <p>Documents that can be found in a typical Landfill Closure file include: Annual Monitoring Reports, Landfill Reimbursement Approvals, and Application for Reimbursement of Closed Landfill Remediation Costs as well as general correspondence and various reports from laboratories and consultants.</p>	Paper	4/4/2018	Years 5	Years 20	Archives	Current
<p>Schedule #: 2104 114:Spill Reimbursement Cases</p> <p>Spill Reimbursement Cases are part of a separate program related to Third Party Damage Claims (710/9#) and Technical Services Remediation Project Files (883/12#). These files are financial in nature and focus specifically on instances where the State D.E.P. endeavors to collect the entirety of remediation costs from an individual and/or business. Unlike Third Party Damage Claim files, where the individual and/or business has applied for (and has been granted) Department Fund coverage to pay for remediation costs (minus a deductible), Spill Reimbursement Cases focus on individual and/or business that have either not applied for Department Fund coverage, been denied Department Fund coverage, or have failed to pay the deductible in six months, thus revoking Department Fund coverage: in which case the individual and/or business is solely responsible for reimbursing the State for remediation costs.</p> <p>Documents that can be found in Spill Reimbursement Cases are: 1st Billing Letters, 2nd Billing Letters as well as general correspondence.</p>	Paper	5/16/2018	Years 5	No Retention 0	Destroy	Current
<p>See paper media description.</p> <p>Records are scanned upon closure and a digital file is kept for 5 years in the agency and then destroyed. Paper copies are kept for 5 years in the agency and then destroyed.</p>	Digital File	5/16/2018	Years 5	No Retention 0	Destroy	Current

Records are considered closed once DEP confirms the system has been removed from the property and the final inspection is complete. Records will be transferred to the Maine State Archives at the end of each calendar year for those systems removed within that year.	Mixed	9/18/2025	Contingent Upon Event - See Description	0	Archives	Current
<p>The Department issues licenses which are valid for five years, to residential and commercial individuals to discharge wastewater, after adequate treatment into surface and subsurface waters of the state. Licensing files contain a copy of the license, permitting files, site evaluations, compliance inspection forms, correspondence, informal enforcement actions and tax maps.</p> <p>Archival digital records will be retained by the agency until records are considered closed and have fulfilled their In Agency retention time. After the In Agency retention time is met, records will be transferred to LibSafe, the Maine State Archives digital preservation system. Archives will hold the "record copy" of the document and any agency copies will be considered reference copies.</p> <p>Archival paper records will be retained by the agency until records are considered closed and have fulfilled their In Agency retention time. After the In Agency retention time is met, records will be transferred to the Maine State Archives.</p>						

Schedule #: 1037 34#:Bowater, Water Quality Attainability Analysis File

Under the Clean Water Act all waters must be legally classified and have designated uses associated with those classes, e.g. classes AA, A,BC. If an industry causes the water to not meet its designated uses, e.g. fishable, swimmable, then there is a legal procedure open to possibly justify the industrial use over the legal, designated use. The legal procedure is: use attainability analysis. Keep in agency until completed. (Bowater has hydroelectric dams on the west branch of the Penobscot River which cause the river to not meet some of its legally designated uses. This file series documents the studies Bowater did to justify allowing the dams to remain and remain in operation.	Paper	5/25/1993	Contingent Upon Event - See Description	0	Years	2	Archives	Current
---	-------	-----------	---	---	-------	---	----------	---------

Schedule #: 1037 35#:Water Quality Planning Grant Program (604(B)

Records of monies received from the Clean Water Act (604(b) passed through and distributed to local State planning organizations for Water Quality Planning projects and final product. This is an ongoing program as long as EPA has the funds. Files include: Letters of Agreement, payment tracking, assorted correspondence and final report. Keep in agency until project completed. 6: Environmental Protection

Description	Media	Last Updated	In Agency Retention	Rec Center Retention	Disposition	Status
Each sewage treatmentn plant operator must have a state license to operate. In order to initially obtain that license, he/she must complete an application, show educational qualification, and in some cases document pertinent work experience. This series contains a file for each applicant or licensee containing the application, individual education records, work experience, a copy of the license fee check and a copy of the initial license certificate. Keep in agency until inactive plus 2 years.	Paper	4/12/1993	Years 2	No Retention 0	Destroy	Current
<hr/>						
Schedule #: 1040 56#:Site and Sewer Extension Review						
There are two avenues for data to reach this file series. First, by State law, any municipality contemplating the construction of a new sewer or a sewer extension must submit its plans to DEP for review and approval. Second, under the Site Location Law administered by the DEP Land Bureau any contemplated project, public or private, exceeding a threshold size must be submitted to DEP Land Bureau for review, approval and permitting. If such a project includes a new or expanded sewer line, that aspect of the project is forwarded by the Land Bureau to the Water Bureau for Water Bureau review, comment and approval. Such reviews, from either source, are necessary so that DEP can be certain that licensed sewage treatment plants will not receive more wastewater than the plants can effectively treat. Information includes engineering plans and drawings showing what is proposed and a response letter saying DEP approves, approves with specific modifications, or disapproves the proposal.	Paper	4/12/1993	Years 5	Years 5	Destroy	Current
<hr/>						
Schedule #: 1191 60#:Whole Effluent Toxicity (Wet Test) and Priority Pollutant						
Records will be considered closed once the facility has closed or the facility is no longer required to do Wet Testing. Records will be transferred at the end of each calendar year, for those that closed within that year.	Digital File	12/30/2025	Contingent Upon Event - See Description	0	Archives	Current
The purpose of these records is to document effluent test results for all waste discharge licensees subject to Department regulations Chapter 530. Records include whole effluent toxicity test results and priority pollutant scan results.						
Archival digital records will be retained by the agency until records are considered closed and have fulfilled their In Agency retention time. After the In Agency retention time is met, records will be transferred to LibSafe, the Maine State Archives digital preservation system.
