West Nile Fever	0	0	1	0	0	0	0	0	0	0	0	0	0	0	0	0	1

This includes investigations initiated during the first, second, and third quarters of MMWR Year 2018 (December 31, 2017 through September 30, 2018). Only investigations with a case status are included in this report. For all outbreak conditions confirmed, probable, and suspect case statuses are included. For non-outbreak conditions confirmed and probable case statuses are included. If a condition is not listed that means no cases met the case definition during this time.

\*Lyme disease surveillance is a passive system and can take several months for cases to be counted. These numbers may change dramatically as providers return case report forms and the system is updated.
